

New 1Z0-1061-26 Test Simulator, 1Z0-1061-26 Preparation

Related study materials proved that to pass the Oracle 1Z0-1061-26 exam certification is very difficult. But do not be afraid, TestPDF have many IT experts who have plentiful experience. After years of hard work they have created the most advanced Oracle 1Z0-1061-26 Exam Training materials. TestPDF have the best resource provided for you to pass the exam. Does not require much effort, you can get a high score. Choose the TestPDF's Oracle 1Z0-1061-26 exam training materials for your exam is very helpful.

Oracle 1Z0-1061-26 Exam Syllabus Topics:

Section	Objectives
Topic 1: Sales Processes and Automation	- Territory and forecasting • 1. Forecasting setup and usage • 2. Territory management configuration - Lead and opportunity management • 1. Lead lifecycle configuration • 2. Opportunity pipeline setup
Topic 2: Oracle CX Sales Foundations	- Sales Cloud architecture and core concepts • 1. Roles and security model basics • 2. CX Sales data model overview - Implementation methodology • 1. Business requirements mapping • 2. Configuration lifecycle overview
Topic 3: Reporting, Analytics, and Security	- Analytics and reporting • 1. Standard reports and dashboards • 2. CX Sales analytics configuration - Security and access control • 1. Data visibility and sharing rules • 2. Role-based access control

Topic 4: Application Configuration	- Sales application setup • 1. Common setup and personalization • 2. User and role configuration - Data and object configuration • 1. Fields, layouts, and page customization • 2. Standard and custom objects
Topic 5: Integration and Extension	- Extensibility • 1. Application Composer usage • 2. Groovy/Business rules concepts - Integration concepts • 1. Data import/export mechanisms • 2. REST/SOAP API usage overview

1Z0-1061-26 Preparation & 1Z0-1061-26 Training Questions

Many companies have been lost through negligence of service on our 1Z0-1061-26 study quiz. Some useless products may bring about an adverse effect, so choose our 1Z0-1061-26 practice engine is 100 percent secure for their profession and usefulness and also our considerate after-sales services. We have built effective serviceability aids in the early resolution of customer-reported problems, which then may result in higher customer satisfaction and improved warm support of 1Z0-1061-26 Exam Guide.

Oracle CX Sales 2026 Implementation Professional Sample Questions (Q301-Q306):

NEW QUESTION # 301

In Oracle Profitability and Cost Management Cloud Service, when integrating with other applications, which of the following is the best practice for mapping dimensions to systems that have an out-of-the-box integration available?

- A. Re-create the dimensions in the target system and map them to the source system.
- B. Ignore the out-of-the-box integration and proceed with custom integration.
- C. Map the dimensions manually using custom scripts.
- D. Map the dimensions using the out-of-the-box integration without any modifications.

Answer: D

Explanation:

Option 1: This is the correct answer because when integrating with another system using an out-of-the-box integration available, it is important to utilize it for efficiency and accuracy. Re-creating the dimensions in the target system would lead to extra time and effort spent on the integration and could introduce the possibility of data inconsistencies. Option 2: This is an incorrect answer because re-creating the dimensions in the target system would require extra time and effort spent on the integration. Additionally, there is a risk of introducing data inconsistencies. Option 3: This is an incorrect answer because mapping the dimensions manually using custom scripts can lead to errors and inconsistencies. It is recommended to use the out-of-the-box integration available. Option 4: This is an incorrect answer because ignoring the out-of-the-box integration and proceeding with custom integration would lead to extra time and effort spent on the integration, as well as an increased risk of data inconsistencies.

NEW QUESTION # 302

Which of the following statements accurately describes the role of allocation rules in Oracle Profitability and Cost Management Cloud Service and their impact on financial performance analysis?

- A. Allocation rules allow administrators to define various allocation methods to assign indirect costs to various activities,

departments, products and customers to help manage profitability analysis.

- B. Allocation rules only work with direct costs. They cannot be used to allocate indirect costs. This means that they are not useful for accurate financial performance analysis.
- C. All allocation methods in Oracle Profitability and Cost Management Cloud Service use the same process, regardless of the complexity of the allocation logic. This maintains consistency in financial performance analysis.
- D. Users must manually define every allocation rule, which can lead to incorrect financial performance analysis due to human error.

Answer: A

Explanation:

Option 1: Allocation rules are an important part of Oracle Profitability and Cost Management Cloud Service allowing users to allocate indirect costs to various activities, departments, products and customers accurately. By defining allocation rules, administrators set up the allocation methods (e.g., step-down, top-down, direct, and reciprocal approaches) to calculate the costs of a service or process and assign them to other entities. In this way, financial analysts can measure the profitability or cost-effectiveness of their operations accurately. Therefore, option This is correct. Option 2: This statement is inaccurate because the logic complexity of each allocation model in Oracle Profitability and Cost Management Cloud Service is different, depending on the needs of the organization. Moreover, administrators are free to choose different allocation methods to fulfill their requirements. Hence, option This is incorrect. Option 3: This statement is incorrect because Oracle Profitability and Cost Management Cloud Service allows administrators to import allocation rules or create them manually using the application's interface. Importing allocation rules minimizes the potential for human errors by using databases that precisely define the allocation models. Additionally, the user interface has many built-in checks to ensure that the user cannot define allocation rules wrongly. Therefore, option This is incorrect. Option 4: This statement is incorrect because Oracle Profitability and Cost Management Cloud Service can use allocation rules to allocate both direct and indirect costs. As a result, allocation rules are a valuable tool in precisely assessing financial performance. Therefore, option This is incorrect.

NEW QUESTION # 303

In Profitability and Cost Management Cloud Service, which feature allows you to dynamically allocate costs based on activity drivers?

- **A. Activity driver-based allocation**
- B. Expense driver-based allocation
- C. Cost driver-based allocation
- D. Data-driven allocation

Answer: A

Explanation:

Option 1: Incorrect. Expense driver-based allocation is not the feature that allows for dynamic cost allocation based on activity drivers. Option 2: Incorrect. Cost driver-based allocation is not the feature that allows for dynamic cost allocation based on activity drivers. Option 3: Incorrect. Data-driven allocation is not the feature that allows for dynamic cost allocation based on activity drivers. Option 4: Correct. Activity driver-based allocation is the feature in Profitability and Cost Management Cloud Service that allows for dynamic cost allocation based on activity drivers.

NEW QUESTION # 304

Which option is the best way to manage data and metadata in Oracle Profitability and Cost Management Cloud Service?

- A. Use Calc Manager to automate data calculations
- **B. Use Data Management to load and manage data from external sources**
- C. Use Financial Reporting Studio to create reports
- D. Use Smart View to manually enter and manage data

Answer: B

Explanation:

Option 1: Correct. Using Data Management allows for efficient loading and management of data from external sources, ensuring data integrity and accuracy. Option 2: Incorrect. While Smart View can be used to manually enter and manage data, it is not the best option for managing large amounts of data or maintaining data integrity. Option 3: Incorrect. Calc Manager is used to automate data calculations, but it is not the best option for managing data and metadata. Option 4: Incorrect. Financial Reporting Studio is used to

create reports, but it is not the best option for managing data and metadata.

NEW QUESTION # 305

Which feature in Oracle Profitability and Cost Management Cloud Service allows you to allocate overhead costs to different business units?

- A. Direct Costing
- B. Transfer Pricing
- **C. Profitability Manager**
- D. Expense Planning

Answer: C

Explanation:

Option 1: Incorrect. Expense Planning is a feature that allows you to plan and manage expenses, not specifically allocate overhead costs to different business units. Option 2: Incorrect. Transfer Pricing is a feature that allows you to define and manage transfer pricing rules, not specifically allocate overhead costs to different business units. Option 3: Correct. Profitability Manager is a feature in Oracle Profitability and Cost Management Cloud Service that allows you to allocate overhead costs to different business units. It provides a flexible and configure able frame work to define cost, revenue, and allocation rules. Option 4: Incorrect. Direct Costing is a feature that allows you to track and allocate direct costs, not specifically allocate overhead costs to different business units.

NEW QUESTION # 306

.....

This kind of polished approach is beneficial for a commendable grade in the Oracle CX Sales 2026 Implementation Professional (1Z0-1061-26) exam. While attempting the exam, take heed of the clock ticking, so that you manage the Oracle CX Sales 2026 Implementation Professional (1Z0-1061-26) questions in a time-efficient way. Even if you are completely sure of the correct answer to a question, first eliminate the incorrect ones, so that you may prevent blunders due to human error.
