ATlassian Jira Administration for Data Center Sample Questions (Q28-Q33):

NEW QUESTION # 28

Tushar was a member of the 'analysts' group and a second group that grants him Jira Software application access. You just deleted the 'analysts' group. Identify a possible impact

- A. He can no longer update his user profile.
- B. He can no longer create a new saved filter.
- C. He can now manage versions but not components in his project.
- **D. He can no longer reopen a closed issue.**

Answer: D

NEW QUESTION # 29

The Release Manager is having problems caused by inconsistent naming of versions across projects. He would like to use a more consistent naming convention.

The developers do not know the naming convention, and are happy to let the Release Manager rename versions when they get the names wrong.

The projects all use the Default Permission Scheme.

Which action would allow the Release Manager to update the versions in the projects?

- A. Change the Manage Versions permission in the permission scheme.
- **B. Change the workflow to allow the Release Manager to update versions.**
- C. Add the Release Manager to the developer role.
- D. Add the Release Manager to the Administrators project role.

Answer: B

NEW QUESTION # 30

The operations team currently uses the OPS project to track their tasks. They have a new requirement to begin handling change requests. Inspect the partial summary of the current OPS project configuration:

The screenshot displays the configuration for the OPS project in Jira. It is divided into four main sections:

- Issue Types:** Describes tracking different types of issues like bugs or tasks. The scheme is 'SIM: Simple Issue Tracking Issue Type Scheme'. It shows 'Task' as selected and 'Sub-Task' as a sub-task.
- Versions:** Explains that Jira allows tracking different versions (e.g., 1.0, 2.0). It lists 'Q3 2015' and 'Q4 2015' as existing versions.
- Workflows:** Describes processes that mirror team practices. The scheme is 'SIM: Simple Issue Tracking Workflow Scheme'. A link to 'SIM: Simple Issue Tracking Workflow' is provided.
- Components:** Explains that projects can be broken down into components like 'Database' or 'User Interface'. It lists four components: 'Automation' (Hans Burger), 'Integration' (Tri Nguyen), 'Maintenance' (Param Reddy), and 'Upgrade' (Andrew Jackson).

Which two requirements would require creating a new project? (Choose two.)

- A. Change requests will not use versions.
- B. Change requests will require the Due Date field to be populated.
- C. Change requests will have a different workflow.
- D. Change requests will notify different people for all system events.
- E. Change requests will have different component leads.

Answer: B,D

NEW QUESTION # 31

The OPS team will start using Jira to track and approve Change Requests in the OPS project. They have these workflow requirements:

- * Requests can be approved by two individuals only.
- * The approvers will change weekly.

Jira is connected to your corporate LDAP with Read-Only permissions.

What is the best way to structure permissions for the OPS project to support these workflow requirements?

- A. Request the group it-approvers to be created in the corporate LDAP directory and add it to the Approve Issues permission for the project.
- B. Add individual names to Project Role (Administrators) and add this role to the Approve Issues permission for the project.
- C. Create the group it-approvers in the Jira Internal Directory and have the approvers maintain it.
- D. Request the group it-approvers to be created in the corporate LDAP directory and have the Project Role (Administrators) maintain it in Jira.
- E. Create a new project role for approvers and have the Project Role (Administrators) maintain it.

Answer: A

NEW QUESTION # 32

You have been asked to take on the administration of a second Jira installation in your company.

You were given the following information about user accounts:

- * The company standard is to use Active Directory (AD) to provide user accounts.
- * There are several Active Directory systems in use by different business units.
- * The second Jira is not to be merged with your main Jira.
- * The main Jira system is connected to Active Directory for user accounts.
- * The second Jira is using internal user accounts, not Active Directory.
- * People using the second Jira are using the same login ID as they would use in Active Directory.
- * Your company would like to use Single Sign-on (SSO) but has not yet implemented it for either Jira system.

Which authentication method should you recommend?

- A. Set up a Crowd server to get the user lists from all internal directories and AD, and use AD directly for the password checking.
- B. Change the new Jira to link directly to the required AD servers.
- C. Change the new Jira to use your main Jira's directory services, as that is already reading your Active Directory services.
- D. Set up a Crowd server to pull in all the AD services, and plan to migrate internal users.

Answer: A
