## Salesforce AP-219 Test Preparation, New APP AP-219 Simulations

Before the clients decide to buy our AP-219 test guide they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our AP-219 study question, the quantity of the questions and the answers. Secondly you could look at the free demos of our AP-219 learning prep to see if the questions and the answers are valuable. And our pass rate of AP-219 exam questions is more than 98%.

### Salesforce Order Management Administrator Accredited Professional Sample Questions (Q49-Q54):

#### NEW QUESTION # 49

What type of relationship exists between FulfillmentOrder and Order Delivery Method?

- A. One-to-One Lookup (Location) FulfillmentFrom LocationId
- B. Junction (Many to Many)
- C. Lookup (Order Delivery Method)
- D. Master-Detail (Order Delivery Method)

**Answer: C**

Explanation:

The type of relationship that exists between FulfillmentOrder and Order Delivery Method is Lookup (OrderDelivery Method). A Lookup field is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. In this case, a FulfillmentOrder has a Lookup field named Order Delivery Method that references an Order Delivery Method record. An Order Delivery Method is a record that represents a delivery option for fulfilling orders, such as standard shipping, express shipping, in-store pickup, etc. An Order Delivery Method can have many FulfillmentOrders associated with it, but a FulfillmentOrder can only have one Order Delivery Method. Verified Reference: [https://help.salesforce.com/s/articleView?id=sf.custom\\_field\\_types.htm&type=5https://help.salesforce.com/s/articleView?id=sf.order\\_management\\_order\\_delivery\\_method.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.custom_field_types.htm&type=5https://help.salesforce.com/s/articleView?id=sf.order_management_order_delivery_method.htm&type=5)

#### NEW QUESTION # 50

How can a user view the information exchanged between the payment platform and the external payment gateways?

- A. Check for process exceptions associated with the Order Payment Summary
- B. Check associated debug logs in Debug Logs in setup
- C. Navigate to Payments within the setup menu and select the payment platform
- D. Navigate to Payment Gateway Logs related list on the corresponding Order Payment Summary

**Answer: D**

Explanation:

The best way for a user to view the information exchanged between the payment platform and the external payment gateways is to navigate to Payment Gateway Logs related list on the corresponding Order Payment Summary. A Payment Gateway Log is a record that captures the request and response messages between the payment platform and the external payment gateways, such as Stripe, PayPal, etc. A PaymentGateway Log has a lookup relationship to the Order Payment Summary object, which represents a payment made for an order or part of an order. A user can use the Payment Gateway Logs related list on the Order Payment Summary page to view the details of the payment transactions, such as the request and response payloads, status codes, timestamps,

etc. Verified Reference: [https://help.salesforce.com/s/articleView?id=sf.order\\_management\\_payment\\_gateway\\_log.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.order_management_payment_gateway_log.htm&type=5)

#### NEW QUESTION # 51

Which data type is the Status field on an Order Summary object?

- A. Text
- **B. Picklist**
- C. Number
- D. String

**Answer: B**

Explanation:

The Status field on an Order Summary object is a picklist data type. A picklist is a field that allows users to select one value from a predefined list of values. The Status field on an Order Summary object indicates the current state of the order, such as Draft, Activated, Completed, or Cancelled. The values for the Status field are defined in the OrderStatus picklist field on the Order object. Reference: Order Management Objects, [Picklist Fields]

#### NEW QUESTION # 52

A customer applied a 10% off discount when placing an order. What object is created when the discount is applied to the order?

- A. Credit Memo
- B. Order Discount
- **C. Order Adjustment Group Summary**
- D. Order Payment Summary

**Answer: C**

Explanation:

When a customer applies a discount when placing an order, an order adjustment group summary is created. An order adjustment group summary is a record that represents a modification to the order amount, such as a discount, a surcharge, or a tax. An order adjustment group summary can have one or more order adjustments, which are the individual modifications that are applied to the order or the order items. An order can have one or more order adjustment group summaries, depending on how many types of modifications are applied to the order. Reference: Order Management Objects, [Order Adjustments]

#### NEW QUESTION # 53

What does a summary object represent?

- A. A change to an underlying record.
- B. An individual change to financial data
- **C. A dynamic view of underlying data**
- D. A discount to underlying data

**Answer: C**

Explanation:

A summary object represents a dynamic view of underlying data. A summary object is a type of object that aggregates data from related records and displays it in a single record. For example, an Order Summary object represents the financial summary of an order that is received from an external system, such as B2C Commerce or B2B Commerce. An Order Summary object aggregates data from related Order Item Summary records and displays it in fields such as total amount, tax amount, discount amount, etc. Verified Reference: [https://help.salesforce.com/s/articleView?id=sf.order\\_management\\_order\\_summary.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.order_management_order_summary.htm&type=5)
