## Google Cloud Certified - Professional Cloud Database Engineer Answers

Exams-boost recognizes the acute stress the aspirants undergo to get trust worthy and authentic Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam study material. They carry undue pressure with the very mention of appearing in the Google Professional-Cloud-Database-Engineer certification test. Here the Exams-boost come forward to prevent them from stressful experiences by providing excellent and top-rated Google Professional-Cloud-Database-Engineer Practice Test questions to help them hold the Google Professional-Cloud-Database-Engineer certificate with pride and honor.

### Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q20-Q25):

#### NEW QUESTION # 20

You are starting a large CSV import into a Cloud SQL for MySQL instance that has many open connections. You checked memory and CPU usage, and sufficient resources are available. You want to follow Google-recommended practices to ensure that the import will not time out. What should you do?

- A. Increase the amount of memory allocated to your instance.
- **B. Close idle connections or restart the instance before beginning the import operation.**
- C. Increase the number of CPUs for the instance to ensure that it can handle the additional import operation.
- D. Ensure that the service account has the Storage Admin role.

**Answer: B**

Explanation:

<https://cloud.google.com/sql/docs/mysql/import-export#troubleshooting>

#### NEW QUESTION # 21

You are responsible for designing a new database for an airline ticketing application in Google Cloud. This application must be able to:

Work with transactions and offer strong consistency.

Work with structured and semi-structured (JSON) data.

Scale transparently to multiple regions globally as the operation grows.

You need a Google Cloud database that meets all the requirements of the application. What should you do?

- **A. Use Cloud Spanner in a multi-region configuration.**
- B. Use Cloud SQL for PostgreSQL with both cross-region read replicas.
- C. Use a Bigtable instance with clusters in multiple regions.
- D. Use Firestore in Datastore mode.

**Answer: A**

Explanation:

<https://cloud.google.com/blog/products/databases/manage-semi-structured-data-in-cloud-spanner-with-json>

#### NEW QUESTION # 22

You use Python scripts to generate weekly SQL reports to assess the state of your databases and determine whether you need to reorganize tables or run statistics. You want to automate this report but need to minimize operational costs and overhead. What should you do?

- A. Create a Cloud Composer instance, and create a directed acyclic graph (DAG).
- **B. Create a Cloud Function, and call the Cloud Function using Cloud Scheduler.**
- C. Create a Cloud Function, and call the Cloud Function from a Cloud Tasks queue.
- D. Create a VM in Compute Engine, and run a cron job.

**Answer: B**

### NEW QUESTION # 23

You are deploying a new Cloud SQL instance on Google Cloud using the Cloud SQL Auth proxy. You have identified snippets of application code that need to access the new Cloud SQL instance. The snippets reside and execute on an application server running on a Compute Engine machine. You want to follow Google- recommended practices to set up Identity and Access Management (IAM) as quickly and securely as possible.

What should you do?

- A. For each application code, set up a dedicated user account.
- B. For the application server, set up a common shared user account.
- C. For each application code, set up a common shared user account.
- **D. For the application server, set up a service account.**

**Answer: D**

Explanation:

<https://cloud.google.com/sql/docs/mysql/sql-proxy#using-a-service-account>

### NEW QUESTION # 24

You are migrating an on-premises application to Google Cloud. The application requires a high availability (HA) PostgreSQL database to support business-critical functions. Your company's disaster recovery strategy requires a recovery time objective (RTO) and recovery point objective (RPO) within 30 minutes of failure. You plan to use a Google Cloud managed service. What should you do to maximize uptime for your application?

- A. Migrate the PostgreSQL database to multi-regional Cloud Spanner so that a single region outage will not affect your application. Update the schema to support Cloud Spanner data types, and refactor the application.
- B. Deploy Cloud SQL for PostgreSQL in a regional configuration. Create a read replica in a different zone in the same region and a read replica in another region for disaster recovery.
- **C. Deploy Cloud SQL for PostgreSQL in a regional configuration with HA enabled. Create a cross-region read replica, and promote the read replica as the primary node for disaster recovery.**
- D. Deploy Cloud SQL for PostgreSQL in a regional configuration with HA enabled. Take periodic backups, and use this backup to restore to a new Cloud SQL for PostgreSQL instance in another region during a disaster recovery event.

**Answer: C**

Explanation:

The best answer is deploy an HA configuration and have a read replica you could promote to the primary in a different region

### NEW QUESTION # 25

.....

If you are still unsure whether to pursue Exams-boost Google Professional-Cloud-Database-Engineer exam questions for Professional-Cloud-Database-Engineer certification exam preparation, you are losing the game at the first stage in a fiercely competitive marketplace. Exams-boost Google Professional-Cloud-Database-Engineer Questions are the best option for becoming Professional-Cloud-Database-Engineer certified.

**Professional-Cloud-Database-Engineer Latest Exam Experience:** <https://www.exams-boost.com/Professional-Cloud-Database-Engineer-valid-materials.html>

In this journey, you can get help from Professional-Cloud-Database-Engineer Google Cloud Certified - Professional Cloud Database Engineer Dumps that will assist you in Google Cloud Certified - Professional Cloud Database Engineer exam preparation and prepare you to perform well in the final Google Cloud Certified - Professional Cloud Database Engineer exam, In order to benefit more candidates, we often give some promotion about Professional-Cloud-Database-Engineer pdf files, The pathway to pass Professional-Cloud-Database-Engineer was not so easy and perfectly reliable as it has become now with the help of our products, Google Accurate Professional-Cloud-Database-Engineer Answers There are thousands of customers have passed their exam and get the related certification.

Be unable to move the extremities, So we want to emphasis that if you buy our Professional-Cloud-Database-Engineer PDF VCE please surely finish all questions and master its key knowledge.

In this journey, you can get help from Professional-Cloud-Database-Engineer Google Cloud Certified - Professional Cloud

Database Engineer Dumps that will assist you in Google Cloud Certified - Professional Cloud Database Engineer exam preparation and prepare you to perform well in the final Google Cloud Certified - Professional Cloud Database Engineer exam.

## Free PDF 2026 Professional-Cloud-Database-Engineer: Updated Accurate Google Cloud Certified - Professional Cloud Database Engineer Answers

In order to benefit more candidates, we often give some promotion about Professional-Cloud-Database-Engineer pdf files, The pathway to pass Professional-Cloud-Database-Engineer was not so easy and perfectly reliable as it has become now with the help of our products.

There are thousands of customers have passed their exam and get the related certification, The pass rate of our Professional-Cloud-Database-Engineer exam questions is high as 98% to 100%, which is unique in the market.
