Salesforce Certified Slack Administrator Sample Questions (Q155-Q160):

NEW QUESTION # 155

When advising team members on the best practices of threading, what should you tell them is an effective way of using threads?

- A. To add responses such as "thank you" or "I'm looking into it" without cluttering the channel needlessly
- **B. To make multiple discussions in the same channel easier to follow**
- C. To ensure that others in a channel will be notified of new messages
- D. To use slash commands without disturbing the rest of the channel members

Answer: B

Explanation:

Slack encourages using threads to keep conversations organized and prevent clutter in busy channels.

Official Slack documentation says:

"Threads help organize conversations around specific messages, allowing multiple discussions to happen simultaneously within a single channel without causing confusion." While thanking or quick responses (Option B) can also be done in threads, the primary reason for using threads is to manage multiple discussions efficiently.

NEW QUESTION # 156

Medium Inc is on a Standard Slack plan and has recently hired Preethi as a contractor to take care of their food & beverage service. Preethi is on a six-month contract, supporting many teams within the food & beverage department. Each team has set up a public channel to triage requests, and Preethi is responsible for responding to these requests.

What type of workspace access would be most suitable for Preethi?

- A. Member with no deactivation time
- B. Member with deactivation time in six months
- **C. Multi-channel Guest with deactivation time in six months**
- D. Single-channel Guest with deactivation time in six months

Answer: C

Explanation:

Since Preethi needs access to multiple channels but only for a limited time:

"A Multi-channel Guest is the best choice when someone needs access to more than one channel but does not need full member access across the workspace. You can also set an expiration date for their access." Single-channel Guest would be too limiting, and full Member access would provide more access than necessary, posing a security risk.

NEW QUESTION # 157

When a workspace's settings are changed to make single sign-on (SSO) mandatory, which series of events will members experience?

(Select the best answer.)

- A. They'll receive an email that contains a link they'll use to connect and authenticate their Slack account with their account in their SSO provider.
- B. They'll receive a Slackbot message in the workspace requiring them to click an authentication link to validate SSO.
- C. They'll receive a notification from their SSO provider and be logged out immediately from the Slack workspace.
- D. They'll be immediately logged out and be required to authenticate their identity using SSO before logging back in.

Answer: A

Explanation:

When SSO is made mandatory in Slack:

"Members will receive an email containing a link to connect their Slack account with their identity provider account. They must complete the connection by following the link and authenticating via the SSO provider." Members are not immediately logged out or forced to reauthenticate before they complete the linking process (which rules out B and C). The correct and supported flow involves an email-based linking process.

NEW QUESTION # 158

You're a Slack admin creating a list of default prefixes. You want to provide employees with standard naming conventions to use when they create new channels.

After reviewing existing channels, you determine that there are three types of channels most often created: * Slack Connect channels for collaborating with partners.

* Channels for groups within a line of business.

* Channels to support collaboration on specific engagements.

What are the three best prefixes to add to your default list?

(Select the THREE best answers.)

- A. #proj-
- B. #help
- C. #team-
- D. announce
- E. #ext-
- F. #slack

Answer: A,C,E

Explanation:

Slack best practices for channel naming recommend:

"#team- for department or functional groups, #proj- for project-based collaboration, and #ext- for Slack Connect (external) channels."

#announce (B) is more suitable for announcement-type channels, not team/project work. #help (C) is generally for support channels.

#slack (E) is not a standard naming prefix.

NEW QUESTION # 159

You're a Workspace Admin on the Slack Pro plan.

Your compliance team asks you to prevent users from creating free workspaces with their organization email addresses.

What should you recommend?

- A. Ask your Org Owner to enable two-factor authentication (2FA).
- B. Stay on the Slack Pro plan, and enable domain claiming.
- C. Upgrade to the Slack Enterprise Grid plan, and enable domain claiming.
- D. Upgrade to the Slack Business+ plan, and enable Enterprise Key Management (EKM).

Answer: C

Explanation:

Slack domain claiming is:

"Only available on Enterprise Grid, allowing an organization to reserve its domain and prevent users from creating independent Slack workspaces with corporate emails." Pro plan (A) cannot support domain claiming. EKM (B) secures encryption keys, unrelated to domain claiming. 2FA (D) enhances authentication but doesn't block workspace creation.
