Our FSCP practice exam is specially designed for those people who have not any time to attend the class and prepare Forescout exam tests with less energy. You will understand each point of questions and answers with the help of our FSCP Exam Review. And our exam pass guide will cover the points and difficulties of the FSCP real exam, getting certification are just a piece of cake.

Forescout FSCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Advanced Troubleshooting: This section of the exam measures skills of operations leads and senior technical support engineers, and covers diagnosing complex issues across component interactions, policy enforcement failures, plugin misbehavior, and end to end workflows requiring root cause analysis and corrective strategy rather than just surface level fixes.

Topic 2	• Advanced Product Topics Certificates and Identity Tracking: This section of the exam measures skills of identity and access control specialists and security engineers, and covers the management of digital certificates, PKI integration, identity tracking mechanisms, and how those support enforcement and audit capability within the system.
Topic 3	• Customized Policy Examples: This section of the exam measures skills of security architects and solution delivery engineers, and covers scenario based policy design and implementation: you will need to understand business case requirements, craft tailored policy frameworks, adjust for exceptional devices or workflows, and document or validate those customizations in context.
Topic 4	• Plugin Tuning User Directory: This section of the exam measures skills of directory services integrators and identity engineers, and covers tuning plugins that integrate with user directories: configuration, mapping of directory attributes to platform policies, performance considerations, and security implications.
Topic 5	• Policy Functionality: This section of the exam meas-ures skills of policy implementers and integration specialists, and covers how policies operate within the platform, including dependencies, rule order, enforcement triggers, and how they interact with device classifications and dynamic attributes.
Topic 6	• Plugin Tuning Switch: This section of the exam measures skills of network switch engineers and NAC (network access control) specialists, and covers tuning switch related plugins such as switch port monitoring, layer 2 • 3 integration, ACL or VLAN assignments via network infrastructure and maintaining visibility and control through those network assets.
Topic 7	• General Review of FSCA Topics: This section of the exam measures skills of network security engineers and system administrators, and covers a broad refresh of foundational platform concepts, including architecture, asset identification, and initial deployment considerations. It ensures you are fluent in relevant baseline topics before moving into more advanced areas.|. Policy Best Practices: This section of the exam measures skills of security policy architects and operational administrators, and covers how to design and enforce robust policies effectively, emphasizing maintainability, clarity, and alignment with organizational goals rather than just technical configuration.

You do not need to think it is too late for you to study. As the saying goes, success and opportunity are only given to those people who are well-prepared! If you really long to own the FSCP certification, it is necessary for you to act now. We are willing to help you gain the certification. In order to meet the needs of all people, the experts of our company designed such a FSCP Guide Torrent that can help you pass your exam successfully.

Forescout Certified Professional Exam Sample Questions (Q37-Q42):

NEW QUESTION # 37
Which CLI command gathers historical statistics from the appliance and outputs the information to a single *.
csv file for processing and analysis?

- A. fstool sysinfo stats
- B. fstool va stats
- C. fstool appstats
- D. fstool tech-support
- E. fstool stats

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
The fstool sysinfo stats command is the correct CLI command used in Forescout platforms to gather and export historical statistics from the appliance to a single CSV file for processing and analysis.
According to the Forescout CLI Commands Reference Guide (versions 8.1.x through 8.5.3), the fstool sysinfo command is listed under the Machine Administration category of fstool commands. The command's primary purpose is to "View Extensive System Information about the Appliance".
When used with the stats parameter, the command fstool sysinfo stats specifically:
* Gathers historical statistics - The command collects comprehensive time-series data and historical statistics from the Forescout appliance
* Outputs to a CSV file - The information is exported to a *single .csv file format, making it suitable for import into spreadsheet applications and data analysis tools
* Enables processing and analysis - The CSV format allows administrators and engineers to perform offline analysis, trend analysis, and detailed troubleshooting Why Other Options Are Incorrect:
* fstool tech-support - This command is used to send logs and diagnostic information to Forescout Customer Support, not to output appliance statistics
* fstool appstats - This command is not documented in any official Forescout CLI reference guides
* fstool va stats - This command variant is not a recognized fstool command in Forescout documentation
* fstool stats - This standalone command variant is not a recognized fstool command in Forescout documentation Referenced Documentation:
* Forescout CLI Commands Reference Guide v8.1.x, 8.2.x, 8.4.x, 8.5.2, and 8.5.3
* Forescout Administration Guide v8.3 and v8.4
* Machine Administration fstool Commands section - Forescout Official Documentation Portal

NEW QUESTION # 38
Which of the following is true regarding the Windows Installed Programs property which employs the "for any
/for all" logic mechanism?

- A. Although the condition has multiple sub-properties, when "ANY" is selected it evaluates the programs for any of the configured sub-properties.
- B. Although the condition has sub-properties which could refer to a single program on multiple endpoints, the "any/all" refers to the program's properties.
- C. Although the condition has multiple sub-properties, the "any/all" refers to the sub-properties and not the programs.
- D. Although the condition has multiple sub-properties, the "any/all" refers to the programs and not the sub- properties.
- E. The condition does not have any sub-properties. The "any/all" refers to the multiple programs.

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
The Windows Installed Programs property condition utilizes multiple sub-properties including Program Name, Program Version, Program Vendor, and Program Path. However, when using the "for ANY/for ALL" logic mechanism, the "any/all" refers to the PROGRAMS and not to the sub-properties.
How the "Any/All" Logic Works with Windows Installed Programs:
When configuring a policy condition with the Windows Installed Programs property, the "any/all" logic determines whether an endpoint should match the condition based on:
* "For ANY" - The endpoint matches the policy condition if ANY of the configured programs are installed on the endpoint
* "For ALL" - The endpoint matches the policy condition if ALL of the configured programs are installed on the endpoint Example:
If an administrator creates a condition like:
* Windows Installed Programs contains "Microsoft Office" OR "Adobe Reader"
* Using "For ANY": The endpoint matches if it has EITHER Microsoft Office OR Adobe Reader installed
* Using "For ALL": The endpoint matches only if it has BOTH Microsoft Office AND Adobe Reader installed The sub-properties (Program Name, Version, Vendor, Path) are used to define and identify which specific programs to match against, but the "any/all" logic applies to the PROGRAMS themselves, not to the sub- properties.
Why Other Options Are Incorrect:
* A - Incorrectly states the "any/all" evaluates the programs for the sub-properties
* B - Factually incorrect; the condition definitely has multiple sub-properties (Name, Version, Vendor, Path)
* C - Confuses the scope; the "any/all" does not refer to "program's properties" but to multiple programs
* D - Inverted logic; the "any/all" refers to the programs, not the sub-properties Referenced Documentation:
* Forescout Administration Guide v8.3, v8.4
* Working with Policy Conditions - List of Properties by Category

* Windows Applications Content Module Configuration Guide

NEW QUESTION # 39

Which of the following is the best way to brand the CounterACT HTTP pages to look like corporate internal web pages?

- A. Using the "Reports Portal," modify the CSS for the desired skins
- B. This is not possible with CounterACT portal and HTTP pages
- C. Have a webmaster modify the HTML pages within the Tomcat web server
- D. Using the "User Portal Builder," modify the CSS for the desired skins
- E. Using the "User Portal Builder" basic interface

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
According to the Forescout Administration Guide, the best way to brand CounterACT HTTP pages to match corporate identity is to use "the 'User Portal Builder' to modify the CSS for the desired skins". This is the officially supported method for customizing the appearance of Forescout portal pages.
User Portal Builder for Branding:
The User Portal Builder provides:
* CSS Customization - Modify cascading stylesheets to match corporate branding
* Skin Selection - Choose different portal skins/themes
* Logo and Colors - Customize logos, color schemes
* Supported Customization - Official, supported method through the GUI
Why Option C is Correct:
The User Portal Builder specifically provides CSS modification capabilities to customize the appearance of Forescout HTTP portal pages to match organizational branding standards.
Why Other Options Are Incorrect:
* A. Reports Portal - Reports Portal is separate from HTTP portal pages; not for branding
* B. Not possible - Customization IS possible through User Portal Builder
* D. Modify HTML in Tomcat - While technically possible, this is NOT supported; may break with updates
* E. Basic interface only - The full User Portal Builder supports CSS modification, not just basic interface Supported Customization
Methods:
According to the documentation:
* # User Portal Builder (CSS) - Supported, recommended method
* # Direct Tomcat HTML modification - Not supported; unsupported method
* # Manual CSS editing - Unsupported; may conflict with updates
Referenced Documentation:
* Forescout Administration Guide - User Portal Builder section

NEW QUESTION # 40

Irresolvable hosts would match the condition. When configuring policies, which of the following statements is true regarding this image?

Select one:

- A. Generates a NOT condition in the sub-rule condition
- B. Negates the criteria outside the property
- C. Modifies the irresolvable condition to TRUE
- D. Has no effect on irresolvable hosts

Answer: D

Explanation:
Based on the image showing "Meets the following criteria" radio button selected (as opposed to "Does not meet the following criteria"), the correct statement is: "Has no effect on irresolvable hosts".
Understanding "Meets the following criteria":

According to the Forescout policy configuration documentation:
When "Meets the following criteria" is selected:
* Normal Evaluation - The condition is evaluated as written
* No Negation - There is NO inversion of logic
* Irresolvable Handling - Separate setting; the "Meets" choice does NOT affect irresolvable handling Irresolvable Hosts -
Independent Setting:
According to the policy sub-rule advanced options documentation:
"The 'Meets the following criteria' radio button and the 'Evaluate irresolvable as' checkbox are independent settings."
* "Meets the following criteria" - Controls normal/negated evaluation
* "Evaluate irresolvable as" - Controls how unresolvable properties are treated The selection of "Meets the following criteria" has no
specific effect on how irresolvable hosts are handled.
Why Other Options Are Incorrect:
* B. Generates a NOT condition - "Meets" does NOT generate NOT; it's the normal condition
* C. Negates the criteria outside - "Meets" does not negate anything; it's the affirmative option
* D. Modifies irresolvable condition to TRUE - The "Evaluate irresolvable as" setting controls that, not
"Meets"
Referenced Documentation:
* Define policy scope
* Forescout eyeSight policy sub-rule advanced options
* Forescout Platform Policy Sub-Rule Advanced Options

NEW QUESTION # 41
Which of the following properties can be determined by the HPS Plugin? (Choose two)

- A. AD group membership
- B. Application installed on Mac OS
- C. HTTP banner
- D. External Device on Windows
- E. Operating System

Answer: C,E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:
According to the Forescout HPS Inspection Engine Configuration Guide and HPS Applications Plugin documentation, the properties
that can be determined by the HPS Plugin are: Operating System (C) and HTTP banner (E).
HPS Plugin Capabilities:
According to the HPS Inspection Engine guide:
"The HPS (Host Property Scanner) Inspection Engine provides host properties for detecting endpoint characteristics including
operating system, services, and applications." The HPS plugin determines:
* Operating System - OS type, version, service pack level
* HTTP Banner - Service versions from HTTP banner scanning
* Services and Applications - Running processes and installed software
* System Information - Hardware vendor, NIC vendor, etc.
Operating System Detection:
According to the HPS Applications Plugin guide:
"Windows operating system information is detected by the HPS Applications Plugin, including: Release, Package/flavor, Service
Pack" The plugin detects:
* Windows OS versions (XP, Vista, 7, 8, 10, etc.)
* Server editions (2003, 2008, 2012, 2016, etc.)
* Service pack levels
* OS build information
HTTP Banner Detection:
According to the HPS Inspection Engine guide:
"Service Banner: Indicates the service and version information, as determined by Nmap. HTTP banner scanning returns service
identification information." The HTTP banner property is resolved by NMAP scanning with the -sV parameter, which is part of the
HPS plugin's classification capabilities.
Why Other Options Are Incorrect:
* A. Application installed on Mac OS - The HPS Applications Plugin is for Windows applications only; it does not detect Mac OS
applications

* B. External Device on Windows - External Device detection is a separate property unrelated to HPS plugin discovery
* D. AD group membership - This is determined by the User Directory plugin via LDAP, not the HPS plugin HPS Plugin vs. Other Plugins:
According to the documentation:
Property
HPS Plugin
Other Plugins
Operating System
#Yes
N/A
HTTP Banner
#Yes (NMAP)
N/A
Windows Applications
#Yes
N/A
AD Group Membership
#No
User Directory
Mac OS Applications
#No
macOS-specific
External Devices
#No
Network discovery
