Google Cloud - Apigee Certified API Engineer Sample Questions (Q20-Q25):

NEW QUESTION # 20

You need to restrict write access to those applications that have been specifically delegated that authority by end users. Your project is already using OAuth2 for user and app authentication. What should you do?

- A. Retrieve user rights from a database by inspecting the user id bound to the OAuth2 token
- B. Implement user rights checks in the underlying microservice
- C. Create a different URL for updates
- D. Use an OAuth2 scope to identify allowed applications and user granted rights

Answer: D

NEW QUESTION # 21

Which JavaScript statement can be used to raise a fault from a JavaScript policy named "Weather"?

- A. return false;
- B. throw "Bad Data";
- C. return-1;
- D. context.setVariable("Weather.Fault", "true");

Answer: D

NEW QUESTION # 22

Which policy is best used to convert a SOAP response to a JSON response?

- A. AssignMessage
- B. Message Validation
- C. XMLToJSON
- D. SOAPToJSON

Answer: B

NEW QUESTION # 23

You are working on a project that adheres strictly to the Roy Fielding REST concepts. You need to update a single property named "status" of a complicated entity. What should you do?

- A. Create a new service that uses the UPDATE verb that accepts the "status" property and updates the entity. `UPDATE /api/trucks/42/status HTTP/1.1 {status: 5}`
- B. Fetch the full entity. Change only the status value and then send the whole object in the request body of the PUT service.
- C. Create a new service that uses the PATCH verb designed to update only given fields. `PATCH /api/trucks/42 HTTP/1.1 {status: 5}`
- D. Fetch the full entity, update the status value locally. DELETE the original entity and POST the new version.

Answer: D

As an API Engineer your team would like to make sure you are simulating a user experience prior to a deployment in a production environment. Which tests should be ran to closely resemble a consumer interaction with a APIs?

- Answer: B**
