reply to your all Salesforce Certified CRM Analytics and Einstein Discovery Consultant exam product related queries.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q35-Q40):

NEW QUESTION # 35

The CRM Analytics consultant at Universal Containers (UC) has set up data sync for the Salesforce Opportunity object with the Amount currency field added. This is being used in multiple datasets and dashboards, as UC is a multi-currency organization. The currency used in Salesforce records is set up in GBP but the data on the dashboard is converting to USD. Conversion logic is not set up on any of the recipes. Why is the currency converting?

- A. The ANS local currency is set up as USD.
- **B. The org corporate currency is set up as USD.**
- C. The Integration User currency is set up as USD.

Answer: B

Explanation:

In Salesforce CRM Analytics, when dealing with multi-currency environments, the system relies on the organization's corporate currency setting for reporting, unless explicitly overridden. In this case, even though the Opportunity data is stored in GBP in Salesforce, the dashboards are showing USD because the corporate currency for the org is set to USD. This behavior is expected unless currency conversion logic is implemented in the datasets or recipes.

The corporate currency serves as the default for currency fields in datasets and dashboards unless configured otherwise. This can be confirmed under the "Manage Currencies" settings in Salesforce.

NEW QUESTION # 36

A system administrator and a CRM Analytics consultant are working together on deploying a recipe/dataflow and a dataset to another org. Prior to this deployment, a package was deployed with all the custom fields used in the dataflow and dataset. While running the recipe/dataflow in the target environment, the consultant encounters multiple errors related to these custom fields. How should this be resolved?

- **A. Check whether the Analytics Integration user has been provided access to these custom fields on the target org.**
- B. Check whether the consultant has been provided access to these custom fields on the target org.
- C. Check whether the system administrator has been provided access to these custom fields on the target org.

Answer: A

NEW QUESTION # 37

Cloud Kicks uses CRM Analytics for its sales reporting. A new manager needs access to CRM Analytics to see specific dashboards.

How should the system administrator give access to the Analytics Studio app in the App Launcher?

- A. Change the profile of the user to one that has access to the Analytics Studio.
- B. Share the Analytics Studio app to the user's profile.
- **C. Assign the CRM Analytics User permission set to the manager's user.**

Answer: C

NEW QUESTION # 38

A consultant creates a CRM Analytics dashboard in a sandbox and it needs to be migrated into production. What should the consultant use to complete the migration?

- **A. Change sets**
- B. Analytics dashboard connector
- C. Analytics External Data API

Answer: A

NEW QUESTION # 39

Cloud Kicks (CK) has a dashboard that is still showing 10 former account managers. CK has since expanded, and some have moved from their former roles. CK wants the dashboard to reflect current account managers and stay up to date as new team members join.

How should the CRM Analytics developer accomplish this?

- **A. Use a Repeater Widget that updates automatically as the data flows through the system.**
- B. Build a report and get notified when a new account manager joins, and then edit the dashboard to add the account manager.
- C. Create @ Watchlist and when the number of account manager updates, update the dashboard to reflect the same.

Answer: A

Explanation:

The Repeater Widget in CRM Analytics allows dynamic updates to be reflected on the dashboard automatically as data flows are updated. This means that as new account managers join or existing account managers change roles, the data in the widget will automatically reflect the latest information without manual updates. This is the most efficient way to keep the dashboard up-to-date with the current list of account managers.

NEW QUESTION # 40

.....

Use this Analytics-Con-201 practice material to ensure your exam preparation is successful. Mock exams at BootcampPDF are available in Analytics-Con-201 desktop software and web-based format.
