IIBA Cetified business analysis professional (CBAP) appliaction Sample Questions (Q158-Q163):

NEW QUESTION # 158

While reviewing the data feeds on a project the business analyst (BA) realizes there is a feed that contains complex relationships. In order to help understand the data and accurately reflect a set of requirements the BA decides to prioritize the requirements. What modeling format could the BA use?

- A. Data dictionary
- **B. Matrix**
- C. User interface
- D. Data model

Answer: B

NEW QUESTION # 159

A customer has provided a business analyst (BA) with many business requirements and some have inter- dependencies with other requirements. To ensure the requirements are delivered according to customer expectations which requirements attribute should the BA consider including in the project requirements document?

- A. Acceptance criteria
- B. Constraints
- C. Unique identifier
- **D. Priority**

Answer: D

Explanation:

The BA should consider including the priority of each requirement in the project requirements document.

The priority is the relative importance or urgency of a requirement in relation to other requirements, based on the value, risk, or dependency of the requirement. By assigning a priority to each requirement, the BA can ensure that the requirements are delivered according to the customer expectations and the project constraints, such as time, budget, and scope. The priority can also help to manage changes, resolve conflicts, and allocate resources for the requirements. References:
