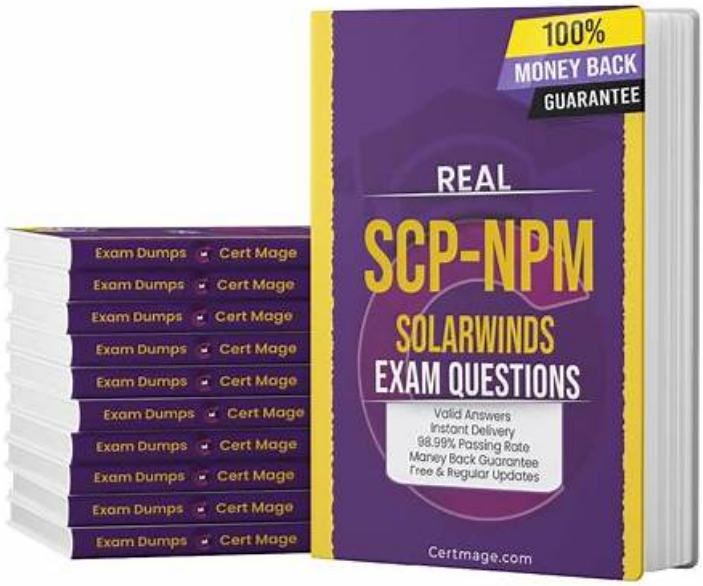
SCP-NPM Exam Format, New SCP-NPM Dumps Book



What's more, part of that TorrentValid SCP-NPM dumps now are free: https://drive.google.com/open?id=1ctZRLpbfck6r7UNxDM02ovi1bspQyRzH

Perhaps you still have doubts about our SCP-NPM study tool. You can contact other buyers to confirm. Our company always regards quality as the most important things. The pursuit of quantity is meaningless. Our company positively accepts annual official quality inspection. All of our SCP-NPM real exam dumps have passed the official inspection every year. Our study materials are completely reliable and responsible for all customers. The development process of our study materials is strict. We will never carry out the SCP-NPM Real Exam dumps that are under researching. All SCP-NPM study tool that can be sold to customers are mature products. We are not chasing for enormous economic benefits. As for a company, we are willing to assume more social responsibility.

SolarWinds SCP-NPM (SolarWinds Network Performance Monitor) Exam is designed to provide network administrators and IT professionals with the knowledge and skills necessary to effectively monitor and manage network performance using the SolarWinds NPM platform. The SolarWinds NPM is a comprehensive network monitoring and management tool that allows IT teams to proactively identify and resolve network issues before they impact end-users. The SCP-NPM Certification validates an individual's proficiency in using this platform to monitor and manage network devices, applications, and services.

The SCP-NPM exam is an excellent way for IT professionals to demonstrate their knowledge and skills in network performance monitoring using the SolarWinds NPM tool. Passing the exam can help professionals advance their careers and open up new opportunities in the IT industry.

New SCP-NPM Dumps Book | SCP-NPM Study Reference

With the rapid market development, there are more and more companies and websites to sell SCP-NPM guide question for learners to help them prepare for exam, but many study materials have very low quality and low pass rate, this has resulting in many candidates failed the exam, some of them even loss confidence of their exam. As for the safe environment and effective product, why don’t you have a try for our SCP-NPM Test Question, never let you down! Before your purchase, there is a free demo for you. You can know the quality of our SCP-NPM guide question earlier.

SolarWinds SCP-NPM exam is a comprehensive test that covers a wide range of topics related to network performance

monitoring. SCP-NPM exam focuses on various aspects of network monitoring, including network availability, network performance, and network security. SCP-NPM Exam consists of multiple-choice questions and is designed to test the candidate's knowledge and understanding of various network monitoring tools and techniques.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q39-Q44):

NEW QUESTION # 39
The Orion platform supports agent-based monitoring for which OS types? (Choose all that apply.)

- A. IBM
- B. Windows
- C. Linux
- D. AIX Unix Agents
- E. Sun Solaris

Answer: A,B,E

NEW QUESTION # 40
You want a user to be able to acknowledge alerts. Which permissions do you assign to the user account?

- A. Allow Node Management Rights
- B. Allow Account to Unmanage Objects
- C. Allow Administrator Rights
- D. Allow Account to Clear Events and Acknowledge Alerts and Syslogs

Answer: D

NEW QUESTION # 41
You configured devices to send SNMP traps to NPM, but do not see the messages in the Orion Web Console. You verified that the firewall ports are open and the devices are correctly configured.
What can you verify to troubleshoot the cause?

- A. Verify that you have the SNMP Trap module installed for NPM
- B. Verify you configured the SNMP Traps view in the Orion Web Console
- C. Verify you use Log Analyzer to view traps
- D. Verify the SNMP trap service is running

Answer: D

Explanation:
The SNMP trap service is responsible for receiving, decoding, displaying, and storing the SNMP trap messages in the Log Analyzer database. If the service is not running, you will not see the messages in the Orion Web Console. You can verify the status of the service by using the Orion Service Manager or the Windows Services console. You can also restart the service if needed. The other options are not relevant for troubleshooting the cause of missing SNMP trap messages. Reference:
Monitor SNMP traps
Troubleshoot SNMP traps
Orion Service Manager

NEW QUESTION # 42
How do you assign users access to select reports?

- A. Use custom properties and account limitations to control report access
- B. Save the reports in different sub-directories and set the permissions for each user
- C. Configure the report and add a Report Limitation. Assign the limitation to users who need access to the report
- D. Create the reports while logged in as each user and set permissions

Answer: A

Explanation:
To assign users access to select reports, you can use custom properties and account limitations to restrict the scope of data that users can view and report on. Custom properties are user-defined fields that you can assign to monitored objects, such as nodes, interfaces, or applications. Account limitations are rules that you can apply to user accounts to filter the network data that users can access and view. By using custom properties and account limitations together, you can create granular and flexible report access for different users or groups. For example, you can create a custom property called Department and assign it to nodes thatbelong to different departments in your organization. Then, you can create an account limitation based on the Department custom property and assign it to users who only need to see and report on the nodes in their own department. References: How to create different Orion Support Users and assign them different properties in NPM, Define what users can access and do in the SolarWinds Platform

NEW QUESTION # 43
How can you extend NPM's monitoring to non-standard devices?

- A. Using OIDs organized in MIBs
- B. Polling with non-standard protocols
- C. Combining licenses from different products
- D. Deploying Orion agents

Answer: A

Explanation:
NPM can monitor a wide range of network devices and infrastructure, including routers, switches, firewalls, servers, and virtual machines. However, some devices may not support standard protocols such as SNMP or WMI, or may have specific metrics that are not monitored out-of-the box by NPM. In such cases, you can extend NPM's monitoring to non-standard devices by using object identifiers (OIDs) organized in management information bases (MIBs). OIDs are numeric strings that uniquely identify a variable in a MIB.
MIBs are hierarchical databases that define the properties and values of the variables that can be monitored on a device. By importing device-specific MIBs into the SolarWinds MIB Database, and creating custom pollers based on OIDs from the MIBs, you can monitor any metric that is available on the device. You can also display the polled data in the web console using dedicated or existing resources12. References:
