# 1Z0-182 Reliable Exam Prep & New 1Z0-182 Test Topics

BTW, DOWNLOAD part of PrepPDF 1Z0-182 dumps from Cloud Storage: https://drive.google.com/open?id=1dAi8kRbeYXhT9kU0lmi8e-X_PSQo_EPK

People always tend to neglect the great power of accumulation, thus the 1Z0-182 study materials can not only benefit one's learning process but also help people develop a good habit of preventing delays. We have full confidence to ensure that you will have an enjoyable study experience with our 1Z0-182 Study Materials, which are designed to arouse your interest and help you pass the exam more easily. You will have a better understanding after reading the following advantages.

In the past few years, Oracle certification 1Z0-182 exam has become an influenced computer skills certification exam. However, how to pass Oracle certification 1Z0-182 exam quickly and simply? Our PrepPDF can always help you solve this problem quickly. In PrepPDF we provide the 1Z0-182 Certification Exam training tools to help you pass the exam successfully. The 1Z0-182 certification exam training tools contains the latest studied materials of the exam supplied by IT experts.

New 1Z0-182 Test Topics & 1Z0-182 Valid Exam Answers

The trial version of our 1Z0-182 practice test is also available for free on our website. Students can go and check it out to get an idea of the content they wish to pay for. Our prices are also very low in comparison to our competitors as we know that students cannot afford high-budget practice materials. Just choose the right PrepPDF Oracle Database 23ai Administration Associate Questions formats and download quickly and start 1Z0-182 Exam Preparation without wasting further time.

Oracle 1Z0-182 Exam Syllabus Topics:

Topic	Details
Topic 1	• Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.

Topic 2	• Managing Tablespaces and Datafiles: This section assesses the abilities of Storage Administrators in creating, modifying, and describing tablespaces. It also covers recognizing data storage requirements and understanding datafile placement for efficient storage management.
Topic 3	• Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
Topic 4	• Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.
Topic 5	• Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.
Topic 6	• Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.

Oracle Database 23ai Administration Associate Sample Questions (Q41-Q46):

NEW QUESTION # 41
Which three are benefits of using temp UNDO when performing DML on global temporary tables?

- A. It permits DML on global temporary tables even if the database is opened read-only.
- B. It reduces I/Os to the SYSTEM tablespace.
- C. It reduces I/Os to the SYSAUX tablespace.
- D. It reduces the amount of UNDO stored in the UNDO tablespace.
- E. It reduces the amount of redo generated.

Answer: B,D,E

Explanation:
Temp UNDO, introduced in Oracle 12c and refined in 23ai, stores undo for global temporary tables (GTTs) in temporary tablespaces:
A . It permits DML on GTTs even if the database is opened read-only.False. In read-only mode, DML on GTTs is allowed regardless of temp UNDO, as GTT data is session-private, but temp UNDO doesn't specifically enable this.
B . It reduces the amount of UNDO stored in the UNDO tablespace.True. Temp UNDO stores undo in the temporary tablespace, reducing usage of the permanent UNDO tablespace.
C . It reduces I/Os to the SYSTEM tablespace.True. By avoiding permanent undo, it reduces metadata updates in the SYSTEM tablespace related to undo management.
D . It reduces the amount of redo generated.True. Temp UNDO changes are not redo-logged to the same extent as permanent undo, minimizing redo generation.
E . It reduces I/Os to the SYSAUX tablespace.False. SYSAUX is unrelated to undo management; temp UNDO affects temporary and SYSTEM tablespaces.

NEW QUESTION # 42
Which three statements are true about the Oracle Database server during and immediately after SHUTDOWN TRANSACTIONAL?

- A. Uncommitted transactions are allowed to continue to the next COMMIT.
- B. Uncommitted transactions are allowed to continue to the next ROLLBACK.

- C. Instance recovery occurs automatically during the shutdown.
- D. Sessions remain connected even if they are not running a transaction.
- E. New connection requests made to the database instance are refused.

Answer: A,D,E

Explanation:
A .False. Recovery happens on startup, not shutdown.
B .False. TRANSACTIONAL waits for commits or rollbacks, then disconnects.
C .True. New connections are blocked during shutdown.
D .True. Inactive sessions persist until shutdown completes.
E .True. Active transactions can commit before disconnection.

NEW QUESTION # 43
Which two statements are true regarding Oracle database space management within blocks managed by Automatic Segment Space Management (ASSM)?

- A. ASSM assigns blocks to one of the four fullness categories based on what percentage of the block is allocated for rows.
- B. Update operations always relocate rows into blocks with free space appropriate to the length of the row being updated.
- C. Insert operations always insert new rows into blocks with free space appropriate to the length of the row being inserted.
- D. The first block with enough free space to accommodate a row being inserted will always be used for that row.
- E. PCTFREE defaults to 10% for all blocks in all segments for all compression methods.

Answer: A,C

Explanation:
A .True. ASSM categorizes blocks (e.g., 0-25%, 25-50%) for efficient space use.
B .False. Updates may cause chaining/migration, not always relocation.
C .True. ASSM optimizes inserts into suitable blocks.
D .False. ASSM uses a bitmap, not necessarily the first block.
E .False. PCTFREE is segment-specific, not universally 10%.

NEW QUESTION # 44
Examine this command: ALTER DATABASE MOVE DATAFILE '/u01/sales01.dbf' TO '/u02/sales02.dbf'; Which two statements are true?

- A. It overwrites any existing file with the name sales02.dbf in /u02 by default.
- B. Compressed objects in sales01.dbf will be uncompressed in sales02.dbf after the move.
- C. DML may be performed on tables with one or more extents in this data file during the execution of this command.
- D. Tables with one or more extents in this data file may be queried during the execution of this command.
- E. The "TO" clause containing the new file name must be specified even if Oracle Managed Files (OMF) is used.

Answer: C,D

Explanation:
The ALTER DATABASE MOVE DATAFILE command relocates a data file to a new location while the database remains online, introduced in Oracle 12c and enhanced in subsequent releases like 23ai. Let's evaluate each option:
A . DML may be performed on tables with one or more extents in this data file during the execution of this command.True. The move operation is online by default in Oracle 23ai, allowing DML (INSERT, UPDATE, DELETE) operations on tables within the data file being moved. The database ensures consistency using redo and undo mechanisms.
B . It overwrites any existing file with the name sales02.dbf in /u02 by default.False. By default, the command does not overwrite an existing file unless the REUSE clause is specified (e.g., ALTER DATABASE MOVE DATAFILE ... REUSE). Without it, the command fails if the target file exists.
C . The "TO" clause containing the new file name must be specified even if Oracle Managed Files (OMF) is used.False. When OMF is enabled (via DB_CREATE_FILE_DEST), the TO clause is optional. If omitted, Oracle automatically generates a file name and places it in the OMF destination.
D . Compressed objects in sales01.dbf will be uncompressed in sales02.dbf after the move.False. The move operation is a physical relocation of the data file; it does not alter the logical structure or compression state of objects within it. Compressed data remains compressed.

E . Tables with one or more extents in this data file may be queried during the execution of this command.True. The online nature of the move allows queries (SELECT statements) to proceed without interruption, leveraging Oracle's multi-version consistency model.

NEW QUESTION # 45

What are Optimizer Statistics?

- A. Optimizer Statistics are table, column, index, and system statistics used for generating efficient SQL execution plans.
- B. Optimizer Statistics are a set of data distribution statistics collected in real time as data is inserted, deleted, or updated, which are stored in AWR and used for generating SQL execution plans.
- C. Optimizer Statistics are part of system performance statistics stored in AWR required for calculating SQL execution plans.
- D. Optimizer Statistics are statistics about data distribution within Oracle Datafiles.

Answer: A

Explanation:
A .False. Not real-time; collected periodically.
B .False. Not about datafile distribution.
C .True. Includes table, column, index stats for plan generation.
D .False. Stored in data dictionary, not AWR.

NEW QUESTION # 46

......

Questions of Oracle Database 23ai Administration Associate desktop practice exam software are similar to the actual 1Z0-182 exam questions. This gives you a genuine feeling of being in an 1Z0-182 exam atmosphere. This feature helps you become familiar with the 1Z0-182 real test format and improves your ability to do well on the actual 1Z0-182 exam.
