

100% Pass 2026 ISACA Fantastic AAISM: ISACA Advanced in AI Security Management (AAISM) Exam Reliable Dumps Questions

Our desktop software ISACA AAISM practice exam software provides a simulated scenario in which you may pick the ISACA AAISM exam questions and schedule them to replicate an actual ISACA exam-like situation. With each attempt of the ISACA AAISM Practice Exam in this manner, your score is saved.

ISACA AAISM Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">AI Technologies and Controls: This section of the exam measures the expertise of AI Security Architects and assesses knowledge in designing secure AI architecture and controls. It addresses privacy, ethical, and trust concerns, data management controls, monitoring mechanisms, and security control implementation tailored to AI systems.
Topic 2	<ul style="list-style-type: none">AI Governance and Program Management: This section of the exam measures the abilities of AI Security Governance Professionals and focuses on advising stakeholders in implementing AI security through governance frameworks, policy creation, data lifecycle management, program development, and incident response protocols.
Topic 3	<ul style="list-style-type: none">AI Risk Management: This section of the exam measures the skills of AI Risk Managers and covers assessing enterprise threats, vulnerabilities, and supply chain risk associated with AI adoption, including risk treatment plans and vendor oversight.

Exam AAISM Dumps - Pass AAISM Guarantee

As is known to us, the leading status of the knowledge-based economy has been established progressively. It is more and more important for us to keep pace with the changeable world and improve ourselves for the beautiful life. Our company can help you solve the problem and get your certification, because our company has compiled the AAISM question torrent that not only have high quality but also have high pass rate. We believe that our AAISM exam questions will help you get the certification in the shortest. So hurry to buy our AAISM exam torrent, you will like our products.

ISACA Advanced in AI Security Management (AAISM) Exam Sample Questions (Q120-Q125):

NEW QUESTION # 120

A CISO must provide KPIs for the organization's newly deployed AI chatbot. Which metrics are BEST?

- A. Explainability and F1 score
- **B. Error rate and bias detection**
- C. Response time and throughput
- D. Customer effort score and user retention

Answer: B

Explanation:

AAISM recommends that AI KPIs should emphasize:

- * Error rates - measure correctness and reliability
- * Bias detection metrics - assess fairness and harm risk

These are the core governance KPIs for AI systems interacting with end users.

Response time (A) is a performance metric but not an AI governance KPI. Customer retention (C) is business- focused. F1 score (D) is useful but not as critical as bias monitoring.

References: AAISM Study Guide - AI Performance, Fairness & Governance Metrics.

NEW QUESTION # 121

Which of the following involves documenting and monitoring the complete journey of data as it flows through an AI system?

- A. Transformation
- B. Processing
- C. Origin
- **D. Lineage**

Answer: D

Explanation:

Data lineage records and monitors the end-to-end journey of data-sources, movements, transformations, storage locations, uses, and dependencies-providing traceability, auditability, and accountability across the AI lifecycle. "Origin" is a single point (provenance), "transformation" is one step within the flow, and

"processing" is a general activity rather than a governance record of the entire path.

References: AI Security Management (AAISM) Body of Knowledge: Data Governance-Provenance and Lineage; AAISM Study Guide: Lineage Documentation, Traceability, and Audit Evidence.

NEW QUESTION # 122

When preparing for an AI incident, which of the following should be done FIRST?

- A. Establish recovery processes for AI system models and datasets
- **B. Establish a cross-functional incident response team with AI knowledge**
- C. Implement a clear communication channel to report AI incidents
- D. Create containment and eradication procedures for AI-related incidents

Answer: B

Explanation:

AAISM prescribes Preparation as the foundational phase of AI incident response. The first priority is to form and empower a cross-functional incident response (IR) team with AI/ML expertise (security, data science, product, legal/compliance). Only once the

accountable team exists can you define playbooks, communications, containment/eradication steps, recovery processes, and escalation paths. Without a designated team, procedures and channels lack ownership and effectiveness.

NEW QUESTION # 123

Which of the following is the MOST critical success factor for an AI implementation project?

- A. Mapping data throughout the life cycle
- B. Ensuring AI risk is captured in the risk register
- C. Developing and using model cards
- **D. Obtaining senior management buy-in**

Answer: D

Explanation:

AAISM identifies executive sponsorship and senior management buy-in as the foremost success factor for AI initiatives. It secures resources, resolves cross-functional conflicts, sets risk appetite, and enforces adherence to governance and controls. Model cards (A), risk registers (B), and lifecycle data mapping (C) are vital practices within the program, but without top-level commitment, adoption, funding, and accountability often fail.

References: AI Security Management™ (AAISM) Body of Knowledge - AI Program Governance; Executive Sponsorship & Accountability; Strategy-to-Control Alignment for Successful AI Delivery.

NEW QUESTION # 124

Which AI data management technique involves creating validation and test data?

- A. Training
- B. Annotating
- C. Learning
- **D. Splitting**

Answer: D

Explanation:

AAISM describes data splitting as the process of dividing datasets into:

- * training
- * validation
- * test sets

This is essential for reducing overfitting and ensuring robust evaluation.

Learning (A) refers to model training. Annotating (B) labels data. Training (C) does not create validation/test data.

References: AAISM Study Guide - AI Data Preparation & Dataset Splitting.

NEW QUESTION # 125

.....

If you want to get promotions or high-paying jobs in the ISACA sector, then it is important for you to crack the ISACA Advanced in AI Security Management (AAISM) Exam (AAISM) certification exam. The ISACA AAISM certification has become the best way to validate your skills and accelerate your tech career. AAISM Exam applicants who are doing jobs or busy with their other matters usually don't have enough time to study for the test.
