If your answer is absolutely yes, then we would like to suggest you to try our CCAS Training Materials, which are high quality and efficiency CCAS test tools. Your success is 100% ensured to pass the CCAS exam and acquire the dreaming certification which will enable you to reach for more opportunities to higher incomes or better enterprises.

ACAMS Certified Cryptoasset Anti-Financial Crime Specialist Examination Sample Questions (Q74-Q79):

NEW QUESTION # 74

In considering particular virtual asset products, services, or activities, which features should be considered by management?

- A. Regulatory expectations.
- B. Ability to mingle funds within wider pools.
- C. Transaction volumes.
- D. Ability for other virtual asset service providers (VASPs) to utilize the service to provide services to their own customers.

Answer: A,B,C,D

Explanation:

Management must consider a comprehensive set of features when evaluating virtual asset products and services, including:
Ability for other VASPs to utilize the service (A): This increases risk exposure as services may be used indirectly by unknown parties.

Ability to mingle funds within wider pools (B): Mixing services or pooled wallets increase anonymity and laundering risk.

Regulatory expectations (C): Management must ensure compliance with all applicable laws and guidelines.

Transaction volumes (D): High transaction volumes can increase operational risk and require enhanced monitoring.

The DFSA AML and COB Modules, as well as FATF guidance, stress that a risk-based approach requires consideration of all these features in product/service risk assessments.

NEW QUESTION # 75

What is a "smart contract"?

- A. A legal agreement stored offline.
- B. A compliance monitoring tool.
- C. A cold storage wallet type.
- D. A self-executing code stored on blockchain.

Answer: D

Explanation:

Smart contracts execute predetermined conditions automatically on blockchain, enabling decentralized applications and services.

NEW QUESTION # 76

Which type of wallet poses the highest AML risk?

- A. Exchange hot wallet
- B. Unhosted wallet
- C. Multi-signature wallet
- D. Custodial wallet

Answer: B

Explanation:

Unhosted wallets allow direct user control without third-party oversight, making them harder to monitor and more vulnerable to misuse.

NEW QUESTION # 77

Which risk category covers threats from ransomware actors demanding payment in cryptoassets?

- A. Cyber-enabled financial crime risk
- B. Counterparty risk
- C. Operational risk
- D. Liquidity risk

Answer: A

Explanation:

Ransomware schemes are categorized as cyber-enabled financial crimes. AML/CFT frameworks require that such risks be assessed and mitigated through blockchain analytics, sanctions screening, and transaction monitoring for known ransomware wallet addresses.

NEW QUESTION # 78

Misconfigured smart contracts can allow which type of scam to occur?

- A. Rug pull
- B. Phishing
- C. Ransomware
- D. SIM

Answer: A

Explanation:

Misconfigured or poorly designed smart contracts can enable rug pull scams, where developers create fraudulent decentralized finance (DeFi) projects or tokens and then withdraw liquidity or funds abruptly, leaving investors with worthless assets.

Phishing (A) and SIM attacks (B) relate to social engineering and telecom fraud, respectively, and ransomware (D) is malware demanding payment. Rug pulls specifically exploit smart contract vulnerabilities.

The DFSA and AML thematic reviews on crypto highlight rug pull scams as a key operational and financial crime risk linked to smart contract vulnerabilities.

NEW QUESTION # 79

.....

Dumpleader online digital Certified Cryptoasset Anti-Financial Crime Specialist Examination (CCAS) exam questions are the best way to prepare.
