First and foremost, you can get the latest version of our 312-85 study materials for free during the whole year. Second, our responsible after sale service staffs are available in twenty four hours a day, seven days a week, so if you have any problem after purchasing 312-85 study materials, you can contact our after sale service staffs anywhere at any time. Finally, we have installed the most advanced operation machines in our website, so you can use credit for payment in the process of trading and register your personal information under a safe payment environment. Do not waver any more, the most effective and the Latest 312-85 Study Materials is right here waiting for you.

Earning the CTIA certification demonstrates a candidate's commitment to staying current with the latest threats and trends in the cybersecurity landscape. It also validates their ability to analyze and respond to threats proactively, which is critical for organizations to maintain an effective security posture. The CTIA certification is a valuable asset for cybersecurity professionals who want to advance their careers and make a significant contribution to their organizations.

## Three Easy-to-Use Formats of Dumps Actual 312-85 Exam

Created on the exact pattern of the Actual 312-85 Tests, DumpsActual's dumps comprise questions and answers and provide all important information in easy to grasp and simplified content. The easy language does not pose any barrier for any learner. The complex portions of the certification syllabus have been explained with the help of simulations and real-life based instances. The best part of DumpsActual's dumps is their relevance, comprehensiveness and precision. You need not to try any other source for exam preparation. The innovatively crafted dumps will serve you the best; imparting you information in fewer number of questions and answers.

## **ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q51-Q56):**

### **NEW QUESTION # 51**

Henry, a threat intelligence analyst at ABC Inc., is working on a threat intelligence program. He was assigned to work on establishing criteria for prioritization of intelligence needs and requirements.

Which of the following considerations must be employed by Henry to prioritize intelligence requirements?

- A. Develop a collection plan
- B. Produce actionable data
- **C. Understand frequency and impact of a threat**
- D. Understand data reliability

**Answer: C**

Explanation:

When prioritizing intelligence requirements, it is crucial to understand the frequency and impact of various threats. This approach helps in allocating resources effectively, focusing on threats that are both likely to occur and that would have significant consequences if they did. By assessing threats based on these criteria, Henry can ensure that the threat intelligence program addresses the most pressing and potentially damaging threats first, thereby enhancing the organization's security posture. This prioritization is essential for effective threat management and for ensuring that the most critical threats are addressed promptly.

### **NEW QUESTION # 52**

Jame, a professional hacker, is trying to hack the confidential information of a target organization. He identified the vulnerabilities in the target system and created a tailored deliverable malicious payload using an exploit and a backdoor to send it to the victim.

Which of the following phases of cyber kill chain methodology is Jame executing?

- A. Reconnaissance
- B. Exploitation
- C. Installation
- **D. Weaponization**

**Answer: D**

Explanation:

In the cyber kill chain methodology, the phase where Jame is creating a tailored malicious deliverable that includes an exploit and a backdoor is known as 'Weaponization'. During this phase, the attacker prepares by coupling a payload, such as a virus or worm, with an exploit into a deliverable format, intending to compromise the target's system. This step follows the initial 'Reconnaissance' phase, where the attacker gathers information on the target, and precedes the 'Delivery' phase, where the weaponized bundle is transmitted to the target. Weaponization involves the preparation of the malware to exploit the identified vulnerabilities in the target system.

### **NEW QUESTION # 53**

Michael, a threat analyst, works in an organization named TechTop, was asked to conduct a cyber-threat intelligence analysis. After obtaining information regarding threats, he has started analyzing the information and understanding the nature of the threats.

What stage of the cyber-threat intelligence is Michael currently in?

- A. Unknown unknowns
- B. Unknowns unknown
- **C. Known unknowns**
- D. Known knowns

**Answer: C**

Explanation:

The "known unknowns" stage in cyber-threat intelligence refers to the phase where an analyst has identified threats but the specific details, implications, or full nature of these threats are not yet fully understood.

Michael, in this scenario, has obtained information on threats and is in the process of analyzing this information to understand the nature of the threats better. This stage involves analyzing the known data to uncover additional insights and fill in the gaps in understanding, thereby transitioning the "unknowns" into

"knowns." This phase is critical in threat intelligence as it helps in developing actionable intelligence by deepening the understanding of the threats faced. References:

#### **NEW QUESTION # 54**

Daniel is a professional hacker whose aim is to attack a system to steal data and money for profit. He performs hacking to obtain confidential data such as social security numbers, personally identifiable information (PII) of an employee, and credit card information. After obtaining confidential data, he further sells the information on the black market to make money.

Daniel comes under which of the following types of threat actor.

- A. State-sponsored hackers
- B. Industrial spies
- **C. Organized hackers**
- D. Insider threat

**Answer: C**

#### **NEW QUESTION # 55**

Which of the following types of threat attribution deals with the identification of the specific person, society, or a country sponsoring a well-planned and executed intrusion or attack over its target?

- A. Intrusion-set attribution
- **B. True attribution**
- C. Nation-state attribution
- D. Campaign attribution

**Answer: B**

Explanation:

True attribution in the context of cyber threats involves identifying the actual individual, group, or nation-state behind an attack or intrusion. This type of attribution goes beyond associating an attack with certain tactics, techniques, and procedures (TTPs) or a known group and aims to pinpoint the real-world entity responsible.

True attribution is challenging due to the anonymity of the internet and the use of obfuscation techniques by attackers, but it is crucial for understanding the motive behind an attack and for forming appropriate responses at diplomatic, law enforcement, or cybersecurity levels. References:
