## 100% Pass 2026 C_S4PM_2504 Reliable Braindumps Pdf - Realistic SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Latest Test Pdf

If you want to make progress and mark your name in your circumstances, you should never boggle at difficulties. As far as we know, many customers are depressed by the exam ahead of them, afraid of they may fail it unexpectedly. Our C_S4PM_2504 exam torrents can pacify your worries and even help you successfully pass it. The shortage of necessary knowledge of the exam may make you waver, while the abundance of our C_S4PM_2504 Study Materials can boost your confidence increasingly.

## SAP C_S4PM_2504 Exam Syllabus Topics:

| Topic | Details |
|-------|---------|

| | |
|---|---|
| Topic 1 | • Project Management<br>• Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success. |
| Topic 2 | • SAP S<br>• 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S<br>• 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements. |
| Topic 3 | • SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery. |

# SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q65-Q70):

## NEW QUESTION # 65

Which of the following is the customer's responsibility in both on-premise and private cloud scenarios?

* A. Operating system
* B. Servers
* C. Database
* D. Middleware

**Answer: D**

## NEW QUESTION # 66

Which of the following is the customer's responsibility in both on-premise and private cloud scenarios?

* A. Operating system
* B. Servers
* C. Database
* D. Middleware

**Answer: D**

Explanation:
In SAP S/4HANA on-premise and Private Cloud scenarios, the customer assumes certain responsibilities for system management, distinct from the fully managed SAP S/4HANA Cloud Public Edition. Identifying the correct responsibility is key to understanding deployment models.
* Option A: MiddlewareCorrect. In both on-premise and Private Cloud scenarios, customers are responsible for managing middleware, such as integration platforms or custom interfaces. TheSAP S
/4HANA Deployment Guidestates, "In on-premise and SAP S/4HANA Cloud Private Edition deployments, customers are responsible for managing middleware, including integration and connectivity solutions."
* Option B: Operating systemIncorrect. In Private Cloud, SAP manages the operating system, while in on-premise, customers manage it. TheSAP S/4HANA Cloud Implementation Guidenotes, "Operating system management is handled by SAP in Private Cloud, but by customers in on-premise, making it inconsistent across both scenarios."
* Option C: ServersIncorrect. Servers are managed by SAP in Private Cloud, but by customers in on- premise. TheSAP

S/4HANA Deployment Guideclarifies, "Server management is a customer responsibility in on-premise but handled by SAP in Private Cloud, not a consistent responsibility."
* Option D: DatabaseIncorrect. Database management varies, with SAP handling it in Private Cloud and customers in on-premise. TheSAP S/4HANA Cloud Study Guidestates, "Database management is SAP's responsibility in Private Cloud, but the customer's in on-premise, not a shared responsibility." Extract fromOfficial Documentation:
* SAP S/4HANA Deployment Guide(SAP Help Portal,https://help.sap.com): "In both on-premise and SAP S/4HANA Cloud Private Edition scenarios, customers are responsible for managing middleware, ensuring integration and connectivity align with their requirements."
* SAP S/4HANA Cloud Implementation Guide(SAP Community,https://community.sap.com):
"Middleware management remains a customer responsibility in on-premise and Private Cloud deployments, unlike infrastructure components like servers or databases, which vary by model." Additional Context:
Middleware management, such as configuring SAP Integration Suite or custom APIs, is a consistent customer responsibility due to the need for tailored integration in both on-premise and Private Cloud scenarios. This contrasts with Public Cloud, where SAP manages most integration components, highlighting the increased control and responsibility in Private Cloud and on-premise deployments.
:
SAP Help Portal: SAP S/4HANA Deployment Guide (https://help.sap.com).
SAP Community: SAP S/4HANA Cloud Implementation Guide (https://community.sap.com).
SAP S/4HANA Cloud Study Guide: Details deployment responsibilities.
SAP Activate Methodology: Outlines customer roles in deployment models.

## NEW QUESTION # 67
Why are non-standard scope items activated in the starter system when implementing SAP S/4HANA Cloud Public Edition?

- A. To comply with SAP's licensing requirements for cloud implementations
- B. To automatically migrate legacy data to the development instance
- C. To review the functional scope as identified for the customer's solution
- D. To enable the system to automatically detect and resolve data inconsistencies

**Answer: C**

## NEW QUESTION # 68
You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Use the search function to find the app.
- B. Assign a launchpad space to the business role.
- C. Assign a different business role that provides access.
- D. Create a page and assign it to the launchpad space.

**Answer: A**

Explanation:
The SAP Fiori Launchpad is the primary interface for end users in SAP S/4HANA Cloud Public Edition, providing access to applications based on assigned business roles. If an application does not appear on the user's launchpad, the issue is often related to visibility or navigation rather than role assignment, especially since the user has already been granted access to the specific application.
* Option A: Use the search function to find the app.Correct. The SAP Fiori Launchpad includes a search function that allows users to locate applications, even if they are not immediately visible on their launchpad. According to theSAP S/4HANA Cloud Public Edition User Guide(SAP Help Portal), "The search bar in the SAP Fiori Launchpad enables users to quickly find applications, tiles, or content by entering keywords, even if the application is not pinned to the user's homepage." This is a practical solution for end users to access their assigned applications without requiring administrative intervention.
* Option B: Assign a launchpad space to the business role.Incorrect. Assigning a launchpad space to a business role is an administrative task typically performed by a system administrator, not an end user.
TheSAP Fiori Launchpad Configuration Guidestates, "Launchpad spaces are configured by administrators to organize applications for business roles." End users lack the permissions to perform this action.
* Option C: Create a page and assign it to the launchpad space.Incorrect. Creating a page and assigning it to a launchpad space is also an administrative task. TheSAP Fiori Launchpad Administration Guidenotes, "Pages within launchpad spaces are created and managed by administrators to customize the user experience." This is not something an end user can do.

* Option D: Assign a different business role that provides access.Incorrect. Assigning a different business role requires administrative privileges, as outlined in theSAP S/4HANA Cloud Security Guide:
"Business role assignments are managed by administrators through the Maintain Business Roles app." The end user cannot perform this action, and it's unnecessary since the question confirms the user already has access to the application.
Extract from Official Documentation:
* SAP Help Portal - SAP Fiori Launchpad User Guide(https://help.sap.com): "Users can utilize the search functionality in the SAP Fiori Launchpad to locate applications or content that may not be immediately visible on their personalized launchpad. This feature enhances user productivity by providing quick access to authorized applications."
* SAP S/4HANA Cloud Implementation Guide: "The SAP Fiori Launchpad is designed to provide intuitive navigation, with a search bar that allows users to find applications assigned to their business roles without requiring additional configuration." Additional Context:
The issue described in the question likely stems from the application tile not being pinned to the user's launchpad or being part of a less visible launchpad space. The search function is the most accessible and user- friendly solution, aligning with SAP's focus on user empowerment in the Fiori Launchpad.
:
SAP Help Portal: SAP Fiori Launchpad User Guide (https://help.sap.com).
SAP S/4HANA Cloud Public Edition Security Guide: Details business role management.
SAP Activate Methodology: Emphasizes user enablement and intuitive navigation in the Fiori Launchpad.

## NEW QUESTION # 69

After you completed the Explore Phase Quality Gate you notices that the Fit to Standard workshops have been carried out without the input of the finance experts of the Australian office of the customer. The Australian office is scheduled to go live in an later implementation phase.
What should you do?
Note: There are 2 correct answers to this question.

- A. Put the project on hold and run all required Fit to Standard workshops with Australian users.
- B. Get approval from Australian key users on any of the configuration items that cannot be changed after system provisioning.
- C. Proceed with the as-is plan because the Australian office of the customer is scheduled for a later implementation phase.
- D. Review the scope items to ensure their functionality is available and appropriate for use by Australian users.

**Answer: B,D**

## NEW QUESTION # 70

......

No matter on any condition, our company will not use your information to make profits. As already mentioned above, our C_S4PM_2504 learning materials attach great importance to the interests of customers. A product can develop for so many years, and ultimately the customer's trust and support. Many of the users of C_S4PM_2504 training prep were introduced by our previous customers. They truly trust our C_S4PM_2504 exam questions. And as long as you buy our C_S4PM_2504 practice guide, we believe you will trust them as well.
