Our FCP_FSM_AN-7.2 exam questions have a 99% pass rate. What does this mean? As long as you purchase our FCP_FSM_AN-7.2 exam simulating and you are able to persist in your studies, you can basically pass the exam. This passing rate is not what we say out of thin air. This is the value we obtained from analyzing all the users' exam results. It can be said that choosing FCP_FSM_AN-7.2 study engine is your first step to pass the exam. Don't hesitate, just buy our FCP_FSM_AN-7.2 practice engine and you will succeed easily!

Fortinet FCP_FSM_AN-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.

Topic 2	<ul style="list-style-type: none"> • Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.
Topic 3	<ul style="list-style-type: none"> • Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.
Topic 4	<ul style="list-style-type: none"> • Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.

Fortinet FCP_FSM_AN-7.2 Actual Test Pdf - FCP_FSM_AN-7.2 Real Questions

With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our Fortinet experts deem it impossible to drop the FCP_FSM_AN-7.2 exam, if you believe that you have learnt the contents of our FCP_FSM_AN-7.2 study guide and have revised your learning through the FCP_FSM_AN-7.2 Practice Tests. If you still fail to pass the exam, you can take back your money in full without any deduction. Such bold offer is itself evidence on the excellence of our FCP_FSM_AN-7.2 study guide and their indispensability for all those who want success without any second thought.

Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q24-Q29):

NEW QUESTION # 24

How can you query the configuration management database (CMDB) in an analytics search?

- A. Click Attribute > Select from CMDB.
- B. On the Admin tab, click CMDB Search.
- C. Click Value > Select from CMDB.
- D. On the CMDB tab, select an entry, and then click Create Search.

Answer: C

Explanation:

In an analytics search, you can query the CMDB by clicking Value > Select from CMDB, which allows you to choose values directly from CMDB entries for the selected attribute, enabling precise filtering based on asset data.

NEW QUESTION # 25

Refer to the exhibit.

An analyst is trying to generate an incident with a title that includes the Source IP, Destination IP, User, and Destination Host Name. They are unable to add a Destination Host Name as an incident attribute.

What must be changed to allow the analyst to select Destination Host Name as an attribute?

- A. The Destination IP Event Attribute must be removed.
- B. The Destination Host Name must be added as an Event type in the FortiSIEM.
- C. The Destination Host Name must be set as an aggregate item in a subpattern.
- D. The Destination Host Name must be selected as a Triggered Attribute.

Answer: D

Explanation:

For an attribute like Destination Host Name to be used in the incident title, it must first be included in the Triggered Attributes list. Only attributes listed there are available for substitution in the title template (e.g., \$destIpAddr, \$srcIpAddr).

NEW QUESTION # 26

What are two required components of a rule? (Choose two.)

- A. Subpattern
- B. Clear policy
- C. Detection Technology
- D. Exception policy

Answer: A,C

Explanation:

A Subpattern defines the specific conditions or event patterns the rule is designed to detect, and the Detection Technology specifies the type of detection logic (e.g., real-time, historical). Both are essential for a rule to function in FortiSIEM.

NEW QUESTION # 27

Which analytics search can be used to apply a user and entity behavior analytics (UEBA) tag to an event for a failed login by the user JSmith?

- A. User IS jsmith
- B. Username NOT END WITH jsmith
- C. User = smith
- D. Username CONTAIN smit

Answer: A

Explanation:

The correct syntax to match an exact username in FortiSIEM analytics search is User IS jsmith. This ensures that the UEBA tag is applied only when the event is specifically tied to the user "jsmith", which is required for accurate behavioral analytics.

NEW QUESTION # 28

Refer to the exhibit.

The configuration shown in the exhibit is incorrect.

What must you change to allow this configuration to be successfully applied to FortiSIEM?

- A. Run Mode must be set to ML.
- B. The selection in Fields to use for Prediction and Field to Predict must match.
- C. The Train factor must be 70% or greater.
- D. Only one AVG type field must be selected under Fields to use for Prediction.

Answer: A

Explanation:

The Run Mode is set to Local, which is not valid for training machine learning models in FortiSIEM. To apply this configuration correctly, the Run Mode must be set to ML, which enables proper model training and prediction using selected fields.

NEW QUESTION # 29

.....

Our FCP_FSM_AN-7.2 study materials boost three versions and they include the PDF version, PC version and the APP online version. The clients can use any electronic equipment on it. If only the users' equipment can link with the internet they can use their equipment to learn our FCP_FSM_AN-7.2 study materials. They can use their cellphones, laptops and tablet computers to learn
