## Pass Guaranteed 2026 Microsoft AB-900 Perfect Valid Dumps Book

First and foremost, the pass rate of our AB-900 training guide among our customers has reached as high as 98% to 100%, which marks the highest pass rate in the field, we are waiting for you to be the next beneficiary. Second, you can get our AB-900 practice test only in 5 to 10 minutes after payment, which enables you to devote yourself to study with our AB-900 Exam Questions as soon as possible. Last but not least, you will get the privilege to enjoy free renewal of our AB-900 preparation materials during the whole year. All of the staffs in our company wish you early success.

### Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.</li> </ul>

## Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q53-Q58):

### NEW QUESTION # 53

Your organization has a Microsoft 365 subscription.

You need to investigate security incidents and alerts raised from the Windows 11 devices in your organization. What should you use?

- A. Microsoft Purview Insider Risk Management
- B. Microsoft Defender for Identity
- C. Microsoft Entra ID Protection
- D. Microsoft Defender for Endpoint

**Answer: D**

Explanation:

The correct answer is C. Microsoft Defender for Endpoint . Microsoft documents that Defender for Endpoint is the Microsoft security solution for endpoint devices , including Windows 11 , and that it lets security teams investigate incidents, alerts, affected devices, files, processes, and remediation actions in the Microsoft Defender portal. Microsoft's investigation guidance specifically describes using Defender for Endpoint to review alerts and investigate affected devices from the devices list, alerts queue, and incident views.

The other options do not match this requirement. Microsoft Entra ID Protection is for risky users and risky sign-ins, not device incident investigation. Microsoft Purview Insider Risk Management focuses on risky user behavior such as data theft or exfiltration, not endpoint security alerts from Windows devices. Microsoft Defender for Identity monitors on-premises and hybrid identity signals from Active Directory environments, not Windows 11 endpoint incidents. For security incidents and alerts raised from organization-managed Windows 11 devices, Microsoft's documented solution is Microsoft Defender for Endpoint .

### NEW QUESTION # 54

You have a Microsoft SharePoint site named Site1 and a security group named Group1.

You need to prevent all users that currently have access to Site1 from accessing the site content unless the user is also a member of Group1.

Which settings should you configure? To answer, select the appropriate settings in the answer area.

## Site1

Public group

[Email](#) [View site](#) [Delete](#)

Site 1

**Version history limit**

Same as Organization-level (Manual)

The correct setting is Restricted site access configured with Group1 . Microsoft Learn states that you can restrict access to a SharePoint site by specifying Microsoft Entra security groups or Microsoft 365 groups as the Restricted Access Control group . Microsoft also states that, after the policy is applied, a user can access the site content only if the user both already has permission to the site or content and is a member of the specified restricted access group. This exactly matches the requirement: users who currently have access to Site1 must also be members of Group1 to continue accessing the content.

The Restrict content from Microsoft 365 Copilot setting is unrelated to direct user access to the SharePoint site. That control limits whether Copilot can use site content, but it does not block users from opening the site themselves. Microsoft separately explains that Restricted SharePoint Search and Copilot restrictions are not the same as changing actual SharePoint permissions or access boundaries. So for this scenario, keep the Copilot restriction Off and configure Restricted site access with Group1 .

**NEW QUESTION # 55**

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area		
Statements	Yes	No
Administrators can block specific websites from being used by Microsoft 365 Copilot.	<input type="radio"/>	<input type="radio"/>
Administrators can block Microsoft 365 Copilot from using web search when responding to user prompts.	<input type="radio"/>	<input type="radio"/>
Administrators can block access to the Researcher agent in Microsoft 365 Copilot, while allowing access to the Analyst agent.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

Answer Area		
Statements	Yes	No
Administrators can block specific websites from being used by Microsoft 365 Copilot.	<input type="radio"/>	<input checked="" type="radio"/>
Administrators can block Microsoft 365 Copilot from using web search when responding to user prompts.	<input checked="" type="radio"/>	<input type="radio"/>
Administrators can block access to the Researcher agent in Microsoft 365 Copilot, while allowing access to the Analyst agent.	<input checked="" type="radio"/>	<input type="radio"/>

The correct selections are No, Yes, Yes . Statement 1 is No because Microsoft documents tenant controls for web search on or off , but not a general Microsoft 365 Copilot setting to block only selected websites for normal Copilot responses. Microsoft also says it doesn't recommend or support managing Copilot through selective URL or domain blocking at the network level. Website allow/block lists shown in Microsoft documentation apply to Researcher with Computer Use virtual-device settings, not to standard Microsoft

365 Copilot web grounding overall.

Statement 2 is Yes because Microsoft provides the Allow web search in Copilot policy in Cloud Policy service and in the Microsoft 365 admin center, which can disable web search for Microsoft 365 Copilot and Copilot Chat.

Statement 3 is Yes because Microsoft states that admins can block Researcher and Analyst , and agent governance includes a Block action. Microsoft also notes that for Researcher and Analyst, user scoping isn't edited through the usual panel; availability is managed by blocking the selected agent at the tenant level.

### NEW QUESTION # 56

Hotspot Question

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area		
Statements	Yes	No
The Microsoft 365 Copilot usage report can be used to view Copilot prompts submitted by users.	<input type="radio"/>	<input type="radio"/>
The Microsoft 365 Copilot usage report shows the total number of unique users in your organization that are assigned Microsoft 365 Copilot licenses.	<input type="radio"/>	<input type="radio"/>
The Microsoft 365 Copilot usage report shows the Copilot usage of each individual Microsoft 365 app.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

Answer Area		
Statements	Yes	No
The Microsoft 365 Copilot usage report can be used to view Copilot prompts submitted by users.	<input type="radio"/>	<input checked="" type="radio"/>
The Microsoft 365 Copilot usage report shows the total number of unique users in your organization that are assigned Microsoft 365 Copilot licenses.	<input checked="" type="radio"/>	<input type="radio"/>
The Microsoft 365 Copilot usage report shows the Copilot usage of each individual Microsoft 365 app.	<input checked="" type="radio"/>	<input type="radio"/>

### NEW QUESTION # 57

Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

- **A. Data Lifecycle Management**
- B. Information Protection
- C. Insider Risk Management
- D. Data Loss Prevention

**Answer: A**

Explanation:

The correct answer is D. Data Lifecycle Management . Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed under Data Lifecycle Management , support three core outcomes: retain-only , delete-only , and retain and then delete . The requirement in this question is exact:

keep email for seven years and then permanently delete it. That is a textbook retain and then delete retention configuration, which Microsoft documents as part of Purview's retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios.

The other options do not meet the requirement. Information Protection focuses on labeling and protecting sensitive information. Insider Risk Management is used to detect and investigate risky user behavior. Data Loss Prevention helps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement is Data Lifecycle Management .

## NEW QUESTION # 58

.....

There is no shortcut to Microsoft AB-900 exam questions success except hard work. You cannot expect your dream of earning the Microsoft 365 Copilot & Agent Administration Fundamentals CERTIFICATION EXAM come true without using updated study material Microsoft 365 Copilot & Agent Administration Fundamentals (AB-900) exam questions. Success in the AB-900 exam adds more value to your resume and helps you land the best jobs in the industry.
