Having a DSCI Certification DCPLA Exam certificate can help people who are looking for a job get better employment opportunities in the IT field and will also pave the way for a successful IT career for them.

DSCI Certified Privacy Lead Assessor DCPLA certification Sample Questions (Q33-Q38):

NEW QUESTION # 33

It's mandatory for the assessee to provide the pre-requisites to the assessor organization before commencement of the first phase of assessment.

- **A. True**
- B. False

Answer: A

Explanation:

According to the DAF#P, the assessment process begins only after the assessee provides required pre- requisites. These may include:

- * Completed self-assessment checklist
- * Documentation on privacy policy, data flows, training records, etc.

This ensures the assessor can effectively plan the assessment and identify areas for further investigation.

NEW QUESTION # 34

From the following list, identify the technology aspects that are specially designed for upholding privacy:

- I) Data minimization
- II) Intrusion prevention system
- III) Data scrambling
- IV) Data loss prevention
- V) Data portability
- VI) Data obfuscation
- VII) Data encryption
- VIII) Data mirroring

- A. Only I, III, V, VII and VIII
- **B. Only I, III, IV, VI and VII**
- C. Only II, V, VI, VII and VIII
- D. Only I, II, III, VII and VIII

Answer: B

Explanation:

Privacy-enhancing technologies (PETs) are critical for operationalizing privacy principles. According to the DPF:

- * Data minimization (I): Collect only necessary data
- * Data scrambling (III), Obfuscation (VI), and Encryption (VII): Techniques to protect identity and data content
- * Data loss prevention (IV): Prevent unauthorized sharing or leakage

Data mirroring and intrusion prevention systems are primarily security mechanisms and not specifically privacy-focused. Data portability, while a right, is not a technology per se for "upholding" privacy but for enabling user control.

Thus, C includes the most appropriate privacy technologies.

NEW QUESTION # 35

Classify the following scenario as major or minor non-conformity.

"The organization defined information access and usage policy and rolled it out across the organization. No formal exercise, however, was conducted to prepare the policy. During implementation, certain discrepancies came out and these were addressed through appropriate policy revisions though this created a lot of hue and cry in the organization and the policy was criticized for adversely affecting productivity. But with appropriate revisions and passage of time, the policy has been accepted. In a recently conducted external audit, one incident has come to light wherein the usage and access policy has been violated by an employee twice. As per the auditor, this incident should have been identified by the organization. In its explanation to the auditor, the management informed that appropriate access and usage monitoring mechanisms have been put in place but admitted that there may have been some lapses".

- A. None of the above
- B. Both Major & Minor
- C. Minor
- D. Major

Answer: C

NEW QUESTION # 36

Which of the following best describes 'Processing'?

- A. Processing is recording and destruction of personal data
- B. Processing is storage and structuring personal data
- C. Processing is a blanket term used for the wide range of operations performed on personal data
- D. Processing is collection and use of personal data

Answer: C

Explanation:

According to the DSCI Privacy Framework and international standards like GDPR and APEC:

"Processing" refers to any operation or set of operations performed on personal data, whether or not by automated means. This includes:

- * Collection, recording, organization, structuring
- * Storage, adaptation or alteration
- * Retrieval, consultation, use
- * Disclosure by transmission, dissemination
- * Alignment, combination, restriction, erasure or destruction

Hence, "processing" is indeed a blanket term encompassing a broad spectrum of actions involving personal data.

NEW QUESTION # 37

What is a Data Controller?

- A. Entity that stores personal data
- B. Entity that shares personal data with third parties
- C. Entity that determines the purpose and means for data processing
- D. Entity that collects personal data

Answer: C

Explanation:

As per the DSCI Privacy Framework and consistent with definitions in APEC and GDPR standards, a Data Controller (or Personal Information Controller) is defined as:

"A person or organization who controls the collection, holding, processing, or use of personal information. It includes one who instructs another to do so on its behalf." Thus, a data controller determines the "purpose and means" of processing, not merely performing or facilitating storage or sharing.

This is a central concept to ensuring accountability in privacy frameworks, as the controller is the primary entity responsible for compliance with data protection principles.

NEW QUESTION # 38

.....

As the tech industry continues to evolve and adapt to new technologies, professionals who hold the DSCI Certified Privacy Lead Assessor DCPLA certification (DCPLA) certification are better equipped to navigate these changes and stay ahead of the curve, increasing their value to employers and clients. In today's fast-paced and ever-changing DSCI sector, having the DSCI DCPLA Certification has become a necessary requirement for individuals looking to advance their careers and stay competitive in the job market.
