一流的312-50v13證照信息和有效的ECCouncil認證培訓-實用的ECCouncil Certified Ethical Hacker Exam (CEHv13)

P.S. Testpdf在Google Drive上分享了免費的、最新的312-50v13考試題庫：https://drive.google.com/open?id=1aGiZxm4igcIEGWTCJuaf4Gf4nxyFtZZM

你是其中之一嗎，你是否還在擔心和困惑的各種材料和花哨的培訓課程考試嗎？Testpdf是你正確的選擇，因為我們可以為你提供全面的考試資料，包括問題及答案，也是最精確的解釋，所有這些將幫助你掌握更好的知識，我們有信心你將通過Testpdf的ECCouncil的312-50v13考試認證，這也是我們對所有客戶提供的保障。

Testpdf ECCouncil的312-50v13的考題資料物美價廉，我們用超低的價格和高品質的擬真試題和答案來奉獻給廣大考生，真心的希望你能順利的通過考試，為你提供便捷的線上服務，為你解決任何有關ECCouncil的312-50v13考試題的疑問。

>> 312-50v13證照信息 <<

使用高質量的考試312-50v13證照信息準備您的ECCouncil 312-50v13考試，當然通過

突然發現，很多人對自己未來的所有計劃都有同一個開頭——等我有了錢……但是，IT認證考試不能等。如果你覺得購買 ECCouncil 的 312-50v13 考試培訓資料利用它來準備考試是一場冒險，那麼整個生命就是一場冒險，走得最遠的人常常就是願意去做願意去冒險的人。而 Testpdf 的 312-50v13 考資料根據最新的考試動態變化而更新，會在第一時間更新 312-50v13 題庫。

最新的 CEH v13 312-50v13 免費考試真題 (Q594-Q599):

問題 #594
While performing a security audit of a web application, an ethical hacker discovers a potential vulnerability.
The application responds to logically incorrect queries with detailed error messages that divulge the underlying database's structure.
The ethical hacker decides to exploit this vulnerability further. Which type of SQL Injection attack is the ethical hacker likely to use?

- A. UNION SQL Injection
- B. In-band SQL Injection
- C. Error-based SOL Injection
- D. Blind/inferential SQL Injection

答案：C

解題說明：
Error-based SQL Injection is a type of in-band SQL Injection attack that relies on error messages thrown by the database server to obtain information about the structure of the database. In some cases, error-based SQL injection alone is enough for an attacker to

enumerate an entire database.
The ethical hacker is likely to use this type of SQL Injection attack because the application responds to logically incorrect queries with detailed error messages that divulge the underlying database's structure. This means that the attacker can craft malicious SQL queries that trigger errors and reveal information such as table names, column names, data types, etc. The attacker can then use this information to construct more complex queries that extract data from the database.
For example, if the application uses the following query to display the username of a user based on the user ID:
SELECT username FROM users WHERE id = '$id'
The attacker can inject a single quote at the end of the user ID parameter to cause a syntax error:
SELECT username FROM users WHERE id = '1'
The application might display an error message like this:
You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near "1" at line 1 This error message reveals that the database server is MySQL and that the user ID parameter is enclosed in single quotes. The attacker can then use other techniques such as UNION, subqueries, or conditional statements to manipulate the query and retrieve data from other tables or columns.

問題 #595
What does the following command in netcat do?
nc -l -u -p 55555 < /etc/passwd

- A. Grabs the /etc/passwd file when connected to UDP port 55555
- B. Logs the incoming connections to /etc/passwd file
- C. Deletes the /etc/passwd file when connected to the UDP port 55555
- D. Loads the /etc/passwd file to the UDP port 55555

答案：D

解題說明：
Command Breakdown:
* nc: Netcat utility
* -l: Listen mode
* -u: Use UDP protocol
* -p 55555: Listen on port 55555
* < /etc/passwd: Redirects the contents of /etc/passwd into the socket
This means that when a connection is made to UDP port 55555, the contents of /etc/passwd will be sent to the connecting host.
From CEH v13 Courseware:
* Module 8: Sniffing & Network Communication Tools
CEH v13 Study Guide states:
"Netcat can be used to serve files, open shells, or transfer data. Using input redirection, it can stream file contents to anyone who connects." Incorrect Options:
* A: Does not log; it outputs /etc/passwd
* C: The opposite; it serves the file, doesn't grab it
* D: Netcat does not delete files with this syntax

問題 #596
Which wireless security protocol replaces the personal pre-shared key (PSK) authentication with Simultaneous Authentication of Equals (SAE) and is therefore resistant to offline dictionary attacks?

- A. Bluetooth
- B. ZigBee
- C. WPA2-Enterprise
- D. WPA3-Personal

答案：D

解題說明：
In CEH v13 Module 11: Hacking Wireless Networks, WPA3-Personal is discussed as the latest wireless encryption standard designed to address the weaknesses of WPA2, particularly PSK brute-force vulnerabilities.
Key Features of WPA3-Personal:
Replaces the pre-shared key (PSK) with Simultaneous Authentication of Equals (SAE), also known as the Dragonfly Key Exchange.
SAE performs a zero-knowledge proof which makes it resistant to offline dictionary attacks.
Even if attackers capture the handshake, they cannot use it to brute-force passwords offline.
Option Clarification:
A). WPA3-Personal: Correct - uses SAE instead of PSK.
B). WPA2-Enterprise: Uses 802.1X, not related to SAE.
C). Bluetooth: Wireless protocol but unrelated to SAE or WPA.
D). ZigBee: IoT protocol; unrelated to Wi-Fi security protocols.

問題 #597
A government agency trains a group of cybersecurity experts to carry out covert cyber missions against foreign threats and gather intelligence without being detected. These experts work exclusively for national interests. What classification best describes them?

- A. State-sponsored hackers
- B. Gray hat hackers
- C. Organized hackers
- D. Hacktivists

答案： A

解題說明：
CEH courseware categorizes hackers based on intent, authorization, and affiliation. State-sponsored hackers are defined as individuals or teams who conduct cyber operations on behalf of a government to advance national interests. These operations often include espionage, cyber warfare, intelligence gathering, and covert offensive actions. Unlike organized hackers or cybercriminal groups, whose motivations may include financial gain or ideological activism, state-sponsored units follow strategic directives issued by government agencies. CEH materials explain that such groups operate with access to advanced tools, long-term funding, and classified intelligence, enabling them to execute highly sophisticated and covert operations targeting foreign governments, corporations, or critical infrastructure. Hacktivists pursue political or social causes, while gray-hat hackers operate without explicit permission but without malicious intent. Only state-sponsored hackers match the scenario where cyber experts are formally trained, resourced, and authorized by a national government to conduct operations that remain undetected. Therefore, the correct classification is state- sponsored hackers.

問題 #598
Which of the following types of SQL injection attacks extends the results returned by the original query, enabling attackers to run two or more statements if they have the same structure as the original one?

- A. Error-based injection
- B. Boolean-based blind SQL injection
- C. Blind SQL injection
- D. Union SQL injection

答案： D

解題說明：
Union-based SQL injection is a technique that uses the UNION SQL operator to combine the results of the original query with the results of one or more additional queries. This allows attackers to:
Retrieve data from different database tables
Extend the result set returned to the web application
Exploit the application if both queries return the same number and type of columns According to CEH v13:
UNION SELECT can be used to enumerate tables, extract user credentials, or display sensitive data.
It requires knowledge of the structure of the original query.

Incorrect Options:
A). Error-based injection extracts data from database error messages.
B). Boolean-based blind SQLi returns true/false results to infer data.
C). Blind SQLi (generic) relies on no visible output and uses inference techniques.
