

# CCAAK Reliable Exam Materials & Practice CCAAK Mock

What's more, part of that BraindumpsIT CCAAK dumps now are free: <https://drive.google.com/open?id=1gt3ylaLSbkX9S6FHR3R5BpExjIXdneH0>

Due to extremely high competition, passing the Confluent Certified Administrator for Apache Kafka (CCAAK) exam is not easy; however, possible. You can use BraindumpsIT products to pass the Confluent Certified Administrator for Apache Kafka (CCAAK) exam on the first attempt. The Confluent Certified Administrator for Apache Kafka (CCAAK) practice exam gives you confidence and helps you understand the criteria of the testing authority and pass the Confluent Certified Administrator for Apache Kafka (CCAAK) exam on the first attempt.

With CCAAK study tool, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to CCAAK Exam Torrent based on constantly changing syllabus and industry development breakthroughs. We also hire dedicated staff to continuously update our question bank daily, so no matter when you buy CCAAK guide torrent, what you learn is the most advanced.

## Practice Confluent CCAAK Mock & CCAAK Testdump

Due to continuous efforts of our experts, we have exactly targeted the content of the CCAAK exam. You will pass the CCAAK exam after 20 to 30 hours' learning with our CCAAK study material. If you fail to pass the exam, we will give you a refund. Many users have witnessed the effectiveness of our CCAAK Guide braindumps you surely will become one of them. Try it right now! And we will let you down.

## Confluent CCAAK Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Kafka Connect:</b> This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Deployment Architecture:</b> This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Observability:</b> This section of the exam measures skills of a Site Reliability Engineer and focuses on monitoring Kafka clusters. It assesses knowledge of metrics, logging, and alerting tools, including how to use them to maintain cluster health and performance visibility.</li> </ul>

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q54-Q59):

### NEW QUESTION # 54

What is the relationship between topics and partitions? (Choose two.)

- A. A topic always has one partition.
- **B. A topic may have more than one partition.**
- C. There is no relationship between topics and partitions.
- **D. A partition is always linked to a single topic.**
- E. A partition may have more than one topic.

**Answer: B,D**

Explanation:

Kafka topics are split into one or more partitions to enable parallelism and scalability.

Each partition belongs to exactly one topic; it cannot span multiple topics.

### NEW QUESTION # 55

Which use cases would benefit most from continuous event stream processing? (Choose three.)

- **A. Context-aware product recommendations for e-commerce**
- **B. Fraud detection**
- C. End-of-day financial settlement processing
- D. Historical dashboards
- **E. Log monitoring/application fault detection**

**Answer: A,B,E**

Explanation:

Real-time analysis of transactions helps detect suspicious activity instantly.

Context-aware product recommendations for e-commerce requires real-time user behavior tracking to serve personalized recommendations.

Log monitoring/application fault detection needs immediate processing to alert on system issues or failures.

### NEW QUESTION # 56

Which statements are correct about partitions? (Choose two.)

- A. A partition in Kafka will be represented by a single segment on a disk.
- B. A partition size is determined after the largest segment on a disk.
- **C. A partition is comprised of one or more segments on a disk.**
- **D. All partition segments reside in a single directory on a broker disk.**

**Answer: C,D**

### NEW QUESTION # 57

You want to increase Producer throughput for the messages it sends to your Kafka cluster by tuning the batch size ('batch.size') and the time the Producer waits before sending a batch ('linger.ms').

According to best practices, what should you do?

- A. Decrease 'batch.size' and increase 'linger.ms'
- **B. Increase 'batch.size' and increase 'linger.ms'**
- C. Decrease 'batch.size' and decrease 'linger.ms'
- D. Increase 'batch.size' and decrease 'linger.ms'

**Answer: B**

Explanation:

Increasing batch.size allows the producer to accumulate more messages into a single batch, improving compression and reducing the number of requests sent to the broker.

Increasing linger.ms gives the producer more time to fill up batches before sending them, which improves batching efficiency and throughput.

This combination is a best practice for maximizing throughput, especially when message volume is high or consistent latency is not a strict requirement.

### NEW QUESTION # 58

Why does Kafka use ZooKeeper? (Choose two.)

- **A. To access information about the leaders and partitions**
- **B. For controller election**
- C. To prevent replication between clusters
- D. To scale the number of brokers in the cluster

**Answer: A,B**

Explanation:

ZooKeeper stores metadata such as partition leadership and ISR (in-sync replicas), which brokers use to coordinate.

Kafka uses ZooKeeper to perform leader election for the Controller broker, which manages cluster metadata and leadership changes.

### NEW QUESTION # 59

.....

BraindumpsIT is a leading platform that has been helping the CCAAK exam candidates for many years. Over this long time period, countless Confluent CCAAK exam candidates have passed their dream Confluent Certified Administrator for Apache Kafka (CCAAK) certification and they all got help from valid, updated, and Real CCAAK Exam Questions. So you can also trust the top standard of CCAAK exam dumps and start CCAAK practice questions preparation without wasting further time.
