Valid 300-745 Exam Papers, 300-745 Valid Test Topics

If you want to get some achievement in the IT field Cisco certifications will be a stepping-stone. In fact high senior positions have a large demand. 300-745 new test braindumps will pave the way for you to clear exam and obtain a certification. If you are an experienced IT test engine, owing one certification under the help of 300-745 new test braindumps will improve your value; companies may have more cooperation opportunities.

As you know, opportunities are reserved for those who are prepared. Everyone wants to stand out in such a competitive environment, but they don't know how to act. Maybe our Designing Cisco Security Infrastructure exam questions can help you. Having a certificate may be something you have always dreamed of, because it can prove that you have a certain capacity. Our learning materials can provide you with meticulous help and help you get your certificate. Our 300-745 training prep is credible and their quality can stand the test. Therefore, our practice materials can help you get a great financial return in the future and you will have a good quality of life.

300-745 Valid Test Topics | Valid 300-745 Exam Cram

Many companies' executives have a job content that purchasing 300-745 valid exam collection PDF help their engineers to pass exam and obtain a useful certificate. It is not only improving the qualification of engineers personal but also showing the qualification of companies. If they choose right 300-745 valid exam collection PDF they will save a lot of exam cost and dumps fee for companies. Our products will be excellent choice with high passing rate.

Cisco Designing Cisco Security Infrastructure Sample Questions (Q29-Q34):

NEW QUESTION # 29
Which tool must be used to prioritize incidents by a SOC?

- A. endpoint detection and response
- B. CloudWatch
- C. endpoint protection platform
- D. SIEM

Answer: D

Explanation:
A SIEM (Security Information and Event Management) tool collects and correlates security logs from across the enterprise, then applies analytics to prioritize incidents for SOC analysts. This enables efficient detection and response to the most critical threats.

NEW QUESTION # 30

A manufacturing company recently experienced a network-down scenario due to malware spread on the management network. The company wants to implement a solution to detect and mitigate a similar threat in the future and protect the overall network. Which solution meets the requirements?

- A. RADIUS
- B. endpoint detection and response
- C. encrypted threat analysis
- D. IPsec VPN

Answer: B

Explanation:
The spread of malware across a sensitive segment like the management network highlights a failure in host- level security and internal visibility. To detect and mitigate the spread of such threats and protect the overall network, Endpoint Detection and Response (EDR) is the most effective choice among the options. In the Cisco security ecosystem, the endpoint is often the last line of defense and the most critical source of telemetry for malware incidents.

By deploying an EDR solution like Cisco Secure Endpoint, the manufacturing company gains the ability to identify the "patient zero" of the infection. EDR uses advanced features like Device Traversal and Lateral Movement detection to see how malware moves from one machine to another over the management network.

Once detected, the security team can use the EDR platform to initiate a "host isolation" command, effectively cutting off the infected device's communication with the rest of the network without physically unplugging it.

While Encrypted Threat Analytics (ETA)(Option C) is a powerful network-based feature for detecting malware in encrypted traffic without decryption, EDR provides the most granular control and response capabilities specifically for malware residing on and spreading between hosts. RADIUS (Option B) and IPsec VPNs (Option D) focus on access control and encryption of data in transit, respectively, but do not provide the behavioral analysis needed to stop a running malware outbreak once the network has already been accessed.

NEW QUESTION # 31

Which generative AI impact is addressed by a human-in-the-loop design policy?

- A. deep fakes
- B. phishing
- C. AI hallucinations
- D. scale changes

Answer: C

Explanation:
A human-in-the-loop design policy ensures that humans validate or oversee AI-generated outputs, reducing the risk of AI hallucinations (false or misleading information generated by AI).
This provides accountability and accuracy in generative AI use.

NEW QUESTION # 32

After a recent security breach, a financial company is reassessing their overall security posture and strategy to better protect sensitive data and resources. The company already deployed on-premises next-generation firewalls at the network edge for each branch location. Security measures must be enhanced at the endpoint level. The goal is to implement a solution that provides additional traffic filtering directly on endpoint devices, thereby offering another layer of defense against potential threats. Which technology must be implemented to meet the requirement?

- A. traditional firewall
- B. web application firewall

- C. host-based firewall
- D. distributed firewall

Answer: C

Explanation:
When moving security closer to the data, the endpoint becomes the final perimeter. A host-based firewall is a software component that runs directly on the endpoint's operating system (Windows, macOS, or Linux).
While the company already has Next-Generation Firewalls (NGFWs) at the network edge, those devices cannot protect endpoints from threats originating within the same local network segment (East-West traffic) or when the device is used outside the corporate office.
Implementing a host-based firewall provides a critical layer of defense-in-depth. It allows security administrators to enforce strict inbound and outbound traffic rules based on applications and services specific to that device. For example, it can prevent a compromised laptop from scanning other devices on a public Wi-Fi network. In the Cisco ecosystem, this is often achieved through the Cisco Secure Client (AnyConnect) using the Network Visibility Module (NVM) or integrated endpoint security suites.
While a Distributed Firewall (Option C) is used for micro-segmentation within data centers/clouds and a Web Application Firewall (WAF) (Option B) protects servers from web-based attacks, only a host-based firewall meets the requirement for traffic filtering directly on the diverse array of endpoint devices. This approach ensures that even if the network edge is bypassed, the individual host remains hardened against lateral movement and unauthorized communication.

NEW QUESTION # 33
A financial company is focused on proactively protecting sensitive data stored on the devices.
The company recognizes the potential risks associated with lost or stolen devices and they want a solution to ensure that if unauthorized user access the device, the data it contains is not accessible or misused. The solution includes implementing a strategy that renders data unreadable without user authentication. Which solution meets the requirement?

- A. Apply GPS tracking.
- B. Install Kensington Lock.
- C. Use a BIOS password.
- D. Implement data encryption on disk.

Answer: D

Explanation:
Disk encryption ensures that data stored on devices is unreadable without proper authentication.
If a device is lost or stolen, unauthorized users cannot access or misuse the data, since encryption protects the contents until the legitimate user provides credentials.

NEW QUESTION # 34
......

Career grooming with 300-745 exams are your right. Rather, it has become necessary in the most challenging scenario of enterprises. Like most of the professionals, you might find it tough and beyond your limits. Here comes the role of DumpsMaterials 300-745 Dumps to encourage you and make it possible for you to step ahead with confidence. The growing network of our clientele proves that our dumps work wonders and help you gain a definite success in your 300-745 certification exams.

300-745 Valid Test Topics: https://www.dumpsmaterials.com/300-745-real-torrent.html

We have three versions of 300-745 exam questions by modernizing innovation mechanisms and fostering a strong pool of professionals, DumpsMaterials is a reliable platform to provide candidates with effective 300-745 study braindumps that have been praised by all users, They will offer you the best help with our 300-745 questions & answers, Cisco Valid 300-745 Exam Papers The good reputation inspires us to do better, which is the ultimate objections of us.

With the Cisco 300-745 exam training of DumpsMaterials, the door of the dream will open for you, Planning and Setting Up Configuration Management, We have three versions of 300-745 Exam Questions by modernizing innovation mechanisms and fostering a strong pool of professionals.

300-745 Questions [2026] - Cisco 300-745 Exam Dumps

DumpsMaterials is a reliable platform to provide candidates with effective 300-745 study braindumps that have been praised by all users, They will offer you the best help with our 300-745 questions & answers.

The good reputation inspires us to do better, which is the ultimate objections 300-745 of us, You can mark the important knowledge points on your paper, which is a very effective way to understand the difficult points.
