PEGACPSSA23V1 exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our PEGACPSSA23V1 latest question is absolutely good choices for you

Pegasystems Certified Pega Senior System Architect 23 Sample Questions (Q30-Q35):

NEW QUESTION # 30
Which three types of information can represent an attribute in attribute-based access control (ABAC)' (Choose Three)

- A. Boolean
- B. Property
- C. List of strings
- D. Numerical value
- E. Single string

Answer: C,D,E

Explanation:
In attribute-based access control (ABAC), an attribute can be a property (such as an age or status), a Boolean value (indicating true or false conditions), or a single string (such as a name or identifier). These attributes are evaluated to determine access rights within the application. References: Pega Platform Help - ABAC.

NEW QUESTION # 31
What are the two most common ways to expose your application to an external system? (Choose Two)

- A. Configure a signed certificate.
- B. Create a web service with the Service wizard.
- C. Leverage the Pega API.
- D. Create a connector linked to a data page.

Answer: B,C

Explanation:
The two most common ways to expose your application to an external system are to leverage the Pega API (B) and to create a web service with the Service wizard (D). The Pega API provides a set of out-of-the-box RESTful endpoints for performing operations within the Pega Platform. The Service wizard simplifies the creation of SOAP or REST services, enabling external systems to interact with Pega applications. Reference: Pega Community documentation on Pega API and Service wizard.

NEW QUESTION # 32
Which two statements about keyed data pages are true? (Choose Two)

- A. A keyed data page can have multiple keys.
- B. A keyed data page can use a report definition.
- C. A keyed data page can return multiple embedded pages.
- D. A keyed data page is required for all data pages.

Answer: A,C

Explanation:
Keyed data pages can return multiple embedded pages if the data structure includes lists or other page structures. They can also have multiple keys, which allows them to return data based on a combination of key values. Reference: Pega Platform Help - Data Pages.

NEW QUESTION # 33
A hospital uses a case type to manage the treatment of patients visiting the Emergency Room (ER). Cases are created when the patient checks in at the registration desk, and are resolved when the patient is released from the hospital. Stakeholders identify the following security requirements for the case type.
Patients access cases on a read-only basis.
Patients can only access their own cases.
Doctors and nurses can modify cases throughout the case life cycle.
Only doctors are allowed to write prescriptions.
Which configuration allows doctors and nurses to modify cases while complying with all identified security requirements?

- A. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 1.
- B. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 5.
- C. Create a single access role for both doctors and nurses, and set the modify action to 5.
- D. Create a single access role for both doctors and nurses, and set the modify action to 1.

Answer: C

Explanation:
To allow both doctors and nurses to modify cases while complying with the identified security requirements, the best approach is to create a single access role for both doctors and nurses (C) and set the modify action to
5. This configuration grants both user groups the necessary permissions to modify cases throughout the case life cycle. By using a single access role with a high level of access for modifications, the application simplifies role management while ensuring that both doctors and nurses can perform their duties effectively, without compromising the security and integrity of patient cases.References: Pega Community documentation on Access Role to Object and case management best practices.

NEW QUESTION # 34
You should consider using a field value when the list of allowed values is

- A. shared across all case types
- B. mostly static
- C. specific to one case type
- D. three or fewer items

Answer: B

Explanation:
You should consider using a field value when the list of allowed values is mostly static. Field values are best used for properties with values that do not change often and need to be reused throughout the application.
References: Pega official documentation on field values.

NEW QUESTION # 35
......

You can trust DumpsTorrent PEGACPSSA23V1 exam questions and start this journey with complete peace of mind and satisfaction.
