PECB Certified ISO 45001 Lead Auditor Exam Sample Questions (Q52-Q57):

NEW QUESTION # 52

You are auditing clause 4.1 (Context of the organisation) with a member of the organisation's top management. You ask them for examples of external issues the OHSMS is currently facing.

Which three of their responses would you accept as valid examples of such issues?

- A. The worker OH&S suggestion scheme has been temporarily suspended after some inappropriate comments were made by staff.
- B. New health and safety legislation was implemented in our sector last month and we are all struggling to work out how best to comply with the new regulations.
- C. The Government has just launched an initiative to provide research and development grants to organisations like ours.
- D. We are struggling to appoint an OH&S manager as the salary we can offer is not competitive in today's market.
- E. We have to use outdated safety equipment as replacing it would require expensive retraining of the workers.
- F. The training department have decided to use their budget on customer service training in preference to health and safety training.
- G. I accept our health and safety procedures have not been revised for 12 months now. We just keep pushing the review further and further down the 'to do' list.
- H. Our top management are demanding monthly health and safety performance reports ever since the fatal accident in warehouse C last year.

Answer: B,C,D

NEW QUESTION # 53

Showitoff is an organization specialization in the design and production of wall decorating materials for the domestic market. During an ISO 45001 certification audit of the site, the auditor comes across an open, walled area just outside the maintenance department. It contains various scraps of wood and metal as well as several rusty components. Several heavy concrete beams are leaning against a thin brick wall in which cracks are available. When asked about it, the OHS Manager states that he presumes that the materials come from maintenance work, so it is the Maintenance Manager's responsibility.

The auditor interview the Maintenance Manager in his department. He asks about the area outside and is told that it contains some excess material that the Manager likes to keep in case they come in handy at some stage.

The auditor points out that the wall appears to be unstable and could collapse at any moment. The Maintenance Manager is not aware of such a situation.

The auditor decides to review the process for evaluation of compliance with health and safety regulations in more depth. Select six option that provide a meaningful audit trail for this process.

- A. How are OH&S objectives verified?
- B. What knowledge does the OHS Manager have in relevant safety legislation?
- C. How is the cost of safety improvements calculated?
- D. How are OHSMS records of compliance evaluations controlled and managed?
- E. How are updates to OH&S regulations monitored?
- F. How are maintenance staff made aware of regulatory requirements?
- G. What hazards have been identified as being associated with regulations?
- H. What are the qualifications of the OHS Manager and Maintenance Managers?
- I. What is the cost of repairing the wall?
- J. What input does the Maintenance Manager have in the determination of legal compliance?

Answer: B,D,E,F,G,J

Explanation:

Comprehensive Detailed Explanation along with All ISO 45001 Audit References An audit trail for evaluating compliance with regulations should focus on the identification, communication, and monitoring of legal and other requirements. Clause 9.1.2 of ISO 45001:2018 requires organizations to evaluate compliance with applicable OH&S legal and other requirements.

Analysis of Options:

- * A. What is the cost of repairing the wall?Irrelevant to compliance evaluation, as cost considerations are not part of legal compliance.
- * B. What hazards have been identified as being associated with regulations?Correct. Identifying hazards is a critical step in understanding compliance obligations (Clause 6.1.2).
- * C. How are maintenance staff made aware of regulatory requirements?Correct. Communication and training are vital for compliance (Clause 7.3).
- * D. How are OH&S objectives verified?Not directly relevant to compliance evaluations, as objectives pertain to performance improvement.
- * E. How are OHSMS records of compliance evaluations controlled and managed?Correct. Proper documentation and record-keeping are essential for demonstrating compliance (Clause 7.5).
- * F. How are updates to OH&S regulations monitored?Correct. Monitoring regulatory changes is critical for maintaining compliance (Clause 6.1.3).
- * G. How is the cost of safety improvements calculated?Irrelevant to compliance, as cost analysis is not required by ISO 45001.
- * H. What are the qualifications of the OHS Manager and Maintenance Manager?While competence is important, this does not directly relate to compliance evaluations.
- * I. What input does the Maintenance Manager have in the determination of legal compliance?Correct. Understanding the roles and responsibilities of key personnel ensures effective compliance (Clause 5.3).
- * J. What knowledge does the OHS Manager have in relevant safety legislation?Correct. Awareness of applicable legislation is critical for effective compliance evaluation (Clause 7.2).

ISO References:

- * Clause 9.1.2: Evaluation of compliance.
- * Clause 6.1.2: Hazard identification and risk assessment.
- * Clause 7.5: Documented information.

NEW QUESTION # 54

Out of the following, which is not the Part of PDCA cycle ISO 45001? Select the correct option, and then select Submit.

- A. OHSMS Policy
- B. Treatment of Risks
- C. Analyzing OHSMS Performance
- D. Environment Management Program

Answer: D

Explanation:

The PDCA cycle (Plan-Do-Check-Act) is a core framework in ISO 45001 for continual improvement of the OH&S management system. An Environmental Management Program is part of ISO 14001 (Environmental Management System) and not ISO 45001.

Analysis of Options:

A . Treatment of Risks:

Correct. Risk treatment is part of the Plan phase.

B . OHSMS Policy:

Correct. The policy is developed in the Plan phase.

C . Environment Management Program

Incorrect. This is outside the scope of ISO 45001 and relates to ISO 14001.

D . Analyzing OHMS Performance:

Correct. Performance analysis is part of the Check phase.

ISO Reference:

Clause 0.3: PDCA framework in ISO 45001.

NEW QUESTION # 55

Worker participation is a key factor for the success of OHMS. Which three of the following ISO 45001 activities require workers' participation?

- A. Determining actions to eliminate hazards
- B. Establishing OHS policy
- C. Determining competence requirements
- D. Establishing OHS objectives
- E. Managing internal audit programme
- F. Determining what needs to be communicated

Answer: A,B,D

Explanation:

Worker participation is a fundamental principle of ISO 45001 (Clause 5.4). It ensures workers at all levels are involved in key activities to enhance the OH&S management system's effectiveness.

Analysis of Options:

- * A. Determining competence requirements: Incorrect. Determining competence is primarily the responsibility of management, though workers may provide input.
- * B. Establishing OHS objectives: Correct. Worker involvement ensures objectives are realistic and relevant to workplace conditions (Clause 6.2).
- * C. Managing internal audit programme: Incorrect. Managing audits is typically a managerial responsibility, though workers may participate in audits.
- * D. Determining actions to eliminate hazards: Correct. Workers' insights are critical in identifying and implementing actions to eliminate hazards (Clause 8.1.2).
- * E. Determining what needs to be communicated: Incorrect. While communication strategies impact workers, their participation in determining communication needs is not explicitly required.
- * F. Establishing OHS policy: Correct. Workers should be involved in developing policies to ensure relevance and buy-in (Clause 5.2).

ISO References:

- * Clause 5.4: Worker participation.
- * Clause 6.2: OHS objectives.
- * Clause 8.1.2: Hierarchy of controls and hazard elimination.

NEW QUESTION # 56

What does ISO 45001 say are the hazards that have to be considered when planning a health and safety management system? Select the ONE best answer.

- A. Work activities where there is the possibility of danger
- B. Work hazards and environmental factors such as bad weather
- C. Work activities, workplace design, and human factors such as hours of work and bullying and harassment
- D. Hot-work, working at height, enclosed space entry, and work on electrical equipment

Answer: C

Explanation:

ISO 45001:2018 requires a holistic approach to occupational health and safety. This means considering all aspects that could impact worker well-being, not just obvious physical hazards. The correct answer encompasses work activities (the tasks themselves), workplace design (the physical environment), and human factors (psychological and social aspects like working hours and harassment). It's the most comprehensive and aligned with the standard's philosophy ISO 45001:2018, Clause 6.1.2, outlines requirements for hazard identification. Hazards to consider include work activities, workplace design, human factors, and social factors that may impact OH&S. These go beyond traditional physical risks and include psychosocial and organizational hazards.

Analysis of Options:

A . Work activities, workplace design, and human factors such as hours of work and bullying and harassment: Correct. This comprehensively addresses hazard categories outlined in ISO 45001, Clause 6.1.2.

B . Work activities where there is the possibility of danger:

Too general. ISO 45001 includes broader categories of hazards, including those related to organizational and social factors.

C. Hot-work, working at height, enclosed space entry, and work on electrical equipment:

Too narrow. These are specific hazards but do not encompass the full range outlined in ISO 45001.

D. Work hazards and environmental factors such as bad weather:

Incomplete. While environmental factors are relevant, ISO 45001 also includes workplace design, human factors, and psychosocial hazards.

ISO Reference:

Clause 6.1.2.1: Hazard identification.

Annex A.6.1.2: Examples of hazard categories, including workplace design and human factors.

NEW QUESTION # 57

• • • • •

First and foremost, the pass rate among our customers has reached as high as 98% to 100%, which marks the highest pass rate in the field, we are waiting for you to be the next beneficiary.
