

Exam AZ-120 Voucher & AZ-120 Dumps Reviews

BONUS!!! Download part of Exam4Tests AZ-120 dumps for free: https://drive.google.com/open?id=1A1xUgJ_R-o23ybfOBYFI0pBYIwxwDKpox

Experts at Exam4Tests have also prepared Microsoft AZ-120 practice exam software for your self-assessment. This is especially handy for preparation and revision. You will be provided with an examination environment and you will be presented with actual AZ-120 Exam Questions. This sort of preparation method enhances your knowledge which is crucial to excelling in the actual Microsoft AZ-120 certification exam.

Whether you are at home or out of home, you can study our AZ-120 test torrent. You don't have to worry about time since you have other things to do, because under the guidance of our AZ-120 study tool, you only need about 20 to 30 hours to prepare for the exam. You can use our AZ-120 exam materials to study independently. Then our system will give you an assessment based on your actions. You can understand your weaknesses and exercise key contents. You don't need to spend much time on it every day and will pass the exam and eventually get your certificate. AZ-120 Certification can be an important tag for your job interview and you will have more competitiveness advantages than others.

AZ-120 Dumps Reviews & Free AZ-120 Brain Dumps

For candidates who are going to buy AZ-120 exam dumps online, they may pay more attention to the website safety. We will offer you a clean and safe online shopping environment if you buy AZ-120 training materials from us. In addition, we offer you free demo for you to have a try before buying, so that you can know what the complete version is like. We have online and offline chat service stuff, and they possess the professional knowledge for AZ-120 Exam Brindumps, if you have any questions, you can consult us.

Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q15-Q20):

NEW QUESTION # 15

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure AD Connect is required to sign into Linux virtual machines hosted in Azure.	<input type="radio"/>	<input type="radio"/>
An SAP application server that runs on a Linux virtual machine in Azure must be joined to Active Directory.	<input type="radio"/>	<input type="radio"/>
Before you can sign into an SAP application server that runs on a Linux virtual machine in Azure, you must create a Managed Service Identity (MSI).	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
Azure AD Connect is required to sign into Linux virtual machines hosted in Azure.	<input type="radio"/>	<input checked="" type="radio"/>
An SAP application server that runs on a Linux virtual machine in Azure must be joined to Active Directory.	<input type="radio"/>	<input checked="" type="radio"/>
Before you can sign into an SAP application server that runs on a Linux virtual machine in Azure, you must create a Managed Service Identity (MSI).	<input type="radio"/>	<input checked="" type="radio"/>

Explanation

Box 1: No

To log in to a Linux VM with Azure AD credentials, install the Azure Active Directory login VM extension.

Note: Azure AD Connect is the Microsoft tool designed to meet and accomplish your hybrid identity goals.

Box 2: NO

Box 3: No

NEW QUESTION # 16

You are planning the Azure network infrastructure for an SAP environment.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can segregate the SAP application layer and the DBMS layer into different virtual networks that are peered by using Global Vnet peering.	<input type="radio"/>	<input type="radio"/>
You can segregate the SAP application layer and the DBMS layer into different subnets in the same virtual network.	<input type="radio"/>	<input type="radio"/>
If you segregate the SAP application layer and the DBMS layer into different peered virtual networks, you will incur costs for the data transferred between the virtual networks.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
You can segregate the SAP application layer and the DBMS layer into different virtual networks that are peered by using Global Vnet peering.	<input type="radio"/>	<input checked="" type="radio"/>
You can segregate the SAP application layer and the DBMS layer into different subnets in the same virtual network.	<input checked="" type="radio"/>	<input type="radio"/>
If you segregate the SAP application layer and the DBMS layer into different peered virtual networks, you will incur costs for the data transferred between the virtual networks.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 17

Your on-premises network contains an Active Directory domain.

You are deploying a new SAP environment on Azure.

You need to configure SAP Single Sign-On to ensure that users can authenticate to SAP GUI and SAP WebGUI.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Deploy Azure Active Directory Domain Services (Azure AD DS) and sync back to Active Directory.
- Create an Azure Key Vault service endpoint.
- Configure secure network communication (SNC) by using SNCWIZARD.
- Change and deploy the logon file.
- Change the user profiles for secure network communication (SNC.)

Answer Area

Answer:

Explanation:

Answer Area

- Change the user profiles for secure network communication(SNC)
- Depoly Azure Active directory domain service (Azure AD AS)
- Configure secure network commenuction...
- Change and deploy the logon file.

- 1 - Change the user profiles for secure network communication(SNC)
- 2 - Depoly Azure Active directory domain service (Azure AD AS)
- 3 - Configure secure network commenuction...
- 4 - Change and deploy the logon file.

NEW QUESTION # 18

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
After the migration, all user authentication to the SAP applications must be handled by Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
The migration requires that the on-premises Active Directory domain syncs to Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
After the migration users will be able to authenticate to the SAP applications by using their existing credentials in litware.com.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
After the migration, all user authentication to the SAP applications must be handled by Azure Active Directory (Azure AD).	<input checked="" type="radio"/>	<input type="radio"/>
The migration requires that the on-premises Active Directory domain syncs to Azure Active Directory (Azure AD).	<input checked="" type="radio"/>	<input type="radio"/>
After the migration users will be able to authenticate to the SAP applications by using their existing credentials in litware.com.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Statements	Yes	No
After the migration, all user authentication to the SAP applications must be handled by Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
The migration requires that the on-premises Active Directory domain syncs to Azure Active Directory (Azure AD).	<input type="radio"/>	<input type="radio"/>
After the migration users will be able to authenticate to the SAP applications by using their existing credentials in litware.com.	<input type="radio"/>	<input type="radio"/>

In a Hybrid-IT scenario, Active Directory from on-premises can be extended to serve as the authentication mechanism through an Azure deployed domain controller (as well as potentially using the integrated DNS).

It is important to distinguish between traditional Active Directory Servers and Microsoft Azure Active Directory that provides only a subset of the traditional on-premises AD offering. This subset include Identity and Access Management, but does not have the full AD schema or services that many 3rd party application take advantage of. While Azure Active Directory IS a requirement to establish authentication for the Azure virtual machines in use, and it can synchronize users with customers' on-premises AD, the two are explicitly different and customers will likely continue to require full Active Directory servers deployed in Microsoft Azure.

NEW QUESTION # 19

You have an SAP production landscape on Azure that contains the virtual machines shown in the following table.

Name	Subnet	Network security group (NSG)	Route table
VM1	Subnet1	VM1-NSG	None
VM2	Subnet1	VM2-NSG	None

VM1 cannot connect to an employee self-service application hosted on VM2.

You need to identify what is causing the issue.

Which two options in Azure Network Watcher should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

- A. Network Performance Monitor
- **B. Connection troubleshoot**
- **C. IP flow verify**
- D. Connection monitor

Answer: B,C

NEW QUESTION # 20

.....

Exam4Tests AZ-120 study torrent is popular in IT candidates, why does this AZ-120 training material has attracted so many pros? Now, if you receive AZ-120 prep torrent, you will be surprised by available, affordable, updated and best valid Microsoft AZ-120 Download Pdf dumps. After using the AZ-120 latest test collection, you will never be fair about the AZ-120 actual test. The knowledge you get from AZ-120 dumps cram can bring you 100% pass.
