## Utilize the free PCED-30-02 demo version to confirm the validity of the product

Our accurate, reliable, and top-ranked PCED - Certified Entry-Level Data Analyst with Python (PCED-30-02) exam questions will help you qualify for your Python Institute PCED-30-02 certification on the first try. Do not hesitate and check out PDFDumps excellent PCED - Certified Entry-Level Data Analyst with Python (PCED-30-02) practice exam to stand out from the rest of the others.

## Python Institute PCED - Certified Entry-Level Data Analyst with Python Sample Questions (Q37-Q42):

### NEW QUESTION # 37

You are given a short Python script that uses both arithmetic and assignment operators. The variable `x` is initialized as 4, then updated using `x *= 2 + 3`. What will be printed when the final value of `x` is displayed?

- A. 0
- **B. 1**
- C. 2
- D. 3

**Answer: B**

Explanation:

Python evaluates the addition first because of operator precedence. The expression `2 + 3` equals 5, then `x *= 5` multiplies the current value of `x` (4) by 5, resulting in a final value of 20.

### NEW QUESTION # 38

An online retailer collects customer reviews, order transaction logs, and product ratings. Which of the following correctly classifies these types of data? Select the best answer.

- A. Product ratings are quantitative and unstructured; customer reviews are structured and qualitative; transaction logs are quantitative and unstructured.
- B. Product ratings are qualitative and structured; customer reviews are qualitative and unstructured; transaction logs are quantitative and semi-structured.
- **C. Product ratings are quantitative and structured; customer reviews are qualitative and unstructured; transaction logs are structured and quantitative**
- D. Product ratings are qualitative and unstructured; customer reviews are quantitative and structured; transaction logs are semi-structured and qualitative.

**Answer: C**

Explanation:

Product ratings are numeric values stored in fixed fields, making them quantitative and structured.

Customer reviews are free-text responses, which are qualitative and unstructured. Transaction logs consist of organized records with defined fields such as order ID, date, and amount, making them structured and quantitative.

### NEW QUESTION # 39

A script attempts to divide two numbers using / and //. The values are 7 and 2. The developer wants to understand the difference between true division and floor division. What are the results respectively?

- **A. 3.5 and 3**
- B. 4 and 3
- C. 3 and 3.5
- D. 3 and 4

**Answer: A**

Explanation:

The / operator performs true division, returning a float result of 3.5. The // operator performs floor division, truncating the decimal part and returning the integer value 3.

### NEW QUESTION # 40

Which task is traditionally or typically performed by a data analyst, and not by a data scientist or analytics specialist? Select the best answer.

- **A. Creating summary tables and charts to describe patterns in historical data.**
- B. Designing a data pipeline to ingest and process real-time sensor data.
- C. Recommending pricing strategies using predictive modeling and A/B testing.
- D. Developing machine learning algorithms to predict user behavior.

**Answer: A**

Explanation:

Creating summary tables and charts to describe patterns in historical data is a core responsibility of a data analyst, focusing on descriptive analytics and reporting rather than building predictive models, machine learning systems, or engineering data pipelines.

### NEW QUESTION # 41

A program uses while False: followed by print statements inside the loop. The developer expects output. What will actually happen during execution?

- A. Error
- B. Prints once
- **C. No execution**
- D. Infinite loop

**Answer: C**

Explanation:

The condition False is evaluated before entering the loop. Since it is always false, the loop body is never executed, and no output is produced.

## NEW QUESTION # 42

.....

If you want to buy our PCED-30-02 training engine, you must ensure that you have credit card. We do not support deposit card and debit card to pay for the PCED-30-02 exam questions.
