Best C-ACDET-2506 : SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Exam Torrent Provide Three Versions for choosing

If only you provide the scanning copy of the C-ACDET-2506 failure marks we will refund you immediately. If you have any doubts about the refund or there are any problems happening in the process of refund you can contact us by mails or contact our online customer service personnel and we will reply and solve your doubts or questions timely. We provide the best service and C-ACDET-2506 Test Torrent to you to make you pass the exam fluently but if you fail in we will refund you in full and we won't let your money and time be wasted. Our questions and answers are based on the real exam and conform to the popular trend in the industry.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which of the following classes are NOT frequently customized in SAP Ariba Strategic Sourcing solutions?

- A. SourcingProject
- **B. AbstractDocument**
- C. ContractWorkspace
- D. ExtendedAddressRep

Answer: B

Explanation:

Among the provided options, AbstractDocument is not frequently customized in SAP Ariba Strategic Sourcing projects. Commonly customized classes include ContractWorkspace, ExtendedAddressRep, and SourcingProject, as they relate directly to contracts, addresses, and sourcing projects—key business objects in the suite. AbstractDocument serves as a more generic superclass and typically does not require direct customization.

NEW QUESTION # 15

Custom partner bundles can be leveraged to share and apply baselines in which deployment scenario?

- A. Brownfield
- B. Grayfield
- **C. Greenfield**
- D. Bluefield

Answer: C

NEW QUESTION # 16

Users are able to publish a contract workspace without populating the Supplier field.

What action can be performed on the Supplier field to force population before publishing?

- **A. Enable Require value before publish**
- B. Configure a validity condition

- C. Configure a visibility condition
- D. Enable Required

Answer: A

NEW QUESTION # 17

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- **A. The templates are migrated by the tool, but the data must be loaded manually later.**
- B. Only the data of the flex master data templates is migrated; templates must be created manually.
- C. Neither the templates nor the data is migrated using the tool.
- D. Both the templates and their data are fully migrated by the tool.

Answer: A

Explanation:

In SAP Ariba, the migration tool (Intelligent Configuration Manager - ICM) migrates flex master data templates (the structure and definitions), but it does not migrate the actual master data records. The master data itself must be manually exported from the source and imported into the target environment after templates are migrated. This separation helps ensure data integrity and allows for more controlled migration processes.

NEW QUESTION # 18

A standard field is not available in reporting. A Greenfield customer needs to be able to report on the data captured in that standard field. How can this be achieved?

- A. The system makes all fields reportable after a system refresh.
- B. Under Field Configurations, search for the field in the appropriate class, mark the field reportable, save and publish.
- C. All standard fields are reportable by default.
- **D. Create a custom field that can be marked reportable, default the custom field to the standard field value, publish, and then pull the field into reporting.**

Answer: D

Explanation:

Some standard fields in SAP Ariba are not reportable by design and cannot be made reportable through configuration changes. The recommended workaround is to create a custom field that is marked as reportable, then set its default value to the standard field's value using an expression. Once published, this custom field can be included in reports, effectively surfacing the data previously inaccessible for reporting. System refreshes do not convert non-reportable standard fields to reportable. Marking the original standard field as reportable is not possible if the option is disabled by design.

NEW QUESTION # 19

.....

Solutions is commented SAP to ace your C-ACDET-2506 preparation and enable you to pass the final SAP C-ACDET-2506 with flying colors. To achieve this objective Exams. Solutions is offering updated, real, and error-free C-ACDET-2506 Exam Questions in three easy-to-use and compatible formats. These C-ACDET-2506 questions formats will help you in preparation.
