- B. Heroku pricing varies by region.
- C. Private Spaces restrict inbound traffic to the current region.
- D. Available compute resources vary by region.

Answer: A

NEW QUESTION # 63

A client wants to migrate their on-premise application to Heroku. The application maintains a local, in-memory cache for its datastore to improve performance.

What should an Architect advise the client about running the application on Heroku?

- A. The application should replicate its in-memory cache to a local disk to preserve it across deploys.
- B. The application's in-memory cache might be cleared at any time.
- C. The application should declare its in-memory cache as a separate process type to preserve it across deploys.
- D. All of the application's web dynos will share a single in-memory cache.

Answer: C

NEW QUESTION # 64

Universal Containers wants to limit the total cost of their Heroku usage while they're getting started on the platform. To accomplish this, they are considering replacing certain add-ons with comparable open-source components, but the development team doesn't want to lose access to certain features that the add-ons provide.

Which option should an Architect recommend for reducing add-on costs without affecting feature availability?

- A. Remove data store add-ons from the staging and development versions of the applications.
- B. Remove aliases for high-cost add-ons.
- C. Migrate add-ons to free plans.
- D. Share a single instance of a compatible paid add-on across multiple applications.
