Quiz 2026 Valid Huawei H31-341_V2.5-ENU Guide

Fast2test presents you with their effective Huawei H31-341_V2.5-ENU exam dumps as we know that the registration fee is very high (from \$100-\$1000). Fast2test product covers all the topics with a complete collection of actual H31-341_V2.5-ENU exam questions. We also offer free demos and up to 1 year of free Huawei Dumps updates. So, our Huawei H31-341_V2.5-ENU prep material is the best to enhance knowledge which is helpful to pass HCIP-Transmission V2.5 (H31-341_V2.5-ENU) on the first attempt.

Huawei HCIP-Transmission V2.5 Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which of the following description of the principle of automatic protection switching of the standard SSM protocol are correct?
(Multiple choice)

- A. If there are multiple clock sources with the highest quality level; the network element selects the clock with the highest clock priority as the synchronization source.
- B. The network element first selects the clock with the highest quality level from the available clock sources as the synchronization source according to the clock source priority table.
- C. The network element broadcasts the clock quality information of the synchronization source to the downstream station through the s1 byte. And through the S1 byte, the clock quality from the local network element is "not available for

synchronization" to notify the Shangxi site in the reverse direction along the direction of the synchronization source.

- D. The network element broadcasts the clock quality information and clock source ID of the synchronization source to the downstream station through the S1 byte, and reversely notifies the upstream station along the direction of the synchronization source through the S1 byte that the clock quality from this network element is "unavailable Synchronize".

Answer: A,B,C

NEW QUESTION # 42

When static aggregation adds or deletes member ports, the LACP protocol must be run

- **A. True**
- B. False

Answer: A

NEW QUESTION # 43

The "loopback method" consists of the following four steps:

1. Loopback service channel sampling;
2. Draw a business path map;
3. Loopback segment by segment to locate the faulty site;
4. Initially determined as a single board

Which of the following order of the above four steps is correct?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

NEW QUESTION # 44

NG WDM equipment uses Ethernet frames to carry MPLS packets

- **A. True**
- B. False

Answer: A

NEW QUESTION # 45

The rate represented by STM-1 is () Mbit/s

Answer:

Explanation:

155

NEW QUESTION # 46

.....

Before the clients decide to buy our H31-341_V2.5-ENU test guide they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our H31-341_V2.5-ENU study question, the quantity of the questions and the answers. Secondly you could look at the free demos of our H31-341_V2.5-ENU learning prep to see if the questions and the answers are valuable. And our pass rate of H31-341_V2.5-ENU exam questions is more than 98%.
