

PEGACPRSA22V1 Exam Discount, PEGACPRSA22V1 Valid Practice Questions

2026 Latest ActualVCE PEGACPRSA22V1 PDF Dumps and PEGACPRSA22V1 Exam Engine Free Share:
<https://drive.google.com/open?id=1d4qweSRivaIRirSdFd3XqFCqmlnMky1E>

The prominent benefits of Pegasystems PEGACPRSA22V1 certification exam are more career opportunities, updated skills and knowledge, recognition of expertise, and instant rise in salary and promotion in new job roles. To do this you just need to pass the Pegasystems PEGACPRSA22V1 Exam. However, to get success in the PEGACPRSA22V1 exam is not an easy task, it is a challenging PEGACPRSA22V1 exam.

PEGACPRSA22V1 training materials are famous for instant access to download, and you can receive your download link and password within ten minutes after payment. And if you don't, you don't receive, you can contact with us, we will resolve it for you. Besides, we offer free demo for you, we recommend you to have a try before buying PEGACPRSA22V1 Training Materials. You can enjoy free update for 365 days if you choose us, so that you can obtain the latest information timely. And the latest version for PEGACPRSA22V1 exam dumps will be sent to your email automatically. You just need to receive them,

PEGACPRSA22V1 Valid Practice Questions, New PEGACPRSA22V1 Exam Discount

If you are still hesitate to choose our ActualVCE, you can try to free download part of Pegasystems PEGACPRSA22V1 exam certification exam questions and answers provided in our ActualVCE. So that you can know the high reliability of our ActualVCE. Our ActualVCE will be your best selection and guarantee to pass Pegasystems PEGACPRSA22V1 Exam Certification. Your choose of our ActualVCE is equal to choose success.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q57-Q62):

NEW QUESTION # 57

Within your project for a car renting company, you create an automation that reads data From an online form and calls a subautomation that saves that data in the company's application. The UpdateCustomerDetails subautomation has two exit points,

Success and Failure, and two output parameters. Result and errCode.
Which figure represents this subautomation?

- A.
- B.
- C.
- D.

Answer: A

Explanation:

* Pega Robotics Studio - Automation Design Concepts (Entry/Exit Points & Parameters)

"An automation can expose multiple exit points (for example, Success and Failure) and can define output parameters that return values to the caller. When the automation completes, the appropriate exit point is raised and the output parameters are made available to the caller."

* Pega Robotics Studio - Calling Automations (Run and Parameter Mapping)

"When one automation calls another, the called automation appears as a component with input parameters, output parameters, and exit points. The caller wires the Success/Failure exits to the next steps and maps output parameters (for example, result, errCode) to downstream logic." Why Option C is correct:

* The UpdateCustomerDetails block in Option C clearly shows two exit points - Success and Failure - and two output parameters - result and errCode - on the subautomation.

* The wiring demonstrates a typical pattern:

* On Success, the flow proceeds to a success path with result available.

* On Failure, the flow proceeds to a failure path with errCode available (the extra, unused result pin on the failure jump is permissible but not required).

* This matches the specification precisely: two exits (Success/Failure) and two outputs (result, errCode).

Why the other options are not correct:

* Option A: Shows errCode but does not expose result clearly as an output to the success path.

* Option B: The component does not display errCode as an output parameter of the subautomation.

* Option D: Emphasizes an additional boolean/conditional output and maps result on the failure path, which does not reflect the stated definition of the subautomation outputs.

Document Sources (Exact Extracts Reference):

* Pega Robotics Studio User Guide - Automation Design Concepts: Entry/Exit Points and Parameters.

* Pega Robotics Studio User Guide - Calling Automations and Mapping Inputs/Outputs.

* Pega Robotics System Certification Study Material - Subautomation design patterns (Success/Failure with output parameters).

NEW QUESTION # 58

When interrogating a single-page web application, you need to create a container for the logical page view.

You decide to use the Select Element in the Interrogation Steps list, move the options to the Ordered Interrogation Steps column and place them in the correct order.

Answer:

Explanation:

Explanation:

When interrogating a single-page web application (SPA), controls often reside within dynamic DOM regions or logical page views that reload content without changing the page URL.

To effectively interrogate such controls, developers must create containers that define a logical grouping for the dynamic content-allowing Pega Robot Studio to maintain proper context when referencing those controls.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Single- Page Web Applications":

"When interrogating single-page web applications (SPA), developers must first create a container that represents the logical view within which controls exist.

* Navigate to the page or view where the target control appears.

* In the Interrogation Form, select Select Element to enable control selection mode.

* Use the Bullseye tool to highlight and select the control or parent HTML element.

* From the list of detected controls, choose the desired control to bind.

* Click Create Container to define the logical page grouping for the interrogated control.

* Click Close to exit the dialog once the container has been successfully created." Detailed Step Reasoning:

* Navigate to the view that contains the control.

* Ensures that the desired control is visible within the web application's dynamic content area.

- * On the Interrogation Form, select the Select Element interrogation option.
- * Activates the Select Element mode, allowing you to interrogate web-based elements precisely.
- * Drag and drop the bullseye icon to the control.
- * Highlights the specific control in the web application that you want to interrogate.
- * Select the control from the list.
- * Confirms which element to bind from the list of detected elements in the DOM.
- * Click Create Container.
- * Creates a container object in the automation hierarchy that represents the logical view of the web application (essential for SPAs).
- * Click Close to close the dialog box.
- * Completes the interrogation process and finalizes the container creation.

Final Ordered Steps:

Order

Interrogation Step

1

Navigate to the view that contains the control.

2

On the Interrogation Form, select the Select Element interrogation option.

3

Drag and drop the bullseye icon to the control.

4

Select the control from the list.

5

Click Create Container.

6

Click Close to close the dialog box.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Interrogating Single-Page Applications and Creating Logical Containers section (Pega Robotics 19.1 and later).

NEW QUESTION # 59

The following image shows a Message Definitions configuration.

Which option is the correct representation of the message configuration settings?

- A. Exhibit B
- B. Exhibit C
- C. Exhibit A
- D. Exhibit D

Answer: A

NEW QUESTION # 60

While interrogating a web application, you discover a hidden menu item: AddressType. The AddressType menu item activates when the pointer hovers over the control, and the menu displays a drop-down list.

Which two options can you use to interrogate this hidden drop-down list control? (Choose Two)

- A. On the Web Controls tab, select the page, and then click List Web Controls.
- B. In the Interrogation Form dialog box, select HTML Table Editor.
- C. On the Application tab, click the Virtual Controls tab.
- D. Use the Delay option on the Interrogation Form.
- E. On the Interrogation Form, select Select Element.

Answer: D,E

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

During interrogation of web applications, developers often encounter dynamic or hidden controls - such as drop-down menus or hover-triggered lists - that do not immediately appear on the page.

To successfully interrogate these elements, Pega Robot Studio provides two essential tools:

- * The Delay option on the Interrogation Form, which allows the developer time to trigger the hidden control before capture.

* The Select Element option, which enables precise selection of an element directly from the DOM, even if it is not immediately visible.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Dynamic and Hidden Web Controls":

"When interrogating hidden or dynamically rendered controls:

* Use the Delay option on the Interrogation Form to give yourself time to hover over or activate a hidden control before Robot Studio attempts to capture it.

* Use the Select Element option to manually highlight and select a control from the web application's DOM, even when it is displayed only after an interaction such as mouse hover. These methods are particularly effective for controls that expand or render asynchronously, such as drop-down menus or tooltip-triggered elements." Detailed Step Reasoning:

* C. Use the Delay option on the Interrogation Form.

* Correct.

* The Delay setting pauses the interrogation process for a specified number of seconds, allowing you to hover over the hidden element (e.g., AddressType menu) and make it visible before capture.

* Once the menu appears, Pega Robot Studio can detect and interrogate it.

* D. On the Interrogation Form, select Select Element.

* Correct.

* The Select Element tool allows manual selection of an element directly from the web page's HTML DOM structure.

* This is especially useful for hidden or dynamically rendered elements like the AddressType dropdown that may not be visible until hovered over.

Incorrect Options Explained:

* A. In the Interrogation Form dialog box, select HTML Table Editor.

* Incorrect.

* The HTML Table Editor is used to inspect and modify HTML table-based controls (grid or table structures), not dynamic menus.

* B. On the Web Controls tab, select the page, and then click List Web Controls.

* Incorrect.

* The List Web Controls option lists already recognized controls in the DOM but cannot reveal or capture hidden dynamic elements.

* E. On the Application tab, click the Virtual Controls tab.

* Incorrect.

* Virtual Controls are used for defining custom controls when the default adapter cannot identify one, not for capturing hidden menu elements.

Final Correct answer:

C). Use the Delay option on the Interrogation Form

D). On the Interrogation Form, select Select Element.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Interrogating Dynamic, Hidden, and Hover-Activated Controls section (Pega Robotics 19.1 and later).

NEW QUESTION # 61

A developer adds a diagnostic log component to an automation and checks the log file.

Based on the image, how did the developer configure the diagnostic log component settings?

□

- A. Exhibit B
- B. Exhibit C
- C. Exhibit A
- D. Exhibit D

Answer: A

NEW QUESTION # 62

.....

In a new era of talent gradually saturated win their own advantages, how to reflect your ability? Perhaps the most intuitive way is to get the test PEGACPRSA22V1 certification to obtain the corresponding qualifications. However, the PEGACPRSA22V1 qualification examination is not so simple and requires a lot of effort to review. How to get the test certification effectively, I will introduce you to a product—the PEGACPRSA22V1 Learning Materials that tells you that passing the PEGACPRSA22V1 exam in a short time is not a fantasy. We have helped tens of thousands of candidates pass their PEGACPRSA22V1 exam with 99% pass

rate.

PEGACPRSA22V1 Valid Practice Questions: <https://www.actualvce.com/Pegasystems/PEGACPRSA22V1-valid-vce-dumps.html>

Pegasystems PEGACPRSA22V1 Exam Discount At present, you have no choice because you have limited ability, We have three versions of our PEGACPRSA22V1 exam guide, so we have according three versions of free demos, It made them utterly confident to go through the whole process of the Certified Pega Robotics System Architect 22. Feel free to compare our quality of Pegasystems PEGACPRSA22V1 exam questions dumps with other courses, Now our company can provide you the PEGACPRSA22V1 test questions and practice exam online so that you can pass exams surely and get a dreaming certification.

But the animators were able to save a lot of time and paint PEGACPRSA22V1 Valid Practice Questions by using one set of cels for his arms, another set for his legs, and one that didn't move as much for his body.

Use the information and procedures in this chapter for maintaining PEGACPRSA22V1 an established security profile after hardening. At present, you have no choice because you have limited ability.

Certified Pega Robotics System Architect 22 Free Valid Torrent & PEGACPRSA22V1 Actual Practice Pdf & Certified Pega Robotics System Architect 22 Exam Training Pdf

We have three versions of our PEGACPRSA22V1 exam guide, so we have according three versions of free demos, It made them utterly confident to go through the whole process of the Certified Pega Robotics System Architect 22. Feel free to compare our quality of Pegasystems PEGACPRSA22V1 exam questions dumps with other courses.

Now our company can provide you the PEGACPRSA22V1 test questions and practice exam online so that you can pass exams surely and get a dreaming certification, Our PEGACPRSA22V1 exam questions have 3 versions and we provide free update of the PEGACPRSA22V1 exam torrent to you.
