

# CCAAK Exam Preparation & CCAAK Exam Questions & CCAAK Online Test

BONUS!!! Download part of Itcertkey CCAAK dumps for free: [https://drive.google.com/open?id=1cL2vuNuYk\\_EU5zlhqd7yM7hfdmjRW2jq](https://drive.google.com/open?id=1cL2vuNuYk_EU5zlhqd7yM7hfdmjRW2jq)

Through the stimulation of the CCAAK real exam the clients can have an understanding of the mastery degrees of our CCAAK exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way. In the answers, our experts will provide the authorized verification and detailed demonstration so as to let the learners master the latest information timely and follow the trend of the times. All we do is to integrate the most advanced views into our CCAAK Test Guide.

## Confluent CCAAK Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                    |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>• Kafka Connect: This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.</li></ul>               |
| Topic 2 | <ul style="list-style-type: none"><li>• Troubleshooting: This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.</li></ul> |
| Topic 3 | <ul style="list-style-type: none"><li>• Apache Kafka® Cluster Configuration: This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.</li></ul>                                                 |

## Best Features of Confluent CCAAK PDF Dumps Format

After so many years' development, our Confluent Certified Administrator exam torrent is absolutely the most excellent than other competitors, the content of it is more complete, the language of it is more simply. Believing in our CCAAK guide tests will help you get the certificate and embrace a bright future. Time and tide wait for no man. Come to buy our test engine. Itcertkey have most professional team to compiled and revise CCAAK Exam Question. In order to try our best to help you pass the exam and get a better condition of your life and your work, our team worked day and night to complete it. Moreover, only need to spend 20-30 is it enough for you to grasp whole content of our practice materials that you can pass the exam easily, this is simply unimaginable.

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q43-Q48):

### NEW QUESTION # 43

You have a Kafka cluster with topics t1 and t2. In the output below, topic t2 shows Partition 1 with a leader "-1". What is the most likely reason for this?

```
...
$ kafka-topics --zookeeper localhost:2181 --describe --topic t1
Topic:t1 PartitionCount 1 ReplicationFactor 1 Configs:
Topic: t1 Partition: 0 Leader: 0 Replicas: 0 Isr: 0
$ kafka-topics --zookeeper localhost:2181 --describe --topic t2
Topic:t2 PartitionCount 2 ReplicationFactor 1 Configs:
Topic: t2 Partition: 0 Leader: 0 Replicas: 0 Isr: 0
Topic: t2 Partition: 1 Leader: -1 Replicas: 1 Isr:
```

- A. Compression has been enabled on Broker 1.
- B. Broker 1 has another partition clashing with the same name.
- C. Broker 1 failed.
- D. Leader shows "-1" while the log cleaner thread runs on Broker 1.

**Answer: C**

Explanation:

A Leader of -1 indicates that no broker is currently the leader for that partition. This usually happens when the only replica for that partition is unavailable, often due to the associated broker (in this case, Broker 1) failing or being offline. Kafka cannot elect a leader if no replica is in the in-sync replica (ISR) list, which leads to leader = -1.

### NEW QUESTION # 44

Which of the following are Kafka Connect internal topics? (Choose three.)

- A. connect-configs
- B. connect-distributed
- C. connect-standalone
- D. connect-status
- E. connect-offsets

**Answer: A,D,E**

Explanation:

connect-configs stores connector configurations.

connect-status tracks the status of connectors and tasks (e.g., RUNNING, FAILED).

connect-offsets stores source connector offsets for reading from external systems.

### NEW QUESTION # 45

How does Kafka guarantee message integrity after a message is written on a disk?

- A. A message cannot be altered once it has been written.  
C A message can be grouped with message sharing the same key to improve read performance
- B. Only message metadata can be altered using command line (CLI) tools.
- C. A message can be edited by the producer, producing to the message offset.

**Answer: A**

Explanation:

Kafka ensures message immutability for data integrity. Once a message is written to a Kafka topic and persisted to disk, it cannot be modified. This immutability guarantees that consumers always receive the original message content, which is critical for auditability, fault tolerance, and data reliability.

#### NEW QUESTION # 46

Which secure communication is supported between the REST proxy and REST clients?

- A. MD5
- B. SCRAM
- C. Kerberos
- **D. TLS (HTTPS)**

**Answer: D**

#### NEW QUESTION # 47

If the Controller detects the failure of a broker that was the leader for some partitions, which actions will be taken? (Choose two.)

- **A. The Controller sends the new leader and ISR list changes to all brokers.**
- B. The Controller sends the new leader and ISR list changes to all producers and consumers.
- **C. The Controller persists the new leader and ISR list to ZooKeeper.**
- D. The Controller waits for a new leader to be nominated by ZooKeeper.

**Answer: A,C**

Explanation:

The Controller updates ZooKeeper with the new leader and in-sync replica (ISR) information to maintain metadata consistency. Brokers need this information to correctly route client requests and continue replication.

#### NEW QUESTION # 48

.....

The countless Confluent Certified Administrator for Apache Kafka (CCAAK) exam candidates have already passed their dream Confluent CCAAK certification exam and they all have got help from Confluent CCAAK Exam Questions. You can also trust Confluent CCAAK exam practice test questions and start preparation right now.
