This includes architects, consultants, and administrators who have a deep understanding of identity and access management concepts and technologies.

## Salesforce Certified Identity and Access Management Architect Sample Questions (Q23-Q28):

### NEW QUESTION # 23

Northern Trail Outfitters (NTO) wants to give customers the ability to submit and manage issues with their purchases. It is important for to give its customers the ability to login with their Facebook and Twitter credentials.

Which two actions should an identity architect recommend to meet these requirements?

Choose 2 answers

- **A. Configure a predefined authentication provider for Twitter.**
- B. Create a custom external authentication provider for Facebook.
- **C. Configure a predefined authentication provider for Facebook.**
- D. Create a custom external authentication provider for Twitter.

**Answer: A,C**

Explanation:

Explanation

To give customers the ability to login with their Facebook and Twitter credentials, the identity architect should configure a predefined authentication provider for Facebook and a predefined authentication provider for Twitter. Authentication providers are configurations that enable users to authenticate with an external identity provider and access Salesforce resources. Salesforce provides predefined authentication providers for some common identity providers, such as Facebook and Twitter, which can be easily configured with minimal customization. Creating a custom external authentication provider is not necessary for this scenario.

### NEW QUESTION # 24

Universal Containers (UC) uses a home-grown Employee portal for their employees to collaborate. UC decides to use Salesforce Ideas to allow employees to post Ideas from the Employee portal. When users click on some of the links in the Employee portal, the users should be redirected to Salesforce, authenticated, and presented with the relevant pages. What OAuth flow is best suited for this scenario?

- A. Web Application flow
- **B. Web Server flow**
- C. User-Agent flow
- D. SAML Bearer Assertion flow

**Answer: B**

### NEW QUESTION # 25

Northern Trail Outfitters (NTO) has a requirement to ensure all user logins include a single multi-factor authentication (MFA) prompt. Currently, users are allowed the choice to login with a username and password or via single sign-on against NTO's corporate Identity Provider, which includes built-in MFA.

Which configuration will meet this requirement?

- **A. Enable "MFA for User Interface Logins" for your organization from Setup -> Identity Verification.**
- B. Create and assign a permission set to all employees that includes "MFA for User Interface Logins."
- C. For all employee profiles, set the Session Level Required at Login to High Assurance and add the corporate identity provider to the High Assurance list for the org's Session Security Levels.
- D. Create a custom login flow that enforces MFA and assign it to a permission set. Then assign the permission set to all employees.

**Answer: A**

Explanation:

Explanation

Enabling "MFA for User Interface Logins" for the organization is the simplest way to ensure that all user logins include a single MFA prompt. This setting applies to both direct logins and SSO logins, and overrides any other MFA settings at the profile or permission set level. Enforcement

### NEW QUESTION # 26

A university is planning to set up an identity solution for its alumni. A third-party identity provider will be used for single sign-on. Salesforce will be the system of records. Users are getting error messages when logging in. Which Salesforce feature should be used to debug the issue?

- A. Debug Logs
- B. Apex Exception Email
- C. View Setup Audit Trail
- **D. Login History**

**Answer: D**

### NEW QUESTION # 27

Universal Containers (UC) is looking to purchase a third-party application as an Identity Provider. UC is looking to develop a business case for the purchase in general and has enlisted an Architect for advice. Which two capabilities of an Identity Provider should the Architect detail to help strengthen the business case? Choose 2 answers

- A. The Identity Provider can authenticate multiple social media accounts.
- **B. The Identity Provider can authenticate multiple applications.**
- **C. The Identity Provider can centralize enterprise password policy.**
- D. The Identity provider can store credentials for multiple applications.

**Answer: B,C**
