BONUS!!! Download part of TestKingFree Professional-Cloud-Database-Engineer dumps for free: <https://drive.google.com/open?id=1fCHMyKtOriNCM4H85O1Gb03Q1H4FrRJ>

TestKingFree has come up with the latest and real Google Professional-Cloud-Database-Engineer Exam Dumps that can solve these drastic problems for you. We guarantee that these questions will be enough for you to clear the Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) examination on the first attempt. Doubtlessly, cracking the Google Professional-Cloud-Database-Engineer test of the Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) credential is one tough task but this task can be made easier if you prepare with Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) practice questions of TestKingFree.

Google Professional-Cloud-Database-Engineer certification exam is a challenging and in-depth exam that requires a deep understanding of foundational database concepts, as well as advanced knowledge of Google Cloud Platform's database services. Candidates who successfully complete the Google Cloud Certified - Professional Cloud Database Engineer exam demonstrate their expertise in designing, implementing, and managing databases on the Google Cloud Platform.

The Google Professional-Cloud-Database-Engineer exam consists of multiple-choice and multiple-select questions that are designed to test the candidate's knowledge of various database technologies and their ability to apply that knowledge to real-world scenarios. Professional-Cloud-Database-Engineer Exam covers topics such as database design, data modeling, database migration, replication, backup and recovery, performance optimization, and security. Candidates are expected to have a deep understanding of SQL and should be familiar with various database management systems such as MySQL, PostgreSQL, and Oracle.

Regualer Professional-Cloud-Database-Engineer Update | Online Professional-Cloud-Database-Engineer Bootcamps

Don't ask me why you should purchase Professional-Cloud-Database-Engineer valid exam prep, yes, of course it is because of its passing rate. As every one knows IT certificaion is difficult to pass, its passing rate is low, if you want to save exam cost and money, choosing a Professional-Cloud-Database-Engineer Valid Exam Prep will be a nice option. TestKingFree release the best exam preparation materials to help you exam at the first attempt. A good Professional-Cloud-Database-Engineer valid exam prep will make you half the work with doubt the results.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q74-Q79):

NEW QUESTION # 74

Your organization has an existing app that just went viral. The app uses a Cloud SQL for MySQL backend database that is experiencing slow disk performance while using hard disk drives (HDDs). You need to improve performance and reduce disk I/O wait times. What should you do?

- A. Create a read replica of the instance with SSDs, and perform a failover to the new instance
- B. Edit the instance to change the storage type from HDD to SSD.
- C. Create a high availability (HA) failover instance with SSDs, and perform a failover to the new instance.
- D. Export the data from the existing instance, and import the data into a new instance with solid-state drives (SSDs).

Answer: D

Explanation:

<https://stackoverflow.com/questions/72034607/can-i-change-storage-type-from-hdd-to-ssd-on-cloud-sql-after-creating-an-instance>

NEW QUESTION # 75

You are using Compute Engine on Google Cloud and your data center to manage a set of MySQL databases in a hybrid configuration. You need to create replicas to scale reads and to offload part of the management operation. What should you do?

- A. Use Cloud SQL for MySQL external replica.
- B. Use Data Migration Service.
- C. Use external server replication.
- D. Use the mysqldump utility and binary logs.

Answer: B

NEW QUESTION # 76

Your organization stores marketing data such as customer preferences and purchase history on Bigtable. The consumers of this database are predominantly data analysts and operations users. You receive a service ticket from the database operations department citing poor database performance between 9 AM-10 AM every day. The application team has confirmed no latency from their logs. A new cohort of pilot users that is testing a dataset loaded from a third-party data provider is experiencing poor database performance. Other users are not affected. You need to troubleshoot the issue. What should you do?

- A. Add more nodes to the Bigtable cluster.
- B. Isolate the data analysts and operations user groups to use different Bigtable instances.
- C. Check the Cloud Monitoring table/bytes_used metric from Bigtable.
- D. Use Key Visualizer for Bigtable.

Answer: C

NEW QUESTION # 77

Your organization is running a critical production database on a virtual machine (VM) on Compute Engine. The VM has an ext4-formatted persistent disk for data files. The database will soon run out of storage space. You need to implement a solution that avoids downtime. What should you do?

- A. In the Google Cloud Console, create a snapshot of the persistent disk, restore the snapshot to a new larger disk, unmount the old disk, mount the new disk, and restart the database service.
- B. In the Google Cloud Console, increase the size of the persistent disk, and use the `resize2fs` command to extend the disk.
- C. In the Google Cloud Console, increase the size of the persistent disk, and use the `fdisk` command to verify that the new space is ready to use
- D. In the Google Cloud Console, create a new persistent disk attached to the VM, and configure the database service to move the files to the new disk.

Answer: D

NEW QUESTION # 78

Your digital-native business runs its database workloads on Cloud SQL. Your website must be globally accessible 24/7. You need to prepare your Cloud SQL instance for high availability (HA). You want to follow Google-recommended practices. What should you do? (Choose two.)

- A. Configure single zone availability for automated backups.
- **B. Enable point-in-time recovery.**
- C. Set up manual backups.
- D. Schedule automated backups.
- **E. Create a PostgreSQL database on-premises as the HA option.**

Answer: B,E

NEW QUESTION # 79

.....

Nowadays everyone is interested in the field of Google because it is growing rapidly day by day. The Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) credential is designed to validate the expertise of candidates. But most of the students are confused about the right preparation material for Professional-Cloud-Database-Engineer Exam Dumps and they couldn't find real Professional-Cloud-Database-Engineer exam questions so that they can pass Google Professional-Cloud-Database-Engineer certification exam in a short time with good grades.
