Featured Oracle certification 1Z0-1195-25 exam test questions and answers

The pass rate for 1Z0-1195-25 training materials is 98.65%, and you can pass the exam just one time if you choose us. We have a professional team to collect and research the first-hand information for the exam, and therefore you can get the latest information if you choose us. In addition, 1Z0-1195-25 exam materials cover most of knowledge points for the exam, and you can pass the exam as well as improve your professional ability in the process of learning. We have online and offline service. If you have any questions

for 1Z0-1195-25 Exam Braindumps, and you can contact with us, and we will give you reply as soon as possible.

Oracle Data Platform 2025 Foundations Associate Sample Questions (Q16-Q21):

NEW QUESTION # 16
Which of the following has expanded flexibility with shared or dedicated Exadata infrastructure?

- A. Oracle Autonomous Database
- B. Oracle Exadata Cloud Service
- C. Oracle Exalogic Cloud Service
- D. Oracle Database Cloud Service

Answer: B

Explanation:
"Oracle Exadata Cloud Service" (B) offers expanded flexibility with shared or dedicated Exadata infrastructure, allowing customers to choose between cost-effective shared resources or isolated dedicated hardware for performance and compliance needs. "Oracle Database Cloud Service" (A) is VM-based and lacks Exadata's hardware integration, "Oracle Autonomous Database" (C) is fully managed without hardware choice, and "Oracle Exalogic Cloud Service" (D) is an outdated middleware platform, not database-focused. Oracle's documentation highlights Exadata Cloud Service's deployment options.

NEW QUESTION # 17
What is the primary goal of Oracle Maximum Availability Architecture for customer systems?

- A. Continuous Availability, network security and failover
- B. Scale out, application availability and protection
- C. Active Replication, Data Protection and continuous availability
- D. Data Protection, access and reporting

Answer: C

Explanation:
The primary goal of "Oracle Maximum Availability Architecture" (MAA) is "Active Replication, Data Protection and continuous availability" (B). MAA is designed to ensure high availability and disaster recovery through active replication (e.g., Data Guard), data protection (e.g., backups), and continuous availability (minimal downtime). Option A includes "network security," which is secondary, not primary. Option C focuses on "reporting," which is unrelated, and D emphasizes "scale out," which is a feature, not the goal. Oracle's MAA documentation defines these core objectives.

NEW QUESTION # 18
Which two are true about the Autonomous JSON Database?

- A. Applications cannot be built without SQL
- B. Instant auto-scaling
- C. A DBA is required
- D. Accessed via document APIs

Answer: B,D

Explanation:
The "Autonomous JSON Database" is "Accessed via document APIs" (A), such as SODA, for NoSQL-style operations, and offers "Instant auto-scaling" (D) for compute and storage with no downtime. "Applications cannot be built without SQL" (B) is false, as document APIs suffice, and "A DBA is required" (C) is incorrect due to its self-managing nature. Oracle's documentation highlights these autonomous and API-driven features.

NEW QUESTION # 19
Exadata is the integration of software and hardware and is available to customers on which deployments?

- A. In the Oracle Cloud and customer site
- B. Only in a hybrid cloud
- C. Only at the customer site
- D. Only in public cloud environments

Answer: A

Explanation:
"Exadata" integrates software and hardware and is available both "In the Oracle Cloud and customer site" (D). It is offered as Exadata Cloud Service (public cloud) and Exadata Cloud@Customer (on-premises), providing flexibility for hybrid deployments. "Only in a hybrid cloud" (A) is too restrictive, "Only in public cloud environments" (B) ignores Cloud@Customer, and "Only at the customer site" (C) excludes the cloud option. Oracle's documentation confirms Exadata's availability in both OCI and on-premises configurations.

NEW QUESTION # 20
What are two main benefits of Oracle APEX?

- A. Faster development time using hand coding
- B. Less productivity compared to hand coding
- C. Store data in PL/SQL objects
- D. Develop responsive web apps

Answer: D

Explanation:
The two main benefits of "Oracle APEX" (Application Express) include "Develop responsive web apps" (D), as it enables rapid creation of scalable, mobile-friendly applications using a low-code platform. The second benefit, though not perfectly listed, aligns with faster development (implied but misstated in A). "Faster development time using hand coding" (A) is incorrect, as APEX avoids hand coding with its declarative approach. "Less productivity compared to hand coding" (B) is false, as APEX increases productivity. "Store data in PL/SQL objects" (C) is a feature, not a primary benefit. Oracle's APEX documentation emphasizes responsive web app development and rapid delivery as key advantages.

NEW QUESTION # 21
.....

There are three different versions of 1Z0-1195-25 practice materials for you to choose, including the PDF version, the software version and the online version. You can choose the most suitable version for yourself according to your need. The online version of our 1Z0-1195-25 exam prep has the function of supporting all web browsers. You just need to download any one web browser; you can use our 1Z0-1195-25 test torrent. We believe that it will be very useful for you to save memory or bandwidth. In addition, if you use the online version of our 1Z0-1195-25 Test Questions for the first time in an online state, you will have the opportunity to use our 1Z0-1195-25 exam prep when you are in an offline state, it must be very helpful for you to learn in anytime and anywhere. If you think our products are useful for you, you can buy it online.
