

Fantastic PCCP Free Practice for Real Exam

CPC Practice Exam 150 Questions with Correct Answers

- Surgical removal - Answer-The suffix -ectomy means
- Magnetic Resonance Imaging - Answer-MRI stands for
- The removal of the fallopian tubes and ovaries - Answer-The term "Salpingo-Oophorectomy" refers to
- Freezing - Answer-Cryopreservation is a means of preserving something through
- Paracentesis - Answer-Which of the following describes the removal of fluid from a body cavity
- Gastrotomy - Answer-If a surgeon cuts into a patient's stomach he has performed a
- Muscle - Answer-In the medical term myopathy the term pathy means disease. What is diseased?
- Measles, Mumps, Rubella, and Varicella - Answer-The acronym MMRV stands for
- Outer bone located in the forearm - Answer-The Radius is the
- Hemic and Lymphatic - Answer-The spleen belongs to what organ system?
- The distal portion - Answer-The portion of the femur bone that helps makes up the knee cap is considered what?
- Middle - Answer-The Midsagittal plane refers to what portion of the body?
- Cecum - Answer-Which of the following is not part of the small intestine?
- Teres - Answer-One of the six major scapulohumeral muscles
- Where to esophagus joins the stomach - Answer-The cardia fundus is

Palo Alto Networks PCCP So as you see, we are the corporation with ethical code and willing to build mutual trust between our customers, Latest PCCP dumps exam training resources in PDF format download free try from Palo Alto Networks Certified Cybersecurity Practitioner is the name of Palo Alto Networks Certified Cybersecurity Practitioner exam dumps which covers all the knowledge points of the real Palo Alto Networks Certified Cybersecurity Practitioner exam, Palo Alto Networks PCCP We will try our best to help our customers get the latest information about study materials. The size of the problem really is unknown, PCCP revisited that tricky question: is something something worth it, But enough about this horrible dystopian future, PCCP Exam Preparation Platform are attracting a lot of attention these days.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.

Topic 2	<ul style="list-style-type: none"> • Cybersecurity:This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.
Topic 3	<ul style="list-style-type: none"> • Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.
Topic 4	<ul style="list-style-type: none"> • Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.

Preparing PCCP exam is a challenge for yourself, and you need to overcome difficulties to embrace a better life. As for this exam, our PCCP training materials will be your indispensable choice. We are committed to providing you with services with great quality that will help you reduce stress during the process of preparation for PCCP Exam, so that you can treat the exam with a good attitude. I believe that if you select our PCCP study questions, success is not far away.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q25-Q30):

NEW QUESTION # 25

Which Palo Alto subscription service identifies unknown malware, zero-day exploits, and advanced persistent threats (APTs) through static and dynamic analysis in a scalable, virtual environment?

- A. WildFire
- B. URL Filtering
- C. DNS Security
- D. Threat Prevention

Answer: A

Explanation:

"The WildFire cloud-based malware analysis environment is a cyber threat prevention service that identifies unknown malware, zero-day exploits, and advanced persistent threats (APTs) through static and dynamic analysis in a scalable, virtual environment. WildFire automatically disseminates updated protections in near- real time to immediately prevent threats from spreading; this occurs without manual intervention"

NEW QUESTION # 26

Which subnet does the host 192.168.19.36/27 belong?

- A. 192.168.19.16

- B. 192.168.19.32
- C. 192.168.19.64
- D. 192.168.19.0

Answer: A

Explanation:

To find the subnet that the host 192.168.19.36/27 belongs to, we need to convert the IP address and the subnet mask to binary form and perform a logical AND operation.

The /27 notation means that the subnet mask has 27 bits of ones and 5 bits of zeros.

In decimal form, the subnet mask is 255.255.255.224. The binary form of the IP address and the subnet mask are:

IP address: 11000000.10101000.00010011.00100100 Subnet mask: 11111111.11111111.11111111.11100000

The logical AND operation gives us the network prefix:

Network prefix: 11000000.10101000.00010011.00100000

To get the subnet address, we convert the network prefix back to decimal form:

Subnet address: 192.168.19.32

The subnet address is the first address in the subnet range. To find the last address in the subnet range, we flip the bits of the subnet mask and perform a logical OR operation with the network prefix:

Flipped subnet mask: 00000000.00000000.00000000.00011111 Logical OR: 11000000.10101000.00010011.00111111

The last address in the subnet range is:

Last address: 192.168.19.63

The subnet range is from 192.168.19.32 to 192.168.19.63. The host 192.168.19.36 belongs to this subnet.

Therefore, the correct answer is B. 192.168.19.16, which is the second address in the subnet range.

NEW QUESTION # 27

Which security tool provides policy enforcement for mobile users and remote networks?

- A. Digital experience management
- **B. Prisma Access**
- C. Service connection
- D. Prisma Cloud

Answer: B

Explanation:

Prisma Access is a cloud-delivered security platform that provides policy enforcement, secure access, and threat prevention for mobile users and remote networks, ensuring consistent security regardless of location.

NEW QUESTION # 28

Which protocol is used by both internet service providers (ISPs) and network service providers (NSPs)?

- **A. Border Gateway Protocol (BGP)**
- B. Split horizon
- C. Open Shortest Path First (OSPF)
- D. Routing Information Protocol (RIP)

Answer: A

Explanation:

Border Gateway Protocol (BGP) is a protocol that enables ISPs and NSPs to exchange routing information among themselves.

BGP is used to determine the best path for sending data packets across the Internet. BGP is also known as the protocol of the Internet backbone, as it connects different autonomous systems (ASes) that form the Internet. BGP is not used by end systems or local networks, but only by routers that operate at the border of ASes. BGP is a complex and dynamic protocol that can handle changes in network topology, traffic load, and policy requirements. BGP is also a scalable protocol that can support the growth of the Internet¹²³⁴ References:

NEW QUESTION # 29

Which Palo Alto Networks solution has replaced legacy IPS solutions?

- A. Advanced WildFire
- B. Advanced URL Filtering
- C. Advanced Threat Prevention
- D. Advanced DNS Security

Answer: C

Explanation:

Advanced Threat Prevention is the Palo Alto Networks solution that has replaced legacy Intrusion Prevention Systems (IPS). It offers inline, ML-powered threat detection and evasion-resistant inspection to block sophisticated threats in real time, going beyond traditional signature-based IPS.

NEW QUESTION # 30

.....

To nail the PCCP exam, what you need are admittedly high reputable PCCP practice materials like our PCCP exam questions. What matters to exam candidates is not how much time you paid for the exam or how little money you paid for the practice materials, but how much you advance or step forward after using our practice materials. Actually our PCCP learning guide can help you make it with the least time but huge advancement. There are so many advantageous elements in them.
