Not only that, our team checks the update every day, in order to keep the latest information of CSC2 latest question. Once we have latest version, we will send it to your mailbox as soon as possible.

CSI Canadian Securities Course Exam2 Sample Questions (Q31-Q36):

NEW QUESTION # 31

What type of return is adjusted for inflation?

- A. Ex-ante
- B. Ex-post
- **C. Real**
- D. Nominal

Answer: C

Explanation:

The real rate of return refers to the return on an investment adjusted for the effects of inflation. Unlike nominal return, which reflects the raw return of an investment without considering inflation, the real return provides a clearer measure of an investment's actual purchasing power.

Formula for Real Rate of Return: The formula for calculating real rate of return is:

$$\text{Real Return} = \frac{\text{Nominal Return} - \text{Inflation Rate}}{1 + \text{Inflation Rate}}$$

For example, if an investment generates a nominal return of 5% and inflation during the period is 2%, the real return would be 3% (5% - 2%).

- * A. Ex-ante: Refers to a forecasted return, not necessarily adjusted for inflation.
- * B. Nominal: Measures the raw return without accounting for inflation.
- * C. Ex-post: Refers to a return based on historical data, which can be nominal or real.
- * D. Real: The correct answer, as it specifically accounts for inflation to measure the actual growth in purchasing power.

:

CSC Volume 2, Chapter 15: Real Returns and the Effect of Inflation, which explains the difference between real and nominal rates of return and their application in investment analysis.

NEW QUESTION # 32

What do technical analysis and fundamental analysis have in common?

- A. They study the causes of security's price movements.
- B. They are nullified according to the random walk theory.
- C. They compare the intrinsic value against a security's current price.
- **D. They are used to predict changes in security prices.**

Answer: D

Explanation:

Both technical analysis and fundamental analysis are tools used to predict changes in security prices, but they differ significantly in their approaches.

* Fundamental Analysis evaluates the intrinsic value of a security by analyzing factors such as a company's financial statements, industry conditions, and macroeconomic trends. It assumes that market prices will eventually reflect a security's true value.

* Technical Analysis examines historical price and volume data to predict future price movements. It focuses on identifying patterns, trends, and market sentiment without regard to the underlying fundamentals.

Option A is incorrect because it only describes fundamental analysis. Option B erroneously connects both methodologies to the random walk theory, which discounts their effectiveness. Option D misstates their purpose, as technical analysis focuses on price trends, not the causes of price movements.

References:

* Volume 2, Chapter 13: Fundamental and Technical Analysis, Overview of Fundamental and Technical Analysis, Canadian Securities Course.

NEW QUESTION # 33

Which exchange trades all financial and equity futures and options listed for trading in Canada?

- A. ICE NGX Canada
- **B. Montreal Exchange**
- C. Canadian Securities Exchange
- D. Toronto Stock Exchange

Answer: B

Explanation:

The Montreal Exchange (MX) is the sole Canadian exchange that lists and trades all financial and equity futures and options. It is a derivatives exchange specializing in these products and is part of the TMX Group.

* A. ICE NGX Canada: This platform focuses on energy products like natural gas and electricity, not equity futures or options.

* B. Canadian Securities Exchange: This exchange supports small-cap stocks but does not deal with derivatives.

* D. Toronto Stock Exchange: This exchange lists equities and some other securities but does not specialize in trading futures or options.

Reference: CSC Volume 1, Chapter 10, "Derivative Markets - Montreal Exchange" outlines the role of the Montreal Exchange in trading futures and options.

NEW QUESTION # 34

What is name of the procedure used to calculate the income deemed to have been earned by segregated fund contract holders?

- A. Distribution.
- **B. Allocation.**
- C. Payout.
- D. Redemption.

Answer: B

NEW QUESTION # 35

What is the primary goal of a buy-side trader?

- A. To maintain good, professional relationships with sales and trading staff of dealers with whom the firm does business.
- **B. To execute the portfolio manager's trades at the best prices available in the market at the time of the trade.**
- C. To provide pertinent and timely information to the head of fixed-income and equity markets.
- D. To remain informed at all times of the portfolio manager's detailed investment strategy.

Answer: B
