

JN0-460 Reliable Test Duration & JN0-460 Study Guide Pdf

DOWNLOAD the newest Dumpexams JN0-460 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1U8HPSht7gOVKNYw_Mm7J1aX1udFdDlVnM

We promise during the process of installment and payment of our JN0-460 prep torrent, the security of your computer or cellphone can be guaranteed, which means that you will be not afraid of virus intrusion and personal information leakage. Besides we have the right to protect your email address and not release your details to the 3rd parties.

Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Wired Assurance Fundamentals: This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.
Topic 2	<ul style="list-style-type: none">Campus Fabric Architecture: This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.
Topic 3	<ul style="list-style-type: none">Campus EVPN-VXLAN: This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.
Topic 4	<ul style="list-style-type: none">Wired Assurance Management or Operations: This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.

Topic 5	<ul style="list-style-type: none"> • Wired Assurance Provisioning or Deployment: This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.

JN0-460 exam dumps, Juniper JN0-460 network simulator review

Are you still hesitating about how to choose excellent JN0-460 exam simulations? Our company Dumpexams is engaged in studying valid exam simulation files with high passing rate many years. If you want to find valid JN0-460 exam simulations, our products are helpful for you. Stop hesitating, good choice will avoid making detours in the preparing for the real test. Our JN0-460 Exam Simulations will assist you clear exams and apply for international companies or better jobs with better benefits in the near future. Go and come to us!

Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which two statements are correct about Juniper Mist Dynamic Packet Capture? (Choose two.)

- A. It must be globally configured at the organization level.
- **B. No configuration is necessary for Mist's Dynamic Packet Capture.**
- **C. It is automatically attached to a client event displayed on the Insights page.**
- D. It is automatically attached to the Affected Items list in the Successful Connects SLE.

Answer: B,C

Explanation:

Dynamic Packet Capture (DPC) requires no manual setup.

It is automatically linked to relevant client events on the Insights page, enabling fast root-cause analysis without extra configuration.

NEW QUESTION # 48

What is the device that handles the VXLAN encapsulation and decapsulation referred to as?

- **A. a VTEP**
- B. an LSP
- C. an LSR
- D. a UNI

Answer: A

NEW QUESTION # 49

You have deployed your switches and need to provide a unique hostname on each switch.

Which Mist dashboard option allows you to accomplish this task?

- A. Organization switch template
- **B. Individual switch configuration**
- C. Site switch configuration
- D. Device profiles

Answer: B

Explanation:

In Juniper Mist Cloud, there are multiple configuration scopes:

Organization-level templates apply globally.

Site-level configuration applies across all devices in a site.

Individual switch configuration is used to define unique, device-specific attributes such as hostname, management IP, or local overrides.

"Templates and site-level configuration ensure consistency across devices, while individual switch configuration is used to assign unique values such as hostnames." Option A: Incorrect - org templates define common config, not hostnames.

Option B: Incorrect - site configs are shared across all switches in the site.

Option D: Incorrect - device profiles apply settings like port policies or authentication, not hostnames.

Option C: Correct - individual switch configuration is the correct place to assign hostnames uniquely per device.

NEW QUESTION # 50

What are two limitations of using LLDP for identifying wired clients? (Choose two.)

- A. It is supported by all wired client devices.
- B. It requires LLDP to be configured on network devices.
- C. It only operates between directly connected devices.
- D. It is not scalable to large networks.

Answer: B,C

Explanation:

Link Layer Discovery Protocol (LLDP) is a Layer 2 discovery protocol that allows network devices to advertise identity and capabilities to directly connected neighbors. While LLDP is useful for basic topology discovery, it has two key limitations in Wired Assurance client identification:

"LLDP operates at Layer 2 between directly connected devices and must be explicitly enabled on all participating network elements to provide neighbor information. It cannot discover devices beyond the first physical hop." Option A: Correct - LLDP must be configured and enabled on each network device to function.

Option B: Incorrect - LLDP itself is scalable but limited to direct adjacency.

Option C: Correct - LLDP only works between directly connected devices.

Option D: Incorrect - not all clients support LLDP; however, the question asks for limitations of using LLDP, not lack of support.

NEW QUESTION # 51

What is a primary characteristic of Campus Fabric Architecture?

- A. Reduced scalability
- B. Higher operational costs
- C. Decreased network flexibility
- D. Enhanced network segmentation

Answer: D

NEW QUESTION # 52

.....

Taking these mock exams is important because it tells you where you stand. People who are confident about their knowledge and expertise can take these JN0-460 practice tests and check their scores to know where they lack. This is good practice to be a pro

and clear your Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam with amazing scores. Dumpexams practice tests simulate the real JN0-460 exam questions environment.
