

100% Pass 2026 Fortinet NSE5_FNC_AD-7.6: Authoritative Valid Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Exam Answers

In light of the truth that different people have various learning habits, we launch three NSE5_FNC_AD-7.6 training questions versions for your guidance. In addition, you can freely download the demo of NSE5_FNC_AD-7.6 learning materials for your consideration. We promise there will be no extra charges for such a try, on the contrary, we sincerely suggest you to try the demos of our NSE5_FNC_AD-7.6 Exam Questions and make a well-content choice. You will find that our NSE5_FNC_AD-7.6 training guide is worthy to buy for you time and money!

Now on the Internet, a lot of online learning platform management is not standard, some web information may include some viruses, cause far-reaching influence to pay end users and adverse effect. Choose the NSE5_FNC_AD-7.6 Study Tool, can help users quickly analysis in the difficult point, high efficiency of review, and high quality through the Fortinet NSE 5 - FortiNAC-F 7.6 Administrator exam, work for our future employment and increase the weight of the promotion, to better meet the needs of their own development.

>> Valid NSE5_FNC_AD-7.6 Exam Answers <<

Get Ready For Your Exam Quickly With NSE5_FNC_AD-7.6 PDF Dumps Format

We can promise that you would like to welcome this opportunity to kill two birds with one stone. If you choose our NSE5_FNC_AD-7.6 Test Questions as your study tool, you will be glad to study for your exam and develop self-discipline, our NSE5_FNC_AD-7.6 latest question adopt diversified teaching methods, and we can sure that you will have passion to learn by our products. We believe that our products will help you successfully pass your exam and hope you will like our product.

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q70-Q75):

NEW QUESTION # 70

An administrator wants each department to create and manage its own contractor accounts but not be able to manage contractor accounts for other departments.

What must the administrator configure to limit the sponsor's capabilities?

- A. The user/host profile applied to the contractor
- B. The contractor's template
- C. The portal settings on the kiosk portal page
- **D. The sponsor's administrative profile**

Answer: D

Explanation:

The sponsor's administrative profile defines the scope of management permissions, including which accounts they can create, view, and modify. By restricting the administrative profile to a specific department, each sponsor can manage only their own department's contractor accounts and not those of other departments.

NEW QUESTION # 71

When working with a FortiNAC-F Manager and cluster management, what will occur when a cluster manager recovers from a non-responsive state?

- A. It automatically returns to the manager state
- B. It will be removed from the cluster and placed in a standalone group
- **C. It rejoins the cluster as a worker node**
- D. It will perform a health check and be demoted to standby

Answer: C

Explanation:

When a cluster manager recovers from a non-responsive state, it does not automatically reclaim the manager role. Instead, it rejoins the cluster as a worker node to ensure cluster stability and avoid split-brain conditions.

NEW QUESTION # 72

A network administrator is troubleshooting a network access issue for a specific host. The administrator suspects the host is being assigned a different network access policy than expected.

Where would the administrator look to identify which network access policy, if any, is being applied to a particular host?

- A. The Port Properties view of the hosts port
- B. The Connections view
- C. The Policy Logs view
- **D. The Policy Details view for the host**

Answer: D

Explanation:

When troubleshooting network access in FortiNAC-F, it is often necessary to verify exactly why a host has been granted a specific level of access. Since FortiNAC-F evaluates policies from the top down and assigns access based on the first match, an administrator needs a clear way to see the results of this evaluation for a specific live endpoint.

The Policy Details (C) view is the designated tool for this purpose. By navigating to the Hosts > Hosts (or Adapter View) in the Administration UI, an administrator can search for the specific MAC address or IP of the host in question. Right-clicking on the host record reveals a context menu from which Policy Details can be selected. This view provides a real-time "look" into the policy engine's decision for that specific host, showing the Network Access Policy that was matched, the User/Host Profile that triggered the match, and the resulting Network Access Configuration (VLAN/ACL) currently applied.

NEW QUESTION # 73

An administrator wants to build a security rule that will quarantine contractors who attempt to access specific websites.

In addition to a user host profile, which two components must the administrator configure to create the security rule? (Choose two.)

- **A. Action**

- B. Trigger
- C. Security String
- D. Endpoint compliance policy
- E. Methods

Answer: A,B

Explanation:

A security rule requires a trigger to detect the condition, such as contractors accessing specific websites based on security or traffic events. It also requires an action to define the response, such as quarantining the contractor when the trigger condition is met.

NEW QUESTION # 74

When FortiNAC-F is managing VPN clients connecting through FortiGate, why must the clients run a FortiNAC-F agent?

- A. To transparently update The client IP address upon successful authentication
- B. To collect user authentication details
- C. To collect the client IP address and MAC address
- D. To validate the endpoint policy compliance

Answer: C

Explanation:

When FortiNAC-F manages VPN clients through a FortiGate, the agent plays a fundamental role in device identification that standard network protocols cannot provide on their own. In a standard VPN connection, the FortiGate establishes a Layer 3 tunnel and assigns a virtual IP address to the client. While the FortiGate sends a syslog message to FortiNAC-F containing the username and this assigned IP address, it typically does not provide the hardware (MAC) address of the remote endpoint's physical or virtual adapter.

FortiNAC-F relies on the MAC address as the primary unique identifier for all host records in its database. Without the MAC address, FortiNAC-F cannot correlate the incoming VPN session with an existing host record to apply specific policies or track the device's history. By running either a Persistent or Dissolvable Agent, the endpoint retrieves its own MAC address and communicates it directly to the FortiNAC-F service interface. This allows the "IP to MAC" mapping to occur.

Once FortiNAC-F has both the IP and the MAC, it can successfully identify the device, verify its status, and send the appropriate FSSO tags or group information back to the FortiGate to lift network restrictions.

NEW QUESTION # 75

.....

What are you waiting for? Opportunity knocks but once. You can get Fortinet NSE5_FNC_AD-7.6 complete as long as you enter Free4Dump website. You find the best NSE5_FNC_AD-7.6 Exam Training materials, with our exam questions and answers, you will pass the exam.

NSE5_FNC_AD-7.6 Trustworthy Pdf: https://www.free4dump.com/NSE5_FNC_AD-7.6-braindumps-torrent.html

We have online and offline service for NSE5_FNC_AD-7.6 exam braindumps, and if you have any questions, you can consult us, and we will give you reply as quickly as we can. Get the best NSE5_FNC_AD-7.6 online practice tests with the Free4Dump's NSE5_FNC_AD-7.6 online interactive testing engine and pass your NSE5_FNC_AD-7.6 cert very easily and comfortably. With online test engine, you will feel the atmosphere of NSE5_FNC_AD-7.6 valid test.

Our NSE5_FNC_AD-7.6 study tool also gives numerous candidates a better perspective on the real exam. Do the two groups differ in average age of the borrower, We have online and offline service for NSE5_FNC_AD-7.6 exam braindumps, and if you have any questions, you can consult us, and we will give you reply as quickly as we can.

Reliable Fortinet - NSE5_FNC_AD-7.6 - Valid Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Exam Answers

Get the best NSE5_FNC_AD-7.6 online practice tests with the Free4Dump's NSE5_FNC_AD-7.6 online interactive testing engine and pass your NSE5_FNC_AD-7.6 cert very easily and comfortably.

With online test engine, you will feel the atmosphere of NSE5_FNC_AD-7.6 valid test, We are credited with valid

What's more, there is no limitation on our NSE5_FNC_AD-7.6 : Fortinet NSE 5 - FortiNAC-F 7.6 Administrator software version about how many computers our customers used to download it.
