NEW QUESTION # 135

Which of the following roles may be substituted for a Scrum Master?

- **A. Team Leader**
- B. Product Owner
- C. Developer
- D. Project Manager

Answer: A

Explanation:

Comprehensive and Detailed 150 to 300 words Explanation From Exact Extract of Agile Project Management (paraphrased to avoid lengthy quotation):

In AgilePM (DSDM), the Team Leader role closely aligns with the facilitative, servant-leadership responsibilities commonly associated with a Scrum Master in Scrum. The Team Leader is accountable for enabling collaborative working, removing impediments, fostering continuous improvement, and protecting the team's focus within timeboxes—all hallmarks of Scrum Mastery. While titles differ across frameworks, AgilePM explicitly positions Team Leader as the day-to-day lead for the Solution Development Team, emphasizing facilitation, coaching, and ensuring adherence to agreed practices (e.g., MoSCoW prioritization, Definition of Done/quality criteria). By contrast, a Project Manager in AgilePM is a project-level role focused on governance and business case stewardship; a Product Owner (AgilePM's Business Visionary/Business Ambassador combination) prioritizes value and backlog—this is not a facilitation role; and a Developer focuses on building the solution. Therefore, when mapping roles between Scrum and AgilePM, the Team Leader most naturally substitutes for, or corresponds to, the Scrum Master responsibilities, ensuring servant leadership without shifting into command-and-control behavior.
