2026 New 156-315.81 Exam Practice | Accurate 100% Free Relevant 156-315.81 Questions

If you have the certification, it will be very easy for you to achieve your dream. But it is not an easy thing for many candidates to pass the 156-315.81 exam. By chance, our company can help you solve the problem and get your certification, because our company has compiled the 156-315.81 question torrent that not only have high quality but also have high pass rate. We believe that our 156-315.81 exam questions will help you get the certification in the shortest. So hurry to buy our 156-315.81 exam torrent, you will like our products.

Where can I find good help with CheckPoint 156-315.81 preparation?

If you're looking for a way to get your CheckPoint 156-315.81 certification, then you've come to the right place! We offer a free CheckPoint 156-315.81 Practice Test that lets you practice your exam answers with no risk of getting scammed.

Our practice exams are designed to closely mirror the real CheckPoint 156-315.81 Exam, so you can pass it easily and quickly. You can even take our practice test as many times as you need until you get 100% perfect score on your first try. We provide the best quality **Checkpoint 156-315 Dumps**.

Checkpoint Check Point Certified Security Expert R81 Sample Questions (Q236-Q241):

NEW QUESTION # 236

What API command below creates a new host with the name "New Host" and IP address of "192.168.0.10"?

- A. new host name "New Host" ip-address "192.168.0.10"
- B. create host name "New Host" ip-address "192.168.0.10"
- C. set host name "New Host" ip-address "192.168.0.10"
- **D. add host name "New Host" ip-address "192.168.0.10"**

Answer: D

Explanation:

The API command to create a new host with the name "New Host" and IP address "192.168.0.10" is:

A screenshot of a terminal window with a dark background. The terminal shows the command 'add host name "New Host" ip-address "192.168.0.10"' in green text. Above the command, the text 'csharp' is visible. In the top right corner, there is a 'Copy code' button. A watermark 'mpkiller.co' is visible across the terminal. At the bottom right, there is a small logo and the text 'SOFTWARE TECHNOLOGIES LTD.'

```
csharp  
add host name "New Host" ip-address "192.168.0.10"
```

This command adds a host object with the specified name and IP address to the Check Point configuration.

NEW QUESTION # 237

Check Point APIs allow system engineers and developers to make changes to their organization's security policy with CLI tools and Web Services for all the following except:

- A. Create products that use and enhance 3rd party solutions
- **B. Create new dashboards to manage 3rd party task**
- C. Execute automated scripts to perform common tasks
- D. Create products that use and enhance the Check Point Solution

Answer: B

Explanation:

Check Point APIs let system administrators and developers make changes to the security policy with CLI tools and web-services.

You can use an API to:

- * Use an automated script to perform common tasks
- * Integrate Check Point products with 3rd party solutions
- * Create products that use and enhance the Check Point solution

NEW QUESTION # 238

The Firewall kernel is replicated multiple times, therefore:

- A. The Firewall kernel only touches the packet if the connection is accelerated
- B. The Firewall kernel is replicated only with new connections and deletes itself once the connection times out
- **C. The Firewall can run the same policy on all cores.**
- D. The Firewall can run different policies per core

Answer: C

Explanation:

On a Security Gateway with CoreXL enabled, the Firewall kernel is replicated multiple times. Each replicated copy, or instance, runs on one processing core. These instances handle traffic concurrently, and each instance is a complete and independent inspection kernel. When CoreXL is enabled, all the kernel instances in the Security Gateway process traffic through the same interfaces and apply the same security policy.

NEW QUESTION # 239

Alice & Bob are going to deploy Management Data Plane Separation (MDPS) for all their Check Point Security

Gateway(s)/Cluster(s). Which of the following statement is true?

- A. Each network environment is dependent and includes interfaces, routes, sockets, and processes
- B. Data Plane - To access, provision and monitor the Security Gateway
- **C. Management Plane - To access, provision and monitor the Security Gateway**
- D. Management Plane - for all other network traffic and processing

Answer: C

Explanation:

Management Data Plane Separation (MDPS) is a feature that allows the separation of the management plane and the data plane on a Security Gateway or a cluster. The management plane is responsible for accessing, provisioning and monitoring the Security Gateway, while the data plane is responsible for all other network traffic and processing. Each network environment is independent and includes interfaces, routes, sockets, and processes. References: Check Point R81 Administration Guide

NEW QUESTION # 240

In ClusterXL Load Sharing Multicast Mode:

- A. only the secondary member receives packets sent to the cluster IP address
- **B. every member of the cluster received all of the packets sent to the cluster IP address**
- C. only the primary member received packets sent to the cluster IP address
- D. packets sent to the cluster IP address are distributed equally between all members of the cluster

Answer: B
