# Pass-Sure NCP-EUC Valid Braindumps Questions Offer You The Best Testking Learning Materials | Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam

SurePassExams has one of the most comprehensive and top-notch Nutanix NCP-EUC Exam Questions. We eliminated the filler and simplified the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam exam preparation process so you can ace the Nutanix exam on your first try. Our Nutanix NCP-EUC Questions include real-world examples to help you learn the fundamentals of the subject not only for the Nutanix exam but also for your future job.

The NCP-EUC exam is designed for IT professionals who are responsible for managing and deploying Nutanix EUC solutions. This includes architects, administrators, and engineers who work with Nutanix EUC products and services. NCP-EUC exam covers a range of topics, including desktop and app virtualization, application delivery, end-user experience, security, and compliance.

Nutanix NCP-EUC certification exam is designed for IT professionals who want to validate their skills and knowledge in end-user computing (EUC). Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification exam is offered by Nutanix, a leading provider of cloud computing solutions. The NCP-EUC Certification Exam is a globally recognized certification that demonstrates your expertise in designing, deploying, and managing EUC solutions.

# NCP-EUC Testking Learning Materials & New NCP-EUC Exam Prep

Because many users are first taking part in the exams, so for the exam and test time distribution of the above lack certain experience, and thus prone to the confusion in the examination place, time to grasp, eventually led to not finish the exam totally. In order to avoid the occurrence of this phenomenon, the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam study question have corresponding products to each exam simulation test environment, users log on to their account on the platform, at the same time to choose what they want to attend the exam simulation questions, the NCP-EUC Exam Questions are automatically for the user presents the same as the actual test environment simulation test system, the software built-in timer function can help users better control over time, so as to achieve the systematic, keep up, as well as to improve the user's speed to solve the problem from the side with our NCP-EUC test guide.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q40-Q45):

### NEW QUESTION # 40
The administrator is reviewing Prism Central Tasks (Menu\Activity\Tasks) and noticed that there are a lot of tasks named:
ADS: Remove Resource Contention
The administrator would like to identify the virtual desktops in the environment that are using the most resources to determine how to fix the resource contention.
Which action should the administrator take to complete this task?

- A. Review Planning scenarios.
- B. Filter the virtual desktops by Metrics: CPU Usage.
- C. Review the Storage Runway
- D. Filter the virtual desktops by Constrained: High,

**Answer: D**

Explanation:
an action that the administrator should take to identify the virtual desktops in the environment that are using the most resources and causing resource contention is Filter the virtual desktops by Constrained: High. Constrained is a metric that indicates how often a virtual machine is unable to get its requested CPU resources. A high value means that the virtual machine is frequently starved for CPU and may experience performance degradation. By filtering the virtual desktops by Constrained: High, the administrator can see which ones are suffering from resource contention and take appropriate actions such as migrating them to less loaded hosts or increasing their CPU allocation.

### NEW QUESTION # 41
A company based out of San Jose, CA, USA is considering deploying a global virtual desktop environment. Currently. there is no solution for virtual desktops. The company has employees globally and decides to leverage the Public Cloud across multiple regions for their deployment.
Which factor is the most important for choosing a public cloud data center location to optimize for end-user performance?

- A. The combined distance the corporate headquarters, the data center, and the users should be minimized.
- B. The network latency between the end user and the data center should be minimized,
- C. The data center should be in the same state or country as the end users.
- D. The distance from the data center to the end users should be minimized.

**Answer: B**

Explanation:
one of the factors that affects end-user performance in a virtual desktop environment is network latency, which is the time it takes for data packets to travel between two points on a network.
Therefore, if the company wants to optimize end-user performance, they should choose a public cloud data center location that minimizes the network latency between the end user and the data center.

### NEW QUESTION # 42
In Frame, what occurs when the minimum value in the capacity settings is set to less than the Quick Publish value specified?

- A. Regular publish value settings are ignored and Quick Publish values are performed.
- B. Quick Publish value settings are ignored, and regular publishing is performed.
- C. The administrator will receive an error notification.
- D. A user will not be able to launch their Frame Desktop or Application

**Answer: B**

Explanation:
Nutanix Frame allows administrators to configure capacity settings for their virtual machines (VMs) that run virtual apps and desktops.
Capacity settings include:
Default capacity, which defines how many VMs are turned on when there is no user activity on the account. This setting helps reduce costs by turning off unused VMs.
Active capacity, which defines how many VMs are turned on when there is user activity on the account.
This setting helps improve performance by ensuring enough VMs are available for user sessions.
Quick Publish, which defines how many VMs are updated with the latest changes when publishing a new version of an app or desktop. This setting helps speed up the publishing process by updating only a subset of VMs instead of all of them.
According to Nutanix Frame documentation1, Quick Publish value should be equal to or less than the active capacity value for each instance type.
If Quick Publish value is set higher than active capacity value, then Frame will ignore Quick Publish value and perform regular publishing instead.
https://docs.frame.nutanix.com/platform/admin/capacity/

**NEW QUESTION # 43**
What is one key benefit of using Nutanix Validated Designs (NVD) for Citrix VDI deployments?

- A. Provides sizing guidance and scaling capabilities.
- B. NVD-based deployments are designed to provide 99.999% up time.
- C. NVD-based deployments are designed to provide Disaster Recovery
- D. Determines performance impact during peak I/0

**Answer: A**

Explanation:
Nutanix and Citrix provide a turnkey validated VDI infrastructure solution that allows 10x faster deployments, cuts management time by 70% and significantly reduces the number of support calls. Nutanix eliminates the complexity of managing discrete storage, servers and separate virtualization and networking stacks.

**NEW QUESTION # 44**
An administrator has created a Prism Central Playbook Action named Virtual Desktop Add CPU to add 2 vCPU to virtual desktop when an alert is triggered after the virtual desktop's CPU usage has exceeded 80%. Initially the Playbook Action works as expected, however over time it seems it is no longer being triggered.
What is causing this issue?

- A. The vNUMA boundary has been breached preventing more vCPUs to be added.
- B. The virtual desktop CPU Usage alerts were not cleared.
- C. There are no more CPUs availed to allocate to the VM.
- D. Additional vCPUs need to be registered.

**Answer: B**

Explanation:
https://next.nutanix.com/community-blog-154/new-x-play-actions-in-prism-central-2021-7-40005 The Prism Central Playbook Action is a tool that allows you to automate tasks based on triggers, such as events, alerts, or webhooks. You can define a series of actions (called a playbook) that perform operations on your infrastructure, such as adding or reducing resources on a VM2.
To use the Playbook Action for VMs, you need to meet some prerequisites, such as:
The Prism Central version must be 2020.11 or later.
The AOS version must be 5.15 LTSR or later.

The hypervisor must be AHV or ESXi.

The VMs must have Nutanix Guest Tools (NGT) installed and enabled3.

One of the possible reasons why the Playbook Action is no longer being triggered is that the virtual desktop CPU Usage alerts were not cleared. According to the Prism Central guide3, "If an alert has been triggered once and has not been cleared yet, then it will not trigger any action again until it has been cleared". Therefore, if the CPU Usage alert remains active for a virtual desktop, it will prevent the Playbook Action from adding more vCPUs to it.

**NEW QUESTION # 45**

......

If you feel nervous about your exam, then our NCP-EUC exam materials will be your bets choice. NCP-EUC Soft test engine can stimulate the real exam environment, so that your confidence for your exam will be strengthened. In addition, we provided you with free demo to have a try before buying NCP-EUC Exam Cram. You can enjoy free update for one year, so that you can obtain the latest version timely, and the latest version for NCP-EUC training materials will be sent to your email automatically. You just need to check your email.
