CCAAK Real Questions - Top CCAAK Exam Dumps

BONUS!!! Download part of DumpsValid CCAAK dumps for free: https://drive.google.com/open?id=15f0EtflFDiwXVrOj6CEteOcYofipRwpe

You can take advantage of several perks if you buy DumpsValid's bundle package of Confluent CCAAK dumps. The bundle package is cost-effective and includes all three formats of Confluent Certified Administrator for Apache Kafka exam preparation material Confluent CCAAK PDF Dumps Questions Answers, and Confluent CCAAK Practice Test software (online and offline). Confluent CCAAK Dumps are worth trying while preparing for the exam. You will be sure of what Confluent CCAAK exam questions will be asked in the exam.

We have compiled the CCAAK test guide for these candidates who are trouble in this exam, in order help they pass it easily, and we deeply believe that our CCAAK exam questions can help you solve your problem. Believe it or not, if you buy our study materials and take it seriously consideration, we can promise that you will easily get the certification that you have always dreamed of. We believe that you will never regret to buy and practice our CCAAK latest question.

Top CCAAK Exam Dumps | CCAAK Reliable Test Price

DumpsValid is a trusted and reliable platform that has been helping Confluent Certified Administrator for Apache Kafka (CCAAK) exam candidates for many years. Over this long time period countless Confluent CCAAK exam questions candidates have passed their dream CCAAK Certification Exam. They all got help from DumpsValid Confluent Exam Questions and easily passed their challenging CCAAK pdf exam.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	• Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.

Topic 2	• Kafka Connect: This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.
Topic 3	• Troubleshooting: This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.
Topic 4	• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.
Topic 5	• Apache Kafka® Security: This section of the exam measures skills of a Site Reliability Engineer and focuses on securing Kafka environments. It includes authentication mechanisms such as TLS and SASL, authorization using ACLs, and encrypting data at rest and in transit to ensure secure communication and access control.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q44-Q49):

NEW QUESTION # 44
Which connector type takes data from a topic and sends it to an external data system?

- A. Streams Connector
- B. Source Connector
- C. SvsIog Connector
- D. Sink Connector

Answer: D

Explanation:
A Sink Connector reads data from a Kafka topic and writes it to an external data system, such as a database, file system, or cloud service.

NEW QUESTION # 45
How can authentication for both internal component traffic and external client traffic be accomplished?

- A. Configure multiple brokers.
- B. Configure multiple listeners on the broker.
- C. Configure LoadBalancer.
- D. Configure multiple security protocols on the same listener.

Answer: B

Explanation:
Kafka supports multiple listeners, each with its own port, hostname, and security protocol. This allows you to:
* Use one listener for internal communication (e.g., brokers, ZooKeeper, Connect, etc.) with one type of authentication (e.g., PLAINTEXT or SASL).
* Use a separate listener for external clients (e.g., producers and consumers) with a different protocol (e.g., SSL or SASL_SSL).

NEW QUESTION # 46
Which property in broker configuration specifies that a broker belongs to a particular rack?
Which property in broker configuration specifies that a broker belongs to a particular rack?

- A. zookeeper.rack
- B. kafka.rack

- C. broker.rack
- D. client.rack

Answer: C

Explanation:
The broker.rack property is used in a Kafka broker's configuration to specify the rack or availability zone the broker belongs to. This is important for rack-aware replica placement, allowing Kafka to distribute replicas across different racks for fault tolerance.

NEW QUESTION # 47
Which valid security protocols are included for broker listeners? (Choose three.)

- A. SASL_SSL
- B. SASL
- C. GSSAPI
- D. PLAINTEXT
- E. SSL

Answer: A,D,E

NEW QUESTION # 48
Which of the following are Kafka Connect internal topics? (Choose three.)

- A. connect-configs
- B. connect-status
- C. connect-distributed
- D. connect-offsets
- E. connect-standalone

Answer: A,B,D

Explanation:
connect-configs stores connector configurations.
connect-status tracks the status of connectors and tasks (e.g., RUNNING, FAILED).
connect-offsets stores source connector offsets for reading from external systems.

NEW QUESTION # 49
......

Another significant challenge of undertaking a Confluent CCAAK exam is defining clear goals. Many students get bogged down by the volume of material they need to learn and lose sight of their goals. Thus, our Confluent CCAAK Real Exam Questions in three formats provide you with the clear cut CCAAK preparation materials and defined goals to comprehensively prepare in the shortest possible time.
