ExamsReviews helps candidates overcome all the difficulties they may encounter in their exam preparation. To ensure the candidates' satisfaction, ExamsReviews has a support team that is available 24/7 to assist with a wide range of issues.

## Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q25-Q30):

NEW QUESTION # 25

You have an Azure subscription that contains the virtual networks shown in the following table.

You have a virtual machine named VM5 that has the following IP address configurations:

- \* IP address: 10.4.0.5
- \* Subnet mask: 255.255.255.0
- \* Default gateway: 10.4.0.1
- \* DNS server: 168.63.129.16

You have an Azure Private DNS zone named, fabrikam.com that contains the records shown in the following table.

The virtual network links in the fabrikam.com DNS zone are configured as shown in the exhibit. (Click the Exhibit tab.) VMS fails to resolve the IP address for appK.fabrikam.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 26

You need to implement name resolution for the cloud.liwareinc.com. The solution must meet the networking requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 27

You have an Azure subscription that contains an app named App1. App1 is hosted on the Azure App Service instances shown in the following table.

You need to implement Azure Traffic Manager to meet the following requirements:

- \* App1 traffic must be assigned equally to each App Service instance in each Azure region.
- \* App1 traffic from North Europe must be routed to the App1 instances in the North Europe region.
- \* App1 traffic from North America must be routed to the App1 instances in the East US Azure region.

**Answer:**

Explanation:

### NEW QUESTION # 28

Your company has offices in New York and Amsterdam. The company has an Azure subscription.

Both offices connect to Azure by using a Site-to-Site VPN connection.

The office in Amsterdam uses resources in the North Europe Azure region. The office in New York uses resources in the East US Azure region.

You need to implement ExpressRoute circuits to connect each office to the nearest Azure region.

Once the ExpressRoute circuits are connected, the on-premises computers in the Amsterdam office must be able to connect to the on-premises servers in the New York office by using the ExpressRoute circuits.

Which ExpressRoute option should you use?

- A. ExpressRoute Local
- B. ExpressRoute FastPath
- C. ExpressRoute Global Reach
- D. ExpressRoute Direct
