Trusting Authorized Latest PEGACPRSA22V1 Study Plan in TopExamCollection Is The Valid Way to Pass Certified Pega Robotics System Architect 22

I would like to bring to you kind attention that our latest Pegasystems PEGACPRSA22V1 study guide is produced. These exam materials are high passing rate. We are sure that PEGACPRSA22V1 study guide will be the best assist for your coming exam. We guarantee "No Pass Full Refund". If you feel depressed about your past failure and eager to look for Valid PEGACPRSA22V1 Study Guide, I advise you to reply to our exam materials as 100% passing without any doubt. Thousands of candidates' choice for our PEGACPRSA22V1 study guide will be your wise decision.

Pegasystems PEGACPRSA22V1 Exam is a comprehensive certification exam that tests the knowledge and skills of individuals who wish to become certified Pega Robotics System Architects. It covers a broad range of topics related to Pega Robotics technology, including developing, deploying, and managing robotic automation solutions. With the increasing demand for automation and robotics solutions, obtaining a Pega Robotics System Architect certification can be a valuable asset for individuals looking to advance their

career in this field.

The Pega Robotics System Architect 22 certification is recognized globally and is highly valued by organizations that use Pega Robotic Automation to automate their business processes. Certified Pega Robotics System Architect 22 certification is an excellent way to demonstrate your expertise in Pega Robotics and set yourself apart from other professionals in the field.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q27-Q32):

NEW QUESTION # 27

You add a MessageDialog component to an automation. Based on the following image, which option shows the configuration settings that generates the message dialog?

- A. Exhibit C
- B. Exhibit A
- C. Exhibit D
- D. Exhibit B

Answer: C

NEW QUESTION # 28

A service request manager, who responds to 1000 active service tickets per week, receives a ticket for new account creation. This ticket has been marked as the highest priority and contains all the necessary details for an account creation.

The manager creates an activity and assigns all the context values with appropriate values.

Which two activity methods of the account creation ticket can be used to close the ticket within priority?

(Choose two.)

- A. StartNow
- B. StartNowAndWait
- C. Start
- D. StartAndWait

Answer: C,D

NEW QUESTION # 29

Deploying a robotic project to Pega Robot Manager requires configuring the Pega server and credentials.

The server connectivity settings can be set up or adjusted in several ways.

Which three of the following options are methods to set up or adjust the Pega Server settings? (Choose Three)

- A. Rerun the Pega Robot Studio installation and configure the server settings.
- B. Manually edit the PegaStudioConfig.xml file from the Tools menu in Pega Robot Studio.
- C. Configure the server settings during the initial installation of Pega Robot Studio.
- D. Edit the Server Connectivity settings in the Tools menu in Pega Robot Studio.
- E. Edit the Change Server fields during the deployment process.

Answer: C,D,E

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

Pega Robot Studio provides multiple ways to configure or modify Pega Server connectivity settings used for Robot Manager deployment. These settings define the server URL, operator credentials, and authentication method.

According to the Pega Robotics System Design and Implementation Guide, section "Configuring Pega Server Connectivity":

"Server connectivity settings can be specified in multiple ways within Pega Robot Studio:

* During the initial installation process, when prompted to enter Robot Manager URL and credentials.

* By navigating to the Tools # Options # Server Connectivity menu to edit or test server details.

* By adjusting the Change Server fields that appear during the deployment process to override existing configurations. Manual editing of XML files is not recommended for changing server connectivity settings." Detailed Reasoning:

* A. Edit the Change Server fields during the deployment process - Correct. The deployment wizard allows adjusting or overriding

existing server settings.

* B. Configure the server settings during the initial installation of Pega Robot Studio - Correct. The installation wizard prompts for server setup.

* C. Rerun the Pega Robot Studio installation and configure the server settings - Not necessary unless reinstallation is required.

* D. Manually edit the PegaStudioConfig.xml file - Not recommended or supported for changing connectivity.

* E. Edit the Server Connectivity settings in the Tools menu in Pega Robot Studio - Correct. This is the standard interface to modify or test connection settings.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Server Connectivity and Deployment Configuration section (Pega Robotics 19.1 and later).

NEW QUESTION # 30

During application discovery of a Clarify application, you determine that the user accesses more than one customer case concurrently within the application, which creates multiple windows of the same type. This requires you to enable the UseKeys property on an application's object.

Based on the image that shows the application and the matched controls in the Object Explorer, which control's UseKeys property must be set to True?

□

- A. MdiClient
- **B. ClarifyCRM**
- C. Control
- D. _Case_1

Answer: B

Explanation:
