Study Materials, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our HPE6-A88 study materials well. We believe our perfect service will make you feel comfortable when you are preparing for your exam.

HPE Aruba Networking ClearPass Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

To enhance the guest login experience, an administrator is configuring the Pre-Authentication Check on an Aruba controller. Where should the administrator edit these settings?

- A. In the Login Form section of the web login page editor.
- B. In the certificate management section of the controller interface.
- C. In the network policies section of the controller.

Answer: A

Explanation:

Pre-Authentication Check behavior is controlled within the web login page configuration. Editing the Login Form section allows the administrator to define checks and logic that occur before credentials are submitted, improving the guest login experience.

NEW QUESTION # 23

Which protocol does ClearPass use to communicate with network devices for authentication?

- A. SMTP
- B. SNMP
- C. RADIUS
- D. FTP

Answer: C

Explanation:

ClearPass uses RADIUS (Remote Authentication Dial-In User Service) for authentication, authorization, and accounting in network access control.

NEW QUESTION # 24

What two benefits does integrating ClearPass Guest with a captive portal provide?

(Choose two)

Response:

- A. Restricting access to unauthorized applications
- B. Branding the login experience with custom HTML/CSS
- C. Dynamic endpoint patching
- D. Controlling access duration and bandwidth limits

Answer: B,D

NEW QUESTION # 25

In a university setting where users often connect more than five devices to the network, an IT administrator notices some devices are problematic and require frequent upgrades. How can ClearPass assist in identifying the impact of these upgrades?

- A. By automatically upgrading all devices to the latest firmware
- B. By blocking all problematic devices from connecting to the network
- C. By profiling devices and allowing the administrator to see the types and number of devices affected quickly

Answer: C

Explanation:

ClearPass can profile connected devices to identify their types, operating systems, and connection details. This allows the administrator to assess how many and which kinds of devices are impacted by upgrades or issues, providing valuable visibility

without disrupting network access.

NEW QUESTION # 26

A company is setting up a RADIUS server for their wireless network authentication. They want to use a certificate with a generic CN for all their ClearPass RADIUS servers. What must they ensure for the certificate to be valid for the clients managed by an Active Directory domain?

- A. The CN must match the exact hostname of each RADIUS server.
- B. The SAN must include the IP addresses of all RADIUS servers.
- C. The domain component of the CN must be a domain that the client can verify.

Answer: C

Explanation:

For domain-managed clients, certificate trust validation requires that the certificate's common name belong to a domain the client can verify through Active Directory trust. Using a generic CN is acceptable as long as its domain component is trusted by the client, allowing successful RADIUS authentication.

NEW QUESTION # 27

.....

There are three different versions for all customers to choose. The three different versions include the PDF version, the software version and the online version, they can help customers solve any questions and meet their all needs.
