- B. Nominate a proxy Product Owner.
- C. Inform the Product Owner's functional manager.

Developers are accountable for creating a plan for the Sprint, which includes selecting items from Product Backlog that they can complete within a Sprint. The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide. They do this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization. Therefore, two valuable actions for a Scrum Master to take if the Product Owner is not collaborating with the Development Team during the Sprint are:

Bring up the problem in the Sprint Retrospective, where the Scrum Team can inspect how they worked together and create a plan for improvements.

Coach the Product Owner in the values of Scrum and incremental delivery, and help them understand their role and responsibilities in collaborating with Developers.

Every day, the Developers should understand how they intend to work together as a self-organizing team to accomplish the Sprint Goal and create the anticipated Increment by the end of the Sprint. Management external to the Scrum Team is not involved in the Daily Scrum, as they may interfere with the self-management and empowerment of the Developers.
