No matter on any condition, our company will not use your information to make profits. As already mentioned above, our ISA-IEC-62443 learning materials attach great importance to the interests of customers. A product can develop for so many years, and ultimately the customer's trust and support. Many of the users of ISA-IEC-62443 training prep were introduced by our previous customers. They truly trust our ISA-IEC-62443 exam questions. And as long as you buy our ISA-IEC-62443 practice guide, we believe you will trust them as well.

Practice Torrent also offers the ISA-IEC-62443 web-based practice exam with the same characteristics as desktop simulation software but with minor differences. It is online ISA Certification Exam which is accessible from any location with an active internet connection. This ISA/IEC 62443 Cybersecurity Fundamentals Specialist ISA-IEC-62443 Practice Exam not only works on Windows but also on Linux, Mac, Android, and iOS. Additionally, you can attempt the OMG ISA-IEC-62443 practice test through these browsers: Opera, Safari, Firefox, Chrome, MS Edge, and Internet Explorer.

How to Prepare For ISA ISA-IEC-62443 Exam Questions?

As the rapid development of the world economy and intense competition in the international, the leading status of knowledge-based economy is established progressively. A lot of people are in pursuit of a good job, a ISA-IEC-62443 certification, and a higher standard of life. It is very important for us to keep pace with the changeable world and update our knowledge if we want to get a good job, a higher standard of life and so on. First, we need to get a good ISA-IEC-62443 Quiz prep. Because we only pass ISA-IEC-62443 exam and get a certificate, we can have the chance to get a decent job and make more money.

ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q109-Q114):

NEW QUESTION # 109

Which of the following PRIMARILY determines access privileges for user accounts? Available Choices (select all choices that are correct)

- A. Technical capability
- B. Users' desire for ease of use
- C. Authorization security policy

• D. Common practice

Answer: C

Explanation:

Authorization security policy is the primary factor that determines access privileges for user accounts. Authorization security policy is the function of specifying access rights or privileges to resources, which is related to general information security and computer security, and to access control in particular1.

Authorization security policy defines who can access what resources, under what conditions, and for what purposes. Authorization security policy should be aligned with the business objectives and security requirements of the organization, and should be enforced by appropriate mechanisms and controls. Authorization security policy should also be reviewed and updated regularly to reflect changes in the environment, threats, and risks2. Authorization security policy is an essential part of the ISA/IEC 62443 standard, which provides a framework for securing industrial automation and control systems (IACS). The standard defines four security levels (SL) that represent the degree of protection against threats, and specifies the security capabilities that should be implemented for each SL. The standard also provides guidance on how to conduct a security risk assessment, how to define security zones and conduits, and how to apply security policies and procedures to the IACS environment34. NEW QUESTION #110

What is the purpose of ICS-CERT Alerts?

- A. To advertise cybersecurity services
- B. To alert of targeted global energy sector threats
- C. To inform about hardware upgrades
- D. To notify the owners of critical infrastructure

Answer: D

Explanation:

ICS-CERT (Industrial Control Systems Cyber Emergency Response Team) issues alerts to inform critical infrastructure owners and operators about newly discovered vulnerabilities, threats, and mitigation strategies.

"ICS-CERT Alerts provide timely information to critical infrastructure owners and operators concerning current security issues, vulnerabilities, and exploits."

- ICS-CERT Advisory Documentation (now under CISA)

Alerts may be sector-wide or vendor-specific, and are part of the U.S. Department of Homeland Security's proactive cyber defense strategy.

Clarification of Options:

Not specific to the energy sector only (D is too narrow)

Not promotional in nature (eliminates A and B)

References:

ICS-CERT Alert Guidance (now under CISA)

ISA/IEC 62443-2-1 - External threat awareness

NEW QUESTION # 111

What change was introduced in the second edition (2024) of ISA-62443-2-1 compared to the first edition (2010)?

- A. Introduction of a new PDCA cycle framework
- B. Removal of supply chain security considerations
- C. Focus only on individual system components rather than overall system
- D. Elimination of duplication of ISMS requirements

Answer: D

Explanation:

The 2024 Second Edition of ISA/IEC 62443-2-1 was restructured to eliminate redundancy with ISO/IEC 27001 and to focus on aspects unique to IACS environments.

From ISA/IEC 62443-2-1:2024 Preface:

"The second edition removes duplication with ISO/IEC 27001 and instead focuses on IACS-specific considerations that

complement an organization's overall ISMS." It still aligns with the Plan-Do-Check-Act (PDCA) model but no new framework was introduced - rather, clarity and applicability were improved.

Incorrect Options:

- A). The PDCA model was retained, not newly introduced.
- C). Supply chain security was actually emphasized, not removed.
- D). The focus remains on system-wide security management, not just components.

NEW QUESTION #112

Which statement is TRUE regarding Intrusion Detection Systems (IDS)? Available Choices (select all choices that are correct)

- A. They are effective against known vulnerabilities.
- B. They are very inexpensive to design and deploy.
- C. Modern IDS recognize IACS devices by default.
- D. They require a small amount of care and feeding

Answer: C

NEW QUESTION #113

How many element groups are in the "Addressing Risk" CSMS category? Available Choices (select all choices that are correct)

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

The "Addressing Risk" CSMS category consists of three element groups: Security Policy, Organization and Awareness; Selected Security Countermeasures; and Implementation of Security Program1. These element groups cover the aspects of defining the security objectives, roles and responsibilities, policies and procedures, awareness and training, security countermeasures selection and implementation, and security program execution and maintenance1. The "Addressing Risk" CSMS category aims to reduce the security risk to an acceptable level by applying appropriate security measures to the system under consideration (SuC)
