

Latest 1Z0-1072-25 Training & 1Z0-1072-25 Latest Test Format

DOWNLOAD the newest CertkingdomPDF 1Z0-1072-25 PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=1JVmeqexJ1o7yhHk4yeeB8YXX4xRI0uUU>

Do you want to pass 1Z0-1072-25 exam easily? 1Z0-1072-25 exam training materials of CertkingdomPDF is a good choice, which covers all the content and answers about 1Z0-1072-25 exam dumps you need to know. Then you can master the difficult points in a limited time, pass the 1Z0-1072-25 Exam in one time, improve your professional value and stand more closely to success.

Simplified language allows candidates to see at a glance. With this purpose, our 1Z0-1072-25 learning materials simplify the questions and answers in easy-to-understand language so that each candidate can understand the test information and master it at the first time, and they can pass the test at their first attempt. Our experts aim to deliver the most effective information in the simplest language. Each candidate takes only a few days can attend to the 1Z0-1072-25 Exam. In addition, our 1Z0-1072-25 1Z0-1072-25 provides end users with real questions and answers. We have been working hard to update the latest 1Z0-1072-25 learning materials and provide all users with the correct 1Z0-1072-25 answers. Therefore, our 1Z0-1072-25 learning materials always meet your academic requirements.

Excellent Latest 1Z0-1072-25 Training & Passing 1Z0-1072-25 Exam is No More a Challenging Task

Our 1Z0-1072-25 study practice guide boosts the function to stimulate the real exam. The clients can use our software to stimulate the real exam to be familiar with the speed, environment and pressure of the real 1Z0-1072-25 exam and get a well preparation for the real exam. Under the virtual exam environment the clients can adjust their speeds to answer the 1Z0-1072-25 Questions, train their actual combat abilities and be adjusted to the pressure of the real test. They can also have an understanding of their mastery

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which policy would you write to provide admin access to all three of your existing admin groups for a shared Test compartment?

- A. Allow dynamic-group to manage all-resources in compartment Test where request.principal.group.tag.EmployeeGroup.Role='Admin'
- B. Allow any-user to manage all-resources in compartment Test where request.principal.group.tag.EmployeeGroup.Role='Admin'
- C. Allow group any-group to manage all-resources in compartment Test where request.principal.group.tag.EmployeeGroup.Role='Admin'
- **D. Allow all-group to manage all-resources in compartment Test where request.principal.group.tag.EmployeeGroup.Role='Admin'**

Answer: D

Explanation:

In Oracle Cloud Infrastructure (OCI), policies are written to define permissions for user groups. The correct policy to provide admin access to all three existing admin groups in a shared compartment (in this case, the "Test" compartment) would be:

"Allow all-group to manage all-resources in compartment Test where request.principal.group.tag.EmployeeGroup.Role='Admin'".

"Allow all-group": Grants access to all groups.

"to manage all-resources": Specifies full access permissions (manage includes all CRUD operations).

"in compartment Test": Limits the scope of the policy to the "Test" compartment.

"where request.principal.group.tag.EmployeeGroup.Role='Admin'": Adds a condition to restrict this admin-level access to only groups tagged with the role 'Admin'.

This policy ensures that only users in the groups tagged as Admin will be allowed to manage resources in the Test compartment, making it the most suitable choice for providing admin access.

OCI Policy Syntax Documentation

NEW QUESTION # 29

What would happen if you choose not to proactively reboot the instance before the scheduled maintenance due date?

- A. The instance will get terminated.
- B. You will receive another notification to reboot within the next 7 days.
- **C. The instance is either reboot-migrated or rebuilt in place for you.**
- D. You will receive another notification to reboot within the next 14 days.

Answer: C

Explanation:

In OCI, if you choose not to proactively reboot your instance before the scheduled maintenance due date, the system will handle the maintenance automatically to ensure that the instance remains operational.

Reboot-Migration or Rebuild in Place: If you don't reboot the instance yourself, OCI will automatically perform a reboot-migration or rebuild in place for the instance. This ensures that the instance is moved to new hardware or updated without your intervention, maintaining uptime and applying necessary updates or fixes.

Impact on Instance: The exact action taken (reboot-migration or rebuild in place) depends on the type of maintenance required.

However, either action will temporarily interrupt the instance, typically involving a reboot, but the instance's data and configuration will be preserved.

Relevant OCI Documentation:

Instance Maintenance

OCI Maintenance Events

These references discuss the procedures and options available for handling instance maintenance in OCI.

NEW QUESTION # 30

Which statement is NOT correct regarding the Oracle Cloud Infrastructure (OCI) File System snapshots?

- A. Snapshots are accessible under the root directory of the file system at .snapshot/name.
- **B. Even if nothing has changed within the file system since the last snapshot was taken, a new snapshot consumes more storage.**
- C. Before you can clone a file system, at least one snapshot must exist for the file system.
- D. Snapshots are a consistent, point-in-time view of your file systems.

Answer: B

Explanation:

In OCI File Storage, snapshots are point-in-time, read-only copies of a file system that do not immediately consume additional storage beyond the space needed to track changes.

Incorrect Statement: The statement that a new snapshot consumes more storage even if nothing has changed is incorrect. Snapshots are space-efficient; they only consume additional storage as changes are made to the file system after the snapshot is taken. If no changes are made between snapshots, the storage consumption remains minimal.

Correct Statements:

B . Before cloning a file system, at least one snapshot must exist, as the clone operation relies on this snapshot to create a copy.

C . Snapshots are accessible under the .snapshot directory, allowing users to view and restore files from specific snapshots.

D . Snapshots provide a consistent, point-in-time view of the file system, ensuring data integrity.

NEW QUESTION # 31

Which OCI service would you use to apply kernel security updates to all instances?

- A. Artifact Registry
- B. Container Registry
- **C. OS Management Service**
- D. Data Safe

Answer: C

Explanation:

The OS Management Service in Oracle Cloud Infrastructure (OCI) is designed to manage and maintain the operating systems of your compute instances. This service allows you to apply kernel security updates, manage package installations, and monitor the status of updates across all instances in your environment.

Kernel Security Updates: With OS Management Service, you can automate and schedule kernel updates, ensuring that all instances are up-to-date with the latest security patches. This helps maintain the security and integrity of your infrastructure without needing to manually update each instance.

Other Options:

Container Registry: Used for storing and managing container images, not for applying OS updates.

Data Safe: A service focused on database security, not applicable for OS-level updates.

Artifact Registry: A repository for storing and managing software artifacts, not related to OS management.

Relevant OCI Documentation:

OS Management Service Overview

This documentation provides details on how to use OS Management Service to handle kernel security updates and other OS-level management tasks.

NEW QUESTION # 32

Which authentication option should you use to ensure third-party APIs communicate with OCI resources?

- A. OCI Username and Password
- B. SSH Key Pair with 2048-bit algorithm
- C. Auth Tokens
- **D. API Signing Key**

Answer: D

Explanation:

When ensuring that third-party APIs communicate securely with OCI resources, the appropriate authentication option is API Signing Key.

API Signing Key: This method uses an RSA key pair to authenticate and sign API requests. The API signing key provides a secure and reliable way to ensure that the API requests to OCI are coming from an authorized source. It is commonly used for programmatic access to OCI services.

Other Options:

SSH Key Pair: Primarily used for secure shell access to compute instances, not for API authentication.

Auth Tokens: Typically used for authentication in environments where APIs don't support the API Signing Key, such as OCI CLI or SDKs.

OCI Username and Password: Generally used for the Console login, not for securing API communications.

Relevant OCI Documentation:

API Signing Key Authentication

This documentation provides details on using API Signing Keys for secure API communication in OCI.

NEW QUESTION # 33

.....

1Z0-1072-25 actual test not only are high-quality products, but also provided you with a high-quality service team. Our CertkingdomPDF platform is an authorized formal sales platform. Since the advent of 1Z0-1072-25 prep torrent, our products have been recognized by thousands of consumers. Everyone in 1Z0-1072-25 exam torrent ' team has gone through rigorous selection and training. We understand the importance of customer information for our customers. And we will strictly keep your purchase information confidential and there will be no information disclosure. At the same time, the content of 1Z0-1072-25 Exam Torrent is safe and you can download and use it with complete confidence.
