

# Unparalleled Latest DP-700 Exam Preparation | Easy To Study and Pass Exam at first attempt & Trustable Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric

TOPICS	Weightage of Question
• Implement and manage an analytics solution	30-35%
• Ingest and transform data	30-35%
• Monitor and optimize an analytics solution	30-35%

What's more, part of that PracticeVCE DP-700 dumps now are free: <https://drive.google.com/open?id=1WFYnOCngFR2fEEL8tvWlbb7ssjPY0HcO>

PracticeVCE's DP-700 exam training materials is more accurate and easier to understand, more authoritative than other DP-700 exam dumps provided by any other website. After choose PracticeVCE, you won't regret. If you are still worried, you can first try DP-700 Dumps Free demo and answers on probation. After you buy PracticeVCE's DP-700 exam training materials, we guarantee you will pass DP-700 test with 100%.

If you purchasing our DP-700 simulating questions, you will get a comfortable package services afforded by our considerate after-sales services. We respect your needs toward the useful DP-700practice materials by recommending our DP-700 Guide preparations for you. And we give you kind and professional supports by 24/7, as long as you can have problems on our DP-700 study guide, then you can contact with us.

## Top Latest DP-700 Exam Preparation 100% Pass | Pass-Sure Trusted DP-700 Exam Resource: Implementing Data Engineering Solutions Using Microsoft Fabric

The Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) exam questions can help you gain the high-in-demand skills and credentials you need to pursue a rewarding career. To do this you just need to pass the Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) certification exam which is not easy to crack. You have to put in some extra effort, and time and prepare thoroughly to pass the Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) exam. For the quick, complete, and comprehensive Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) exam dumps preparation you can get help from top-notch and easy-to-use DP-700 Questions.

### Microsoft DP-700 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li> </ul>

## Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q75-Q80):

### NEW QUESTION # 75

You are implementing a medallion architecture in a Fabric lakehouse.

You plan to create a dimension table that will contain the following columns:

- \* ID
- \* CustomerCode
- \* CustomerName
- \* CustomerAddress
- \* CustomerLocation
- \* ValidFrom
- \* ValidTo

You need to ensure that the table supports the analysis of historical sales data by customer location at the time of each sale. Which type of slowly changing dimension (SCD) should you use?

- A. Type 3
- B. Type 0
- C. Type 1
- D. Type 2

**Answer: D**

### NEW QUESTION # 76

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike\_Location in a KQL database. The table contains the following columns:

BikepointID  
Street  
Neighbourhood  
No\_Bikes  
No\_Empty\_Docks  
Timestamp

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No\_Bikes is at least 15. The results must be ordered by No\_Bikes in ascending order.

Solution: You use the following code segment:

Does this meet the goal?

- A. no
- B. Yes

**Answer: A**

Explanation:

This code does not meet the goal because it uses order by, which is not valid in KQL. The correct term in KQL is sort by.

Correct code should look like:

□

#### NEW QUESTION # 77

You have a Fabric workspace.

You are debugging a statement and discover the following issues:

You need to resolve the issues. The solution must ensure that the data types of the results are retained. The results can contain blank cells.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

□

#### NEW QUESTION # 78

You have a Fabric workspace that contains a warehouse named DW1. DW1 is loaded by using a notebook named Notebook1.

You need to identify which version of Delta was used when Notebook1 was executed.

What should you use?

- A. the Admin monitoring workspace
- B. the Microsoft Fabric Capacity Metrics app
- C. OneLake data hub
- D. Fabric Monitor
- E. Real-Time hub

**Answer: A**

Explanation:

To identify the version of Delta used when Notebook1 was executed, you should use the Admin monitoring workspace. The Admin monitoring workspace allows you to track and monitor detailed information about the execution of notebooks and jobs, including the underlying versions of Delta or other technologies used. It provides insights into execution details, including versions and configurations used during job runs, making it the most appropriate choice for identifying the Delta version used during the execution of Notebook1.

#### NEW QUESTION # 79

Exhibit.

□

You have a Fabric workspace that contains a write-intensive warehouse named DW1. DW1 stores staging tables that are used to load a dimensional model. The tables are often read once, dropped, and then recreated to process new data.

You need to minimize the load time of DW1.

What should you do?

- A. Drop statistics.
- B. Create statistics.
- C. Disable V-Order.
- D. Enable V-O-der.

**Answer: D**
