Pass Guaranteed Quiz Confluent - CCAAK - Pass-Sure Test Confluent Certified Administrator for Apache Kafka Score Report

In the PDF version, the Confluent Certified Administrator for Apache Kafka (CCAAK) exam questions are printable and portable. You can take these Confluent Certified Administrator for Apache Kafka (CCAAK) pdf dumps anywhere and even take a printout of Confluent Certified Administrator for Apache Kafka (CCAAK) exam questions. The PDF version is mainly composed of real Confluent CCAAK Exam Dumps. PrepAwayExam updates regularly to improve its Confluent Certified Administrator for Apache Kafka (CCAAK) pdf questions and also makes changes when required.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q34-Q39):

NEW QUESTION # 34

How can load balancing of Kafka clients across multiple brokers be accomplished?

- A. Offsets

- B. Replicas
- C. Connectors
- **D. Partitions**

Answer: D

Explanation:

Partitions are the primary mechanism for achieving load balancing in Kafka. When a topic has multiple partitions, Kafka clients (producers and consumers) can distribute the load across brokers hosting these partitions.

NEW QUESTION # 35

Which option is a valid Kafka Topic cleanup policy? (Choose two.)

- A. cleanup
- B. default
- **C. compact**
- **D. delete**

Answer: C,D

Explanation:

The delete policy deletes old log segments when they exceed the retention period or size.

The compact policy retains only the latest record for each key, enabling efficient key-based storage.

NEW QUESTION # 36

How does Kafka guarantee message integrity after a message is written on a disk?

- A. Only message metadata can be altered using command line (CLI) tools.
- B. A message can be edited by the producer, producing to the message offset.
- **C. A message cannot be altered once it has been written.**
- **C A message can be grouped with message sharing the same key to improve read performance**

Answer: C

Explanation:

Kafka ensures message immutability for data integrity. Once a message is written to a Kafka topic and persisted to disk, it cannot be modified. This immutability guarantees that consumers always receive the original message content, which is critical for auditability, fault tolerance, and data reliability.

NEW QUESTION # 37

When using Kafka ACLs, when is the resource authorization checked?

- A. Each time the resource is accessed within the configured authorization interval.
- B. The initial time the resource is accessed.
- **C. Each time the resource is accessed.**
- D. When the client connection is first established.

Answer: C

Explanation:

Kafka ACLs (Access Control Lists) perform authorization checks every time a client attempts to access a resource (e.g., topic, consumer group). This ensures continuous enforcement of permissions, not just at connection time or intervals. This approach provides fine-grained security, preventing unauthorized actions at any time during a session.

NEW QUESTION # 38

If the Controller detects the failure of a broker that was the leader for some partitions, which actions will be taken? (Choose two.)

- A. The Controller sends the new leader and ISR list changes to all brokers.
- B. The Controller waits for a new leader to be nominated by ZooKeeper.
- C. The Controller persists the new leader and ISR list to ZooKeeper.
- D. The Controller sends the new leader and ISR list changes to all producers and consumers.

Answer: A,C

Explanation:

The Controller updates ZooKeeper with the new leader and in-sync replica (ISR) information to maintain metadata consistency. Brokers need this information to correctly route client requests and continue replication.

NEW QUESTION # 39

.....

We even guarantee our customers that they will pass Confluent CCAAK Exam easily with our provided study material and if they failed to do it despite all their efforts they can claim a full refund of their money (terms and conditions apply). The third format is the desktop software format which can be accessed after installing the software on your Windows computer or laptop.
