## Verified NS0-185 Answers - Valid Test NS0-185 Bootcamp

As you know that a lot of our new customers will doubt about our website or our NS0-185 exam questions though we have engaged in this career for over ten years. So the trust and praise of the customers is what we most want. We will accompany you throughout the review process from the moment you buy NS0-185 Real Exam. We will provide you with 24 hours of free online services to let you know that our NS0-185 study materials are your best tool to pass the exam.

## Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q86-Q91):

### NEW QUESTION # 86

During an installation of an AFF A400 cluster, you need to configure secure multitenancy. What will enable you to accomplish this task?

- A. VLANs
- B. broadcast domains
- C. failover groups
- D. IPspaces

**Answer: D**

Explanation:

Secure multitenancy in ONTAP requires complete separation of network traffic, routing tables, and IP addressing. IPspaces provide this level of isolation by creating independent network stacks within a single ONTAP cluster.

Failover groups, VLANs, and broadcast domains organize network paths but do not isolate routing domains.

Only IPspaces ensure tenants cannot access each other's network traffic.

Thus, IPspaces enable secure multitenancy.

### NEW QUESTION # 87

You create a new CIFS data LIF with the default failover group. In this scenario, where will the new LIF fail over if the node that owns the new LIF panics?

- A. to any available port in the same subnet
- B. to any port in the cluster that is administratively up
- C. to any port in the cluster that is operationally up
- D. to any available port listed in the broadcast domain

**Answer: D**

Explanation:

Default failover groups are defined by broadcast domains. Therefore, the LIF fails over to any operational port in the broadcast domain.

### NEW QUESTION # 88

You are a NetApp Professional Services engineer. You have completed an ONTAP cluster installation and need to collect configuration information to enable creation of a Service Event Report (SER).

Which tool would you use?

- A. ONTAP System Manager
- B. NetAppDocs output report
- C. Active IQ scheduled reports
- D. Active IQ Config Advisor worksheet

**Answer: B**

Explanation:

Service Event Reports require standardized installation and configuration data. NetAppDocs generates structured output reports specifically designed for SER creation, including hardware, cabling, and configuration details. Other tools do not produce SER-formatted documentation.

### NEW QUESTION # 89

An administrator issued the cluster setup command and configured a 2-node ONTAP 9.8 cluster.

In this scenario, which tool would the administrator use to validate the configuration?

- A. Active IQ Config Advisor
- B. Interoperability Matrix Tool
- C. NetAppDocs
- D. Active IQ Upgrade Advisor

**Answer: A**

Explanation:

After cluster setup, NetApp best practices require validating hardware, cabling, HA configuration, and system settings. Active IQ Config Advisor is the primary tool used for post-installation validation. It checks cabling correctness, HA pathing, disk ownership, network configuration, firmware versions, and other critical installation parameters.

The other tools listed are used for planning, documentation, or upgrades, not configuration validation.

### NEW QUESTION # 90

You completed a 2-node AFF A700 installation according to the poster. You run the disk show -fields owner command and notice that all drives are assigned to node 1.

In this scenario, which tool would you use to access documentation and guidelines to solve the issue?

- A. NetAppDocs
- B. Active IQ Unified Manager
- C. NET2
- D. Active IQ One Collect

**Answer: A**

Explanation:

NetAppDocs provides official installation documentation, posters, and step-by-step guidelines. It is the correct resource for resolving disk ownership and installation workflow issues.

### NEW QUESTION # 91

.....

Our Network Appliance NS0-185 desktop and web-based practice software are embedded with mock exams, just like the actual Network Appliance Data Center certification exam. The ITpassLeader designs its mock papers so smartly that you can easily prepare for the NetApp Storage Installation Engineer, ONTAP Professional Exam exam. All the essential questions are included, which have a huge chance of appearing in the real NetApp Storage Installation Engineer, ONTAP Professional Exam exam. Our mock exams may be customized so that you can change the topics and timings for each exam according to your preparation.
